

Commission on
Improving the
Status of Children

Commission on Improving the Status of Children

FEBRUARY 23, 2022

Agenda

1. Welcome and Introductions
2. Consent Agenda
 - a. Minutes from December 2021 meeting

Agenda

3. Strategic Priority: Juvenile Justice and Cross-System Youth
 - a. Julie Whitman, Executive Director
HB 1359—update on task force recommendations

Agenda

3. Strategic Priority: Juvenile Justice and Cross-System Youth
 - b. Joel Wieneke, IPDC & Terrie Decker, IDOC
Recommendations on Juvenile Reintegration Services

Youth Reintegration

NATIONAL STANDARDS AND BEST PRACTICES

Resources

- National Juvenile Justice Network, Policy Platform, Youth Reentry/Aftercare (July 2010)
- Youth Reentry Task Force of the Juvenile Justice and Delinquency Prevention Coalition, Back on Track: Supporting Youth Reentry from Out-of-Home Placement to the Community (2009)
- Literature Review, Juvenile Reentry, OJJDP (Aug. 2017)
- Nancy G. Calleja, Translating research into practice: Designing effective reentry services for adolescent offenders, Aggression and Violent Behavior (2019)
- Youth Housing Models for Community Re-entry: Fact Sheet, http://act4jj.org/sites/default/files/ckfinder/files/factsheet_30.pdf

CISC Strategic Goal 4: Objective 7

- **Strategic Goal 4:** Improve safety and outcomes of youth who come into contact with the juvenile justice system
- **Objective 7:** Identify and encourage adoption of effective and promising practices to support youth transitioning back to their families and communities from corrections, secure detention, and residential placement

