

Comprehensive Annual Financial Report
For Fiscal Year Ended June 30, 2003

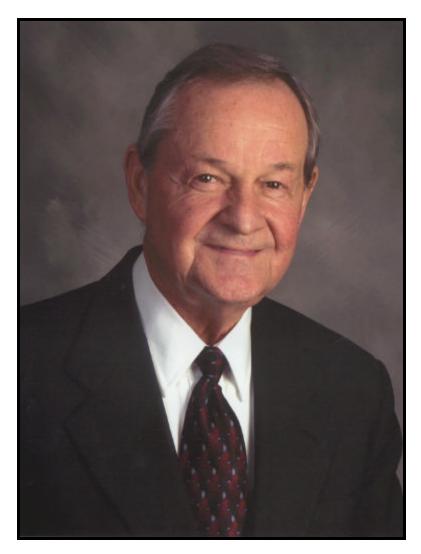

Frank O'Bannon, Governor

Prepared by the Office of **Indiana Auditor of State**

Connie K. Nass

Room 240 State House 200 West Washington St. Indianapolis, IN 46204

Governor Frank O'Bannon 1930-2003

Let us never forget that our shared values
—and our love of Indiana—
unite us as Hoosiers. And let us always
remember that what unites is stronger than
our differences, as we work
—together—
to make our state the best place on earth to
live, work and raise our family.

(Excerpt from the Governor's 1997 State of the State Address.)

STATE OF INDIANA

Comprehensive Annual Financial Report For the Fiscal Year Ended June 30, 2003

Frank O'Bannon, Governor

Prepared by:

The Office of the Auditor of State

Connie K. Nass

Auditor of State

INTRODUCTORY SECTION

Old Indiana Statehouse in Corydon

ORIGINS OF STATEHOOD

When the U.S. Congress officially proclaimed Indiana's statehood in 1816, a modest building in the city of Corydon served as the first capitol. By 1825, the seat of state government had been moved to Indianapolis, where a new capitol building was constructed within ten years. After several decades of housing offices for the governor and legislature, the original statehouse began to literally crumble to the ground. In 1878, work began on the current capitol building. Several Indiana resources were used during its construction, including native limestone, marble and wood. Labor came from local metalworkers, plasterers and decorative artists. Ten years later — the same year Indianapolis attorney Benjamin Harrison was elected President of the United States — the building was complete. Today, our statehouse has been entirely refurbished to its original luster and serves as anchor for a 49.5-acre governmental complex.

December 30, 2003

Governor. Members of the General Assembly, Citizens of the State of Indiana:

We are proud to present the Comprehensive Annual Financial Report (CAFR) for the State of Indiana's fiscal year ended June 30, 2003.

This Comprehensive Annual Financial Report has been prepared in conformity with Generally Accepted Accounting Principles (GAAP) as prescribed in pronouncements by the Governmental Accounting Standards Board. While management remains primarily and ultimately responsible for the contents and presentation of this report, responsibility for both the accuracy of the data presented and completeness and fairness of the presentation rests with the State agencies that provide the data and are obligated to verify postings. We believe the information set forth in this report is accurate in all aspects and is presented in a manner designed to set forth the financial position and results of operations of the State as measured by the financial activity of its various funds.

State statute requires an annual audit by the Indiana State Board of Accounts. The Board is considered by federal and State government to be independent auditors. The Auditor's report on the financial statements is included in the financial section of the Statewide Single Audit Report of the State of Indiana.

The State is responsible for ensuring that an adequate internal control structure is in place to provide reasonable, but not absolute, assurance regarding: (1) the safeguarding of assets against loss from unauthorized user disposition and (2) the reliability of financial records for preparing financial statements and maintaining accountability for assets. The concept of reasonable assurance recognizes that the cost of internal control should not exceed the benefits likely to be derived and that the evaluation of costs and benefits requires management to make estimates and judgments.

This internal control structure is subject to periodic evaluation by management and internal audit staff of the various State agencies. As part of the Single Audit, tests are made to determine the adequacy of the internal control structure, including that portion related to federal financial assistance programs, as well as to determine that the State of Indiana has complied with applicable laws and regulations.

Last year, the State adopted GASB Statement No. 34 as required by Generally Accepted Accounting Principles. GASB 34 provides for two types of statements, government-wide and fund statements. The government-wide statements are very similar to the private sector's statements, using the full accrual basis of accounting and the economic resources measurement focus. The governmental funds financial statements use the modified accrual basis of accounting and the current financial resources measurement focus. In the government-wide statements, infrastructure (roads, bridges, dams) has been capitalized. Capital assets, except for infrastructure using the modified approach, are depreciated like the private sector.

GASB Statement No. 34 provides for the presentation of Management's Discussion and Analysis (MD&A) in the Financial Section. The MD&A introduces the basic financial statements and provides an analytical overview of the government's financial activities. It is presented before the basic financial statements. We encourage you to read it to get an in-depth analysis of the State of Indiana's finances.

This CAFR is presented in three sections: Introductory, Financial, and Statistical.

The Introductory Section includes this transmittal letter, a list of former Auditors of State, the Table of Contents, the Certificate of Achievement for Excellence in Financial Reporting Award, the State Organizational Chart, and a listing of Selected State Officials.

The Financial Section includes the independent auditor's report, Management's Discussion and Analysis, the basic financial statements, required supplementary information, and other supplementary information.

The financial statements include government-wide and fund financial statements, representing all funds for which the State of Indiana is accountable, based on criteria for defining the financial reporting entity prescribed by the Governmental Accounting Standards Board. The criteria for inclusion are based on fiscal dependency, financial accountability, selection of governing authority, and ability to significantly influence operations. Based on these criteria, the various funds and entities shown in this report are considered as part of the reporting entity.