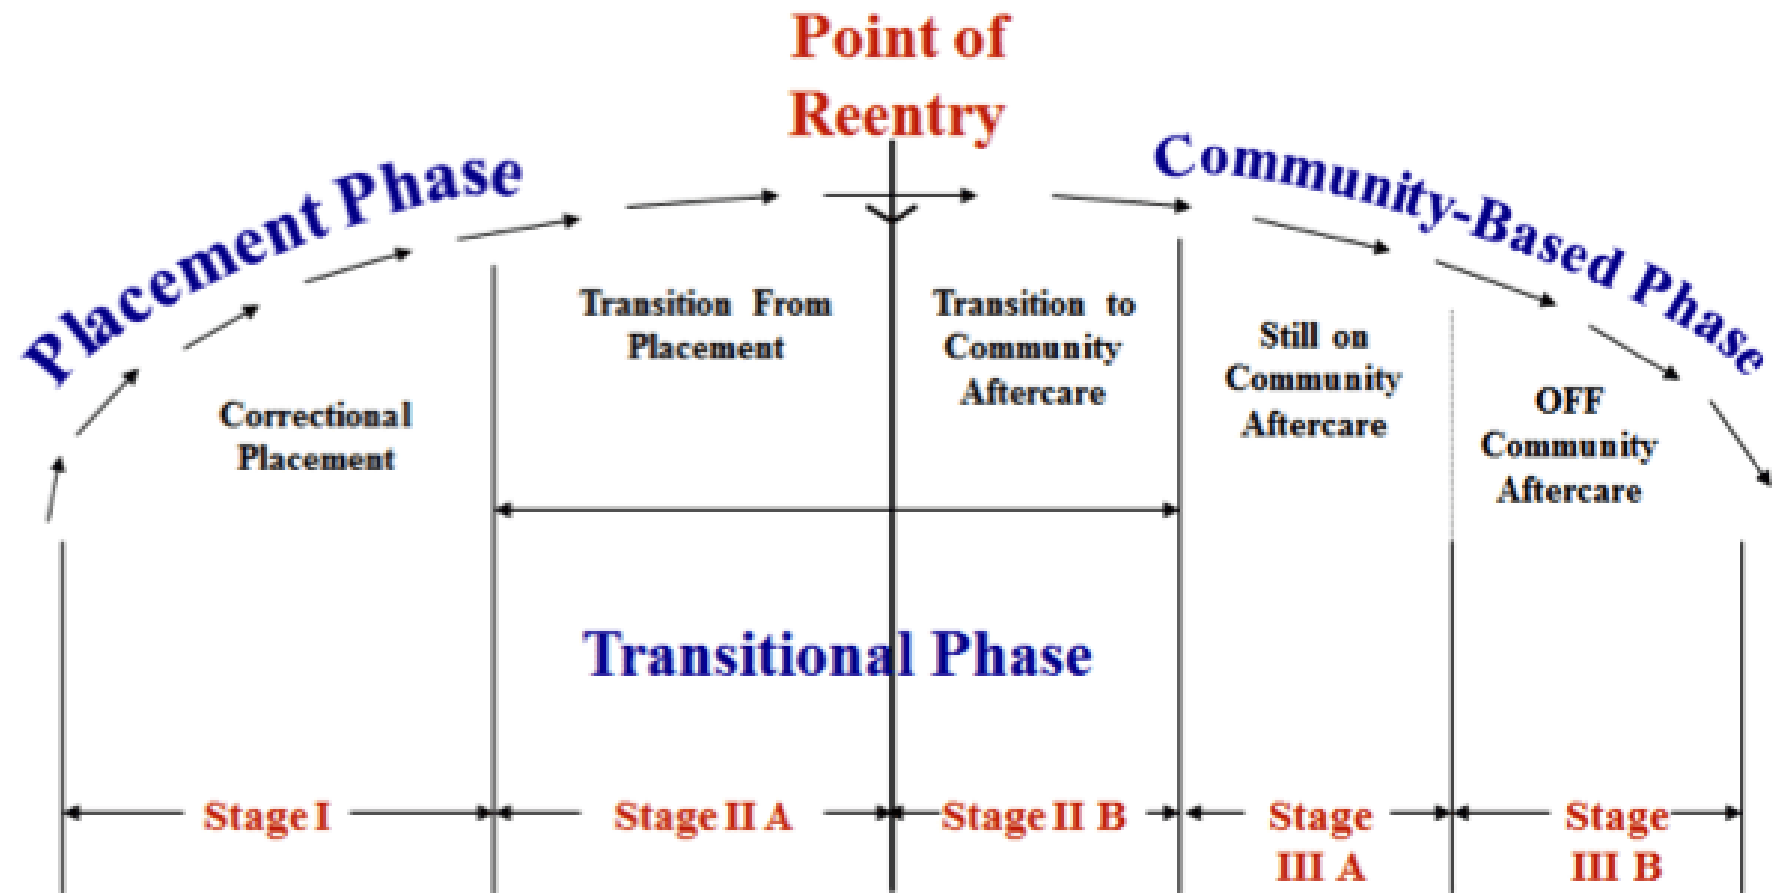

“Research has shown that aiding in successful reentry can reduce risk of recidivism. However, recently released individuals often return to underserved communities and face a wide range of barriers that make successful reintegration difficult. Many experience difficulties meeting needs such as employment, behavioral health treatment, and housing. In addition, effective reentry programs and services are few and far between.”

<https://icjia.illinois.gov/researchhub/articles/an-overview-of-evidence-based-practices-and-programs-in-prison-reentry>

**Start
early.**

Reintegration Continuum

Needs of youth reintegrating from placement and confinement

- 1) mental health and substance use treatment
- 2) family engagement
- 3) targeted educational and employment programs
- 4) housing and supports

Mental health and substance use treatment

More than half of youth placed in residential facilities meet the criteria for one or more psychiatric disorders.

More than a 1/3 of youth placed showed evidence of substance abuse disorders

Childhood trauma increase the risk of rearrest.

Reintegration services must be tailored to the individual needs of the youth.

Family engagement

- Family and parenting plays a significant role in reducing the risk of antisocial and delinquent behavior in youths
- Out-of-home placement interferes with family and parenting relationships, sometimes very significantly
- Family engagement for reintegration must be supported both during the out-of-home placement and upon release.

Family engagement specifics

Youth should be placed close to home so families can be involved.

Phone calls with family should be encouraged, free, and prohibition of family contact should not be a behavior management tool.

The reintegration plan should be made with collaboration from youth and family (and other supportive individuals).

Outside agencies, organizations, and other individuals involved in a youth's life must be allowed to visit the youth in placement to establish and maintain positive relationships.

Targeted education and employment programs

Education and employment status are strong predictors of criminal and delinquent behavior, but youths reentering the community face numerous challenges to employment opportunities and returning to traditional school environments.

Placement educational offerings must correspond with DOE or local school curriculum.

Employment training should be connected to employment and educational opportunities in the community.

Strengths based training, and practical life skills training must be a part of the placement experience.

Housing and Supports

- Most youth released from facilities are unprepared to take on adult responsibilities: housing, income, education and future planning.
- Youth housing/services models that encourage young people to develop skills and become self-sufficient are necessary.
- Housing combined with services show significant promise in addressing recidivism and homelessness for youth re-entering the community.

Juvenile Justice Reform Task Force Recommendation

- “Require that all youth committed to the Department of Correction custody receive county provided/contracted services to support their reintegration back into the community and to reduce recidivism. Counties shall maintain at least monthly contact with youth, and their families, during their time in placement, and collaborate with DOC in the development of a formal reintegration plan.”
- Establish a formula-based block grant for all counties to be used for research-based, community-based programs and practices as cost-effective alternatives to detention and incarceration **as well as to provide required reintegration services for youth leaving DOC placement.**
- Adopted by CISC on Dec. 15, 2021

State-Wide Survey

Gather perspectives from individuals doing this work to determine to what extent Indiana is currently meeting best practice guidelines

Professions of Individuals Participating in the Survey

The survey includes data from

266 participants

across the state of Indiana

Most often, people worked across all four levels of reentry.

Detention

Residential

Shelter Care

Department of Corrections

Consistency of Services with Evidence Base

Most people indicated addressing

4 areas

when planning reentry services

Post-release services TYPICALLY address the following areas:

Survey Questions

All questions were asked on a 5 point scale.

(0 = Not at All; 4 = Very)

Scores below 3 (moderately) were determined to be unfavorable by our workgroup.

COMPETENCE

- Does your agency feel competent in addressing needs pre-release?

AVAILABILITY

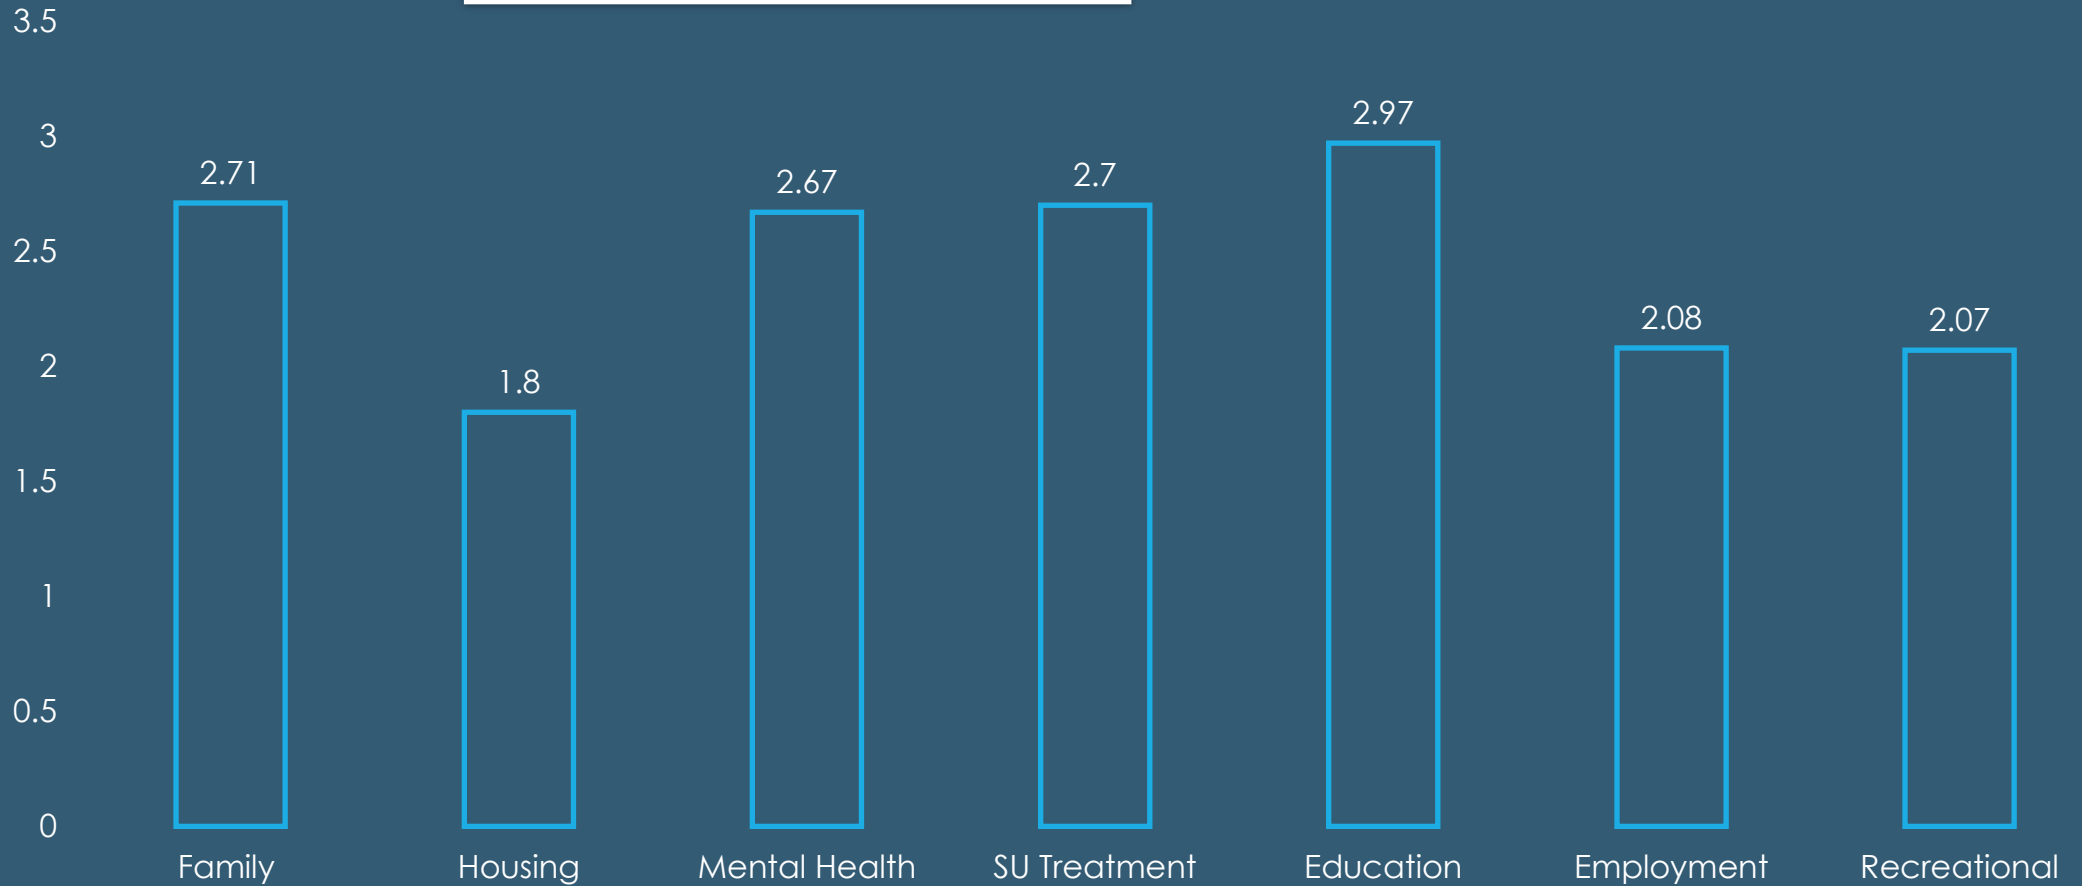

- Are there strong community supports post-release?

ACCESSIBILITY

- Are youth able to access services post-release?

COMPETENCE

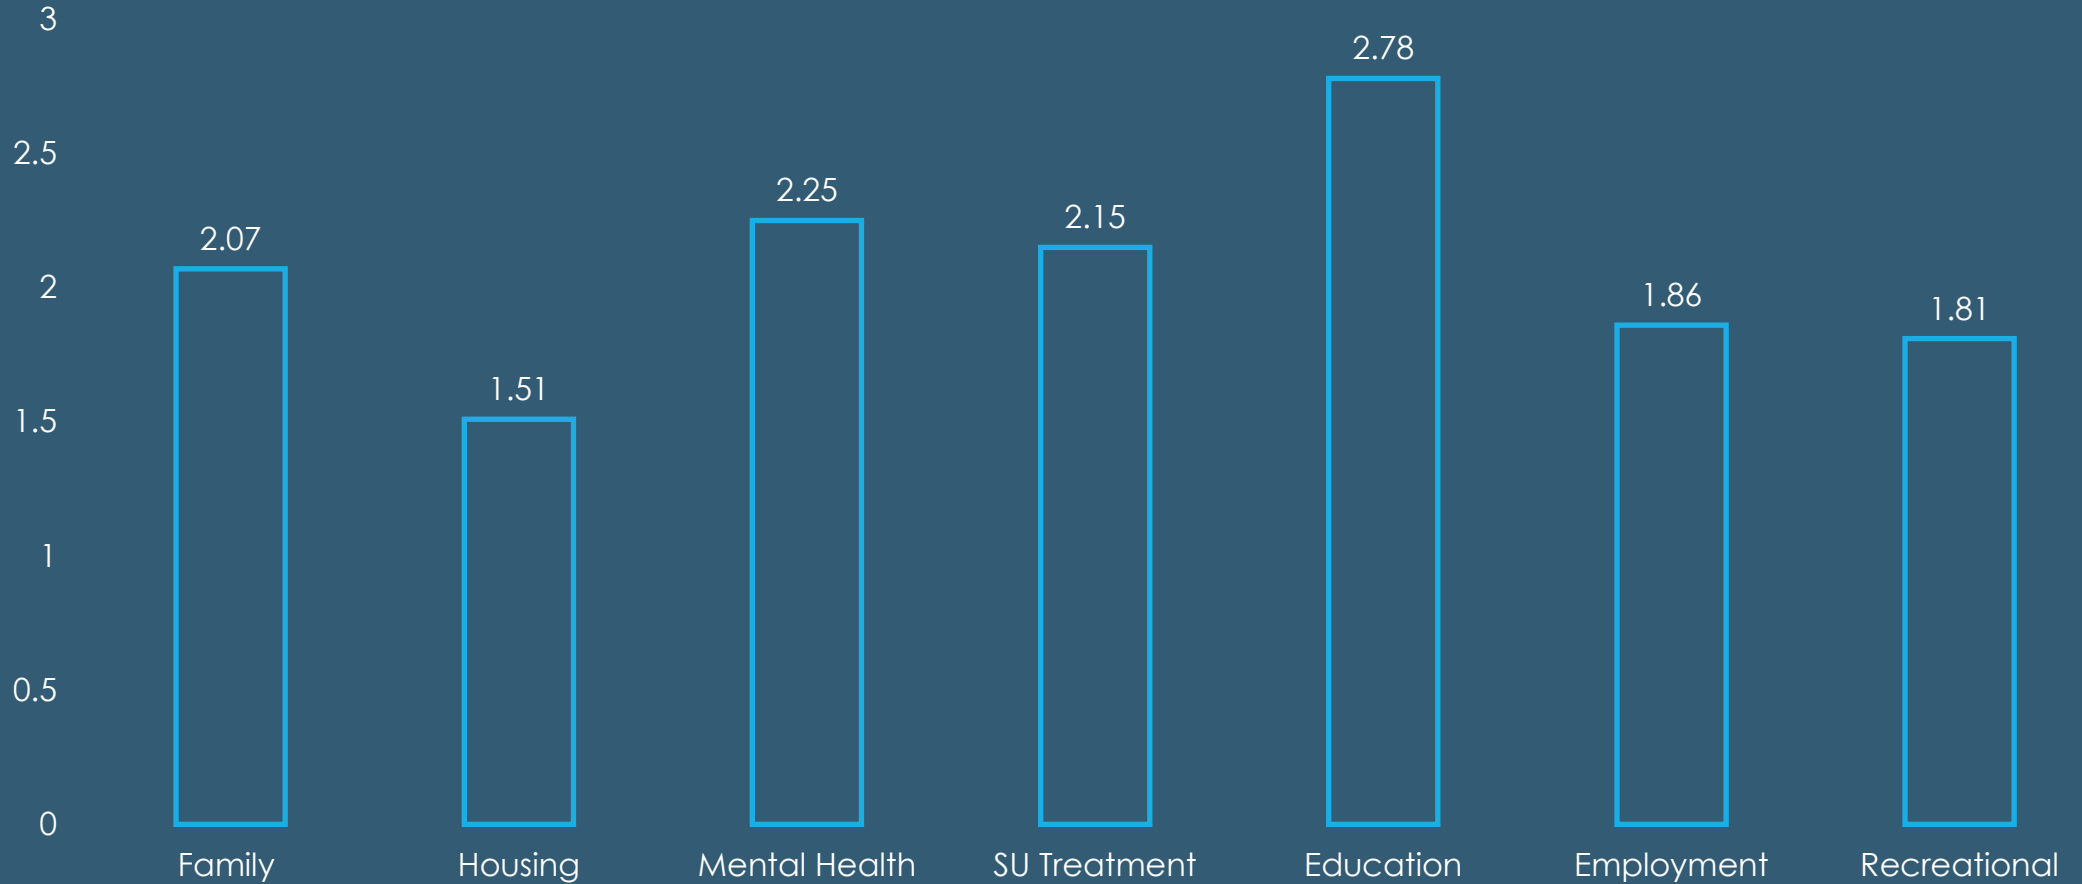

Respondents felt **MOST** competent addressing EDUCATIONAL needs.

Respondents felt **LEAST** confident addressing HOUSING needs.

Respondents felt EDUCATIONAL services were **MOST** available.

AVAILABILITY

Respondents felt HOUSING services were **LEAST** available.

ACCESSABILITY

Respondents felt EDUCATIONAL services were **MOST** accessible.

Respondents felt HOUSING services were **LEAST** accessible.

Differences by Rurality

In areas of

family engagement, housing support,
mental health, recreational services

Rural counties ranked the availability and accessibility lower than urban and/or rural/mixed counties.

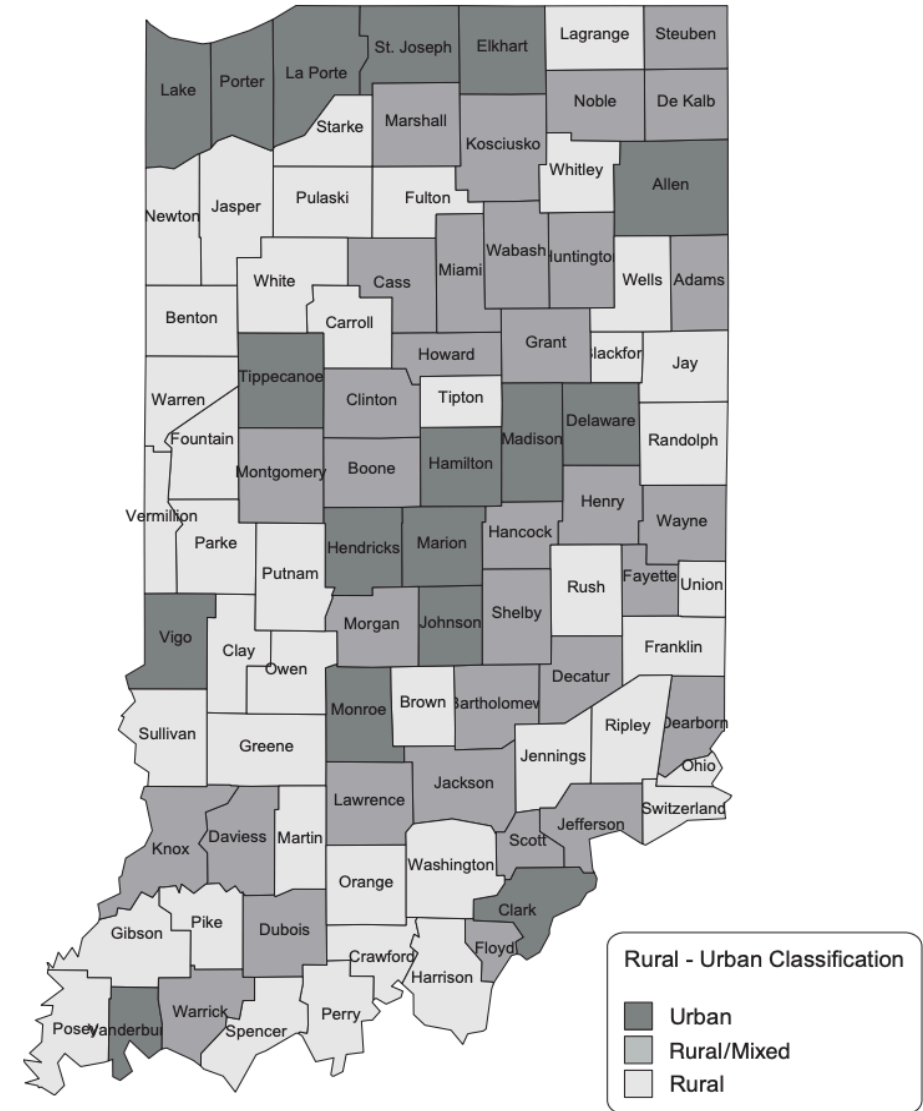

Figure 1. Indiana County Groupings

<https://pcrd.purdue.edu/ruralindianastats/geographic-classifications.php#table1>

Results Indicate Widespread Difficulties

- Educational services are most competently addressed and believed to be widely available and accessible.
- Housing and living arrangements upon reentry were considered the most challenging to address.

Availability of Services are a Primary Concern

- Compared to other areas of competence and accessibility, respondents rated the AVAILABILITY of services lowest.
- Difficulties with availability and accessibility are exacerbated in rural communities.

RECOMMENDATIONS

Recommendations

- Extend the CISC recommendation for county provided/contracted services to support reintegration from DOC to any child who has been removed from the home for a period of x days or more.
- Recommend that counsel appointed for the child remain on the case until the child is completely discharged from juvenile court jurisdiction.
- Recommend the development of probation guidelines for reintegration services designed to prevent unnecessary risk of reoffending/violating of supervision that accompanies reintegration services.

Recommendations, cont'd

- Recommend that the community-based grant funding opportunities include reintegration supports include assistance with housing, income acquisition, and necessary skills acquisition (this may require access to social workers/case managers during reintegration).
- Communicate these recommendations with the Juvenile Justice Oversight Body (yet to be formed)

Cross-Systems youth and juvenile justice taskforce: Reintegration subcommittee

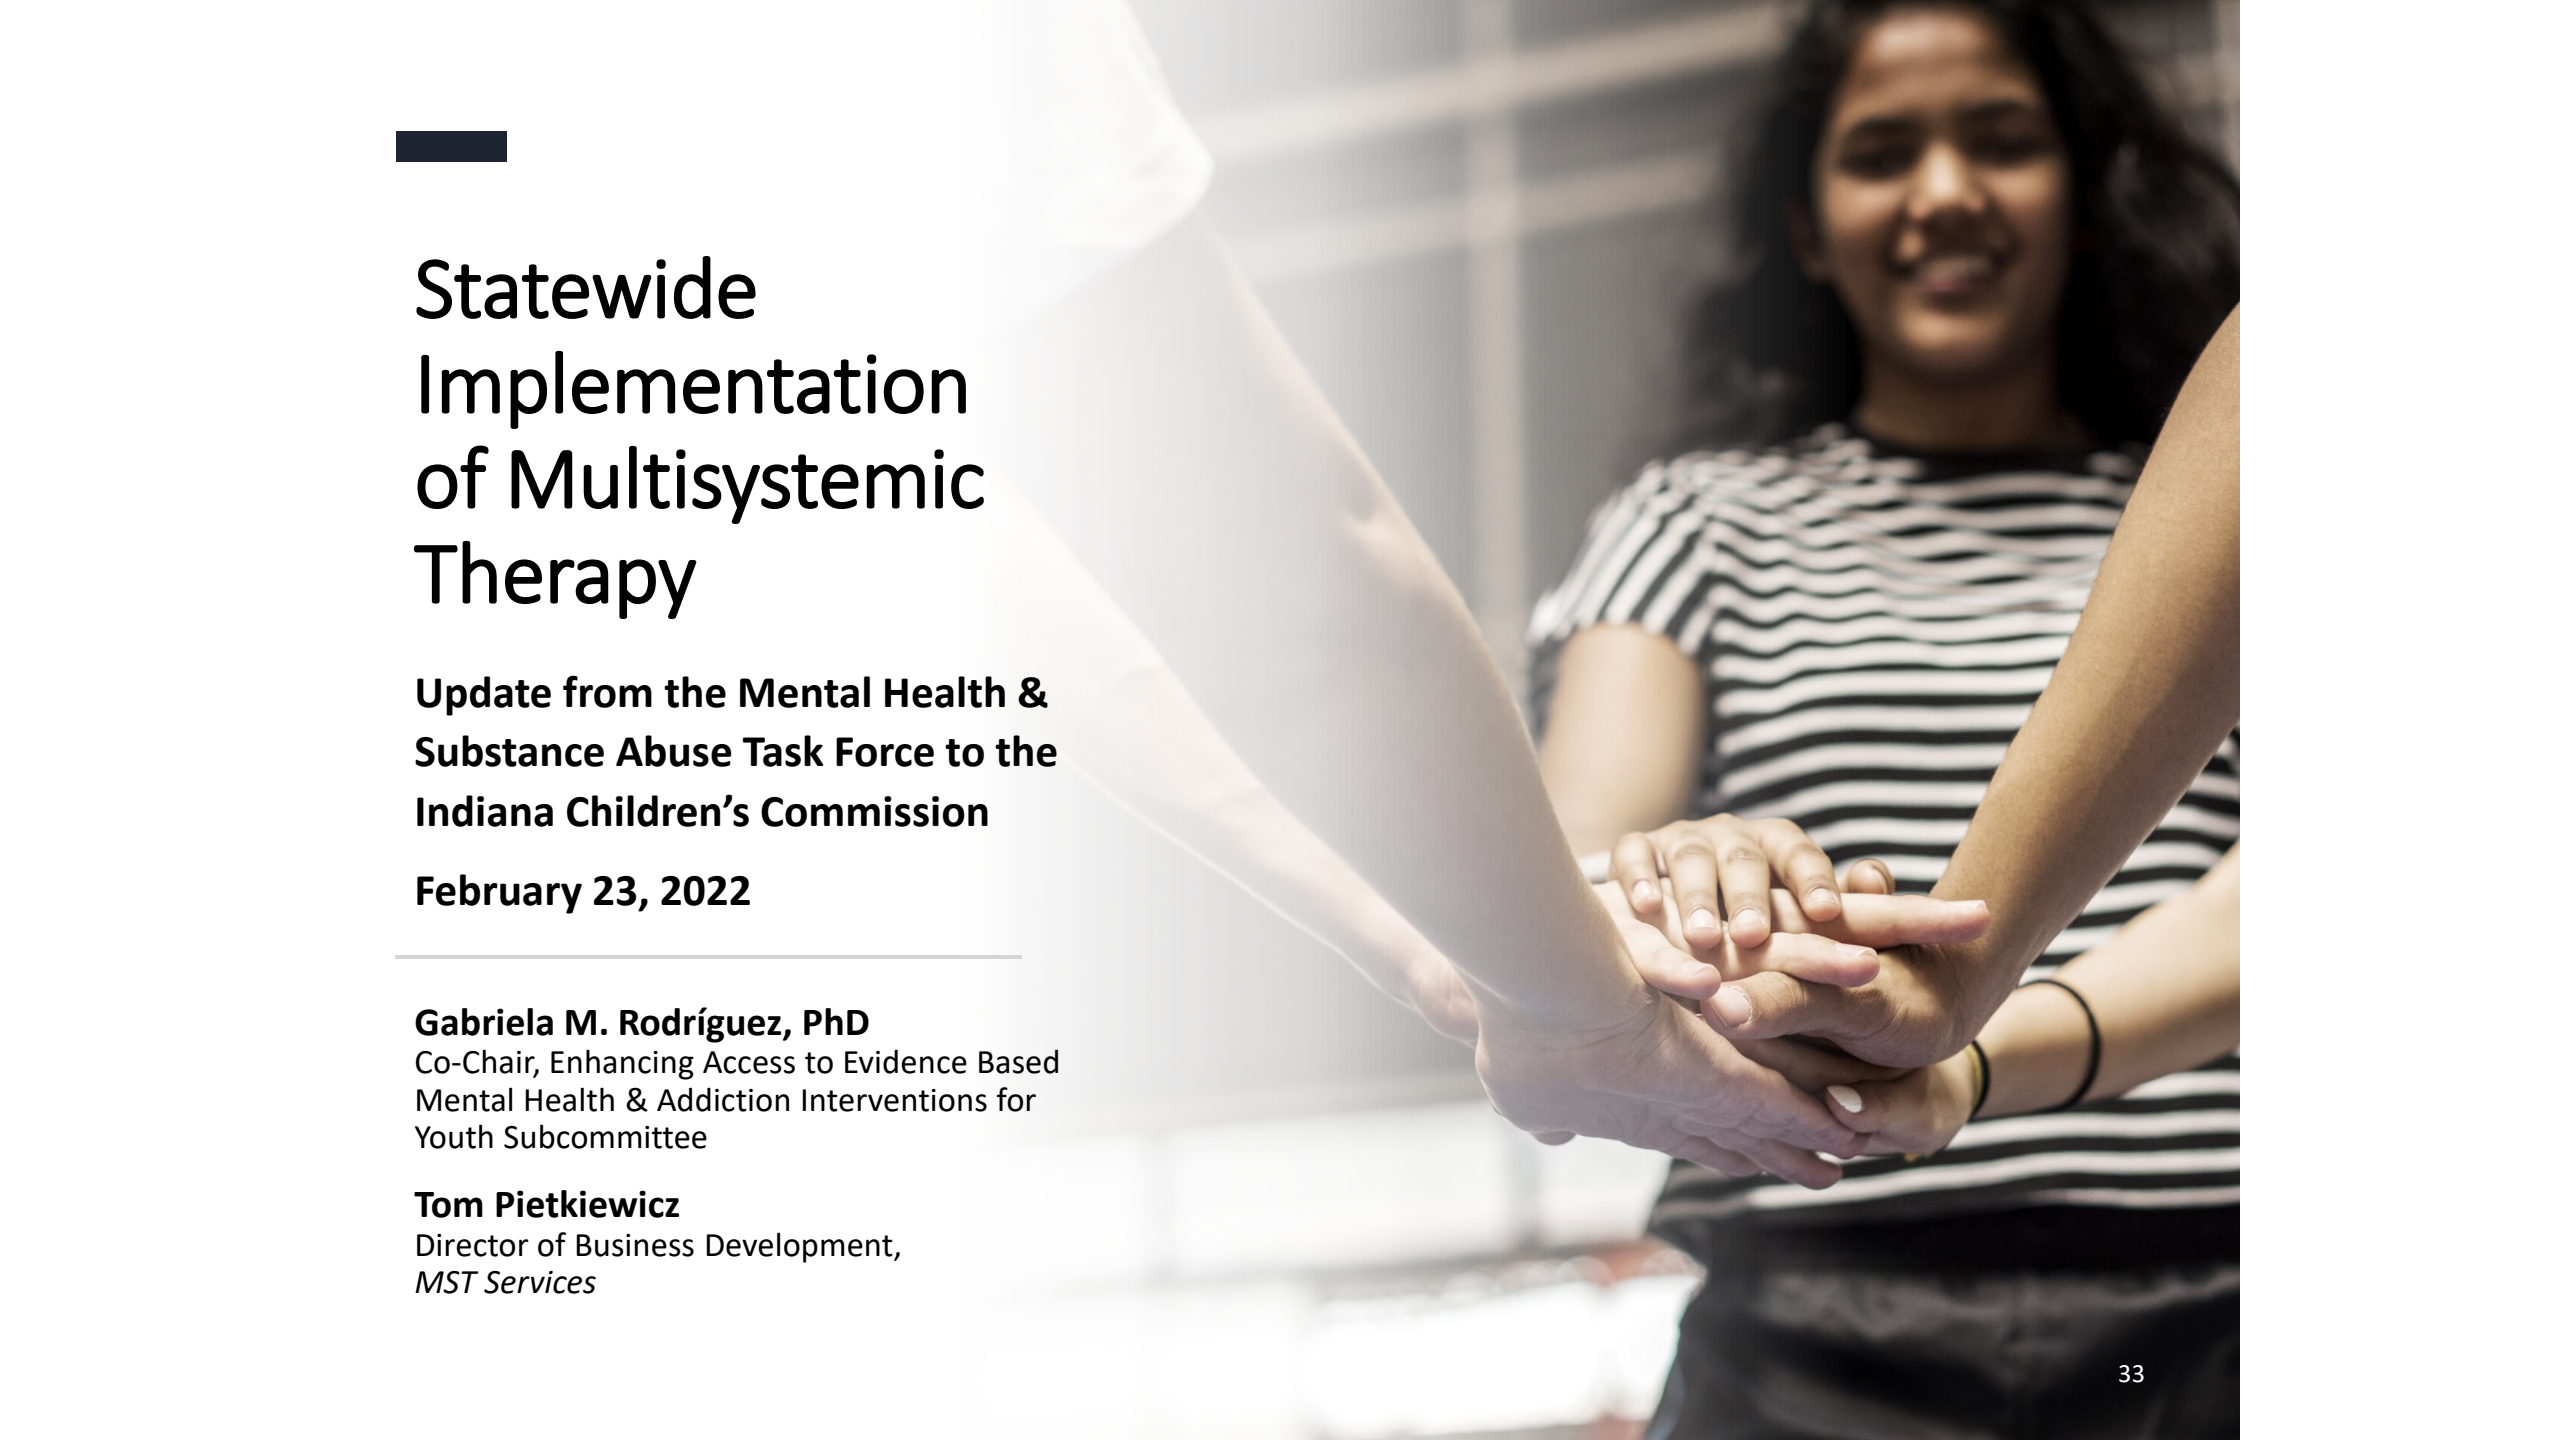

- Co-Chairs: Terrie Decker (DOC, DYS Exec. Dir.) and Joel C. Wieneke (IPDC Staff Attorney)
- Members: Dr. Matt Aalsma; Mag. Robert Vann (Lake Co.); Jessica Stevens (DCS); David Dickerson (YOC); Tyler Mason (JDAI/Ind. Court Serv's); Nicholas Cox (Marion Co. Juv. Prob.); Jill Johnson (MCPD, Juv. Div.);
- Data Advisor: Casey Pederson, PhD, IUSM, Dept. of Pediatrics and Adolescent Behavioral Health Research Program

7. Q + A

Background

Mental Health & Substance Abuse Task Force

- Enhancing Access to Evidence Based Mental Health & Addiction Interventions for Youth Subcommittee
 - Established in 2019
- Co-Chairs:
 - Richard Ty Rowlison, PhD, HSPP, Choices Coordinated Care Solutions
 - Marc Kniola, Indiana Department of Correction (past Co-Chair)

Unmet Needs

Major gap for youth with severe conduct problems

- Outpatient services not enough, but ineligible for inpatient services
- Not involved with DCS, JJ

10% of Indiana youth have a behavioral/conduct problem

Conduct Disorder is 33rd most costly diagnosis

- Annual Medicaid claims \$14M+

MST[®]
Services

What is MST?

Multisystemic Therapy (MST)

An Effective Alternative to Incarceration

MST Therapists work in the home, school and community and are on-call 24/7 to provide caregivers with the tools they need to transform the lives of troubled youth.

MST is the **only intervention for high-risk youth** where results have been repeatedly replicated by independent research teams

At the close of treatment (data for over 13,800 youth served in 2018)...

Source: The Journal of Consulting and Clinical Psychology

Targeted Population

- Youth between 12-18 years of age at risk of severe system consequence due to serious externalizing behaviors

Example Behaviors	Examples of System Consequences
<ul style="list-style-type: none">- Theft and other criminal behaviors- Aggressive/violent/assaultive behavior- Substance abuse- Selling substances- Chronic school absences and/or problem behaviors at school- Sexual offenses in conjunction with other anti-social behavior	<ul style="list-style-type: none">- Out-of-home placement (e.g. via juvenile justice, mental health, youth care, or social care)- Violation of probation- School expulsion- Child Welfare involvement

- Financial Savings
 - New Mexico MST Outcomes Tracking Project
 - Evaluated state tracking data for 6,158 youth who completed MST from 2005-2019
 - Found that for every \$1 spent, \$1.34 was recovered in reduced Medicaid behavioral health claims within 2 years after youth completion of MST treatment
 - Additional \$4.54 savings per \$1 spent in reduced crime rate expenses
- Benefits to caregiver and siblings

Next Steps

Subcontract with up to 8 providers

Providers required to hire at
least 1 full team

1 supervisor

2-4 full-time therapists

Ongoing supervision & consultation to support fidelity

Funding sustainability plan

Prevention Framework and Toolkit Final Products and Implementation

TRANSFORM
— CONSULTING GROUP —

Strategic Framework for the Prevention of Child Abuse and Neglect

Our Partners

Background

- 2018: The Child Abuse Prevention Sub-Committee of the Commission on Improving the Status of Children identified the need for a statewide child abuse prevention framework.
- 2019: The Commission voted to approve the recommendation. The Indiana Department of Child Services (DCS) agreed to fund the development of the framework and this accompanying toolkit.
- 2019-2022: Create Statewide Advisory Team, conducted research and analysis, and created ***Indiana's Framework for Prevention of Child Abuse and Neglect***.

Process for Framework Development

Purpose

The purpose of Indiana's *Supportive Communities, Resilient Families, Thriving Children* framework is to create a statewide approach to achieve the vision that:

All children thrive in safe, stable, nurturing, and supportive families and communities that foster resilience and well-being.

The framework provides a road map for the state and local communities to better support, empower, and protect families. It is centered on **primary prevention** efforts, or services and interventions available to the general population, to prevent child maltreatment before it happens.

Goals

- Increase the effectiveness, alignment, and coordination of existing child maltreatment prevention efforts
- Identify new opportunities to support the resilience and wellbeing of vulnerable children and families to decrease the incidence of child maltreatment in Indiana

Deliverables

- Statewide framework that includes an agreed-upon *vision statement*, as well as *guiding principles, outcomes, indicators, and actionable strategies*.
- Toolkit that local communities can use to *innovate* and *customize* their efforts to prevent child maltreatment and build resiliency of families.

Framework and Toolkit

TRANSFORM
— CONSULTING GROUP —

SUPPORTIVE COMMUNITIES, RESILIENT FAMILIES, THRIVING CHILDREN

Indiana's Framework
for the Prevention of
Child Abuse & Neglect

Vision

All children thrive in safe, stable, nurturing, and supportive families and communities that foster resilience and well-being.

Principles

PROMOTING EQUITABLE SERVICE PROVISION AND ACCESS FOR ALL FAMILIES

- An effective prevention effort strives to ensure that all families have equal access to services, resources, and opportunity.
- An effective prevention effort works toward equitable access to services, with specific focus on removing barriers for disenfranchised populations (LGBTQ+, racial minorities, children with special health needs, etc.).
- An effective prevention effort addresses systemic issues, such as poverty, racism, and barriers to social mobility.
- An effective prevention effort actively works to remove barriers to equitable access and includes assistance with service navigation.
- An effective prevention effort includes efforts to destigmatize services.

CENTERING FAMILY AND YOUTH VOICE

- An effective prevention effort actively engages and collaborates with families and youth.
- An effective prevention effort includes an intentional focus on building relationships and trust with families.
- An effective prevention effort identifies and builds on family strengths and emphasizes protective factors.

DRIVING POLICY, DATA, AND FUNDING INTEGRATION

- An effective prevention effort includes efforts to drive policy, data, and funding integration across agencies and organizations.

- An effective prevention effort involves intentional collaboration between partners and agencies with the goal of increasing success and alignment.
- An effective prevention effort includes the standardization of data collection and reporting.

STRENGTHENING THE COMMUNITY CULTURE AROUND FAMILY SUPPORT

- An effective prevention effort increases workforce knowledge and skills.
- An effective prevention effort equips the workforce to recognize and build on family strengths and protective factors.
- An effective prevention effort prepares the workforce to provide services and resources in an equitable and accessible manner.
- An effective prevention effort looks beyond formal relationships and supports and establishes community support systems by engaging the community at large.

INCENTIVIZING CONTINUOUS QUALITY IMPROVEMENT AND INNOVATION

- An effective prevention effort studies what contributes to successful implementation and uses timely data to adjust practice.
- An effective prevention effort identifies areas for improvement and implements change in a consistent way.
- An effective prevention effort looks for opportunities to innovate and reform by studying emerging and best practices.

SUPPORTIVE COMMUNITIES RESILIENT FAMILIES THRIVING CHILDREN

Indiana's Framework
for the Prevention of
Child Abuse & Neglect

COMMUNITY
IMPLEMENTATION
TOOLKIT

Dissemination Plan

Communication Goals

- 1. Promote Framework.** *Indiana's Framework for the Prevention of Child Abuse and Neglect* is available!
- 2. Build Awareness.** Share how to implement the framework to prevent child abuse and neglect in individual communities and resources available to support children and families.
- 3. Make the Case.** Share the data for *why* this framework is needed.

Strategies

1. The Indiana Department of Child Services will publish the toolkit on the DCS website. <https://www.in.gov/dcs/prevention/>
2. Partners can link to this location.
3. The Statewide Advisory Committee will share and/or present the toolkit with their network.
4. We will use standard channels (website, local media, social media, email blasts, etc) to deliver the framework to key partners across the state.
5. Joint press release in April – Prevent Child Abuse Awareness month
6. Presentation at Institute for Strengthening Families

Implementation Plan

Implementation Plans

- Funding available to support pilot communities
- Prevent Child Abuse Indiana to lead effort
- Technical assistance to pilot communities to support implementation of framework/ toolkit

Request

1. Share the framework and toolkit across your networks.
2. Identify strategies/areas that align with your plans to support implementation.
3. Identify and use funding to support implementation.

Implementation References

- Fiscal support for community implementation
 - [Colorado](#) provided funding
- Awareness and Public Relations campaign statewide for prevention services
 - Arizona's campaign "[Lean on Me AZ](#)" is an example