The Statistical Section includes selected financial and demographic information, generally presented on a multi-year basis.

Profile of the Government

Located in America's heartland in the Midwest, Indiana is a leading manufacturing State and a major agricultural producer. The latest U.S. Census Bureau estimate places Indiana's population at 6,159,068, which makes Indiana the nation's 14th largest State. The State is 64 percent urban and 36 percent rural. The five largest cities are Indianapolis, the capital, Fort Wayne, Evansville, South Bend and Gary.

Indiana became the 19th State of the Union on December 11, 1816. The constitution establishes the government in three separate departments: legislative, executive including administrative, and judicial. The legislative power of the State is vested in the Indiana General Assembly, which consists of a 100 member House of Representatives and a 50 member Senate. The Indiana General Assembly has the power to enact laws which are not prohibited by the State constitution and not in conflict with Federal laws and powers. The executive power of the State is vested with the Governor. The State constitution and legislation establish the following statewide elected administrative officials: Lieutenant Governor, Auditor of State, Secretary of State, Treasurer of State, Attorney General, Superintendent of Public Instruction, and Clerk of the Courts. The judicial power of the State is vested in one Supreme Court consisting of five justices, one Court of Appeals consisting of 15 judges, 92 Circuit Courts, and one Tax Court.

The State government provides a wide range of services to the citizens of Indiana, including education, transportation, public health, public safety, welfare, and conservation, culture and economic development.

This report includes the financial activities and balances of the State of Indiana and its component units. The component units are legal separate entities for which the State of Indiana has financial responsibility and include State funded colleges and universities, and other legally separate entities that provide services and benefits to local governments and the citizens of the State of Indiana. More information on the financial reporting entity can be found in Note I(A) in the notes to the financial statements.

The Indiana General Assembly meets every other year to adopt a biennial budget, which is submitted by the Governor. The General Assembly enacts the budget through passage of specific appropriations, the sum of which may not exceed estimated funding sources. Budgetary control is exercised in that agencies of the State may only expend appropriations as allotted by the Budget Agency or other statutory authority. The State Board of Finance, which consists of the Governor, Auditor of State, and Treasurer of State, is empowered to transfer appropriations from one fund of the State to another, with the exception of trust funds. The State Budget Agency may transfer, assign and reassign appropriations made for one specific purpose to another use or purpose within the same agency.

Factors Affecting Financial Condition

The information presented in the financial statements is better understood within the context of the specific environment within which the State of Indiana operates. The following describes that environment.

Local Economy

Over the last decade, Indiana's economy has grown in size and diversity. With an estimated 2001 Gross State Product of more than \$189.9 billion, Indiana's economy ranks as the 16th largest in the country in terms of the value of goods and services produced. The State ranks in the top five nationally for producing items as diverse as pharmaceuticals, surgical supplies, aircraft engines and parts, compact discs, musical instruments, truck and bus bodies, electronic resistors and steel.

From 1990 to 2002, Indiana has seen its distribution of personal income shift dramatically among various industries. In 1990, the manufacturing sector was the largest contributor to Indiana personal income, contributing 32% of the total; in 2002, that contribution fell to 25%. In 1990, the services sector was the second largest contributor to Indiana personal income, contributing 20% of the total; in 2002, the services sector is the largest contributor to Indiana personal income, contributing 28% of the total. Other notables are the trade and government sectors; each of those sectors has seen their contribution to Indiana personal income decrease from 1990 to 2002.

Not surprisingly, Indiana has seen a shift in the distribution of employment among sectors. From 1990 to 2002, Indiana has seen negative growth in manufacturing employment while services, trade, and construction employment have seen growth rates of 39%, 11%, and 23%, respectively.

In 2002, Indiana's per capita personal income reached \$28,240, increasing 2.6% over 2001. Over the past ten years, Indiana's personal income has grown at an average annual rate of 4.8%. From 1990 to 2000 Indiana's median household income has grown faster than the U.S., averaging an annual growth rate of 3.9% versus 3.1% for the U.S. In 2002, median household income was \$41,581 or 97% of the U.S. average, up from 90% in 1990. Indiana has the eleventh lowest poverty rate in the nation, with 8.7% of the state living below the poverty level in 2002.

Cash Management and Investments

Cash temporarily idle during the year was invested in money market accounts, certificates of deposit, obligations of the U.S. Treasury, and repurchase agreements. The pension trust funds' portfolios include other investments as outlined in Note I(D)(1) in the notes to the financial statements. The average yield on investments, except for the pension trust funds, was 1.91%. The State's investment policy is to minimize credit and market risks while maintaining sufficient liquidity and earning a competitive yield on its portfolio. Deposits are insured by federal and state depository insurance.

Debt Administration

The commissions and authorities, some of which are included as component units in the financial reporting entity of the State of Indiana, issue bonds for some of the State's capital needs. All of the bond issues are revenue bonds associated with specific State component units. The total of long-term revenue bonds and notes outstanding, net of amortized discounts, is \$8.03 billion at June 30, 2003.

Risk Management

The State of Indiana assumes the cost of the risks associated with Unemployment Compensation Benefit Claims for State employees, Workers' Compensation Benefit Claims for State employees, Tort claims filed against the State, Medical Malpractice claims filed against State hospitals, accidents caused by State motor vehicles, and on State owned real property, including public buildings. The State administers self-insurance funds for certain employee health benefits, disability and death benefits.

Pension Benefits

The State of Indiana sponsors eight public employee retirement systems (PERS). One of these, the State Police Pension Fund, is part of the primary government. The Public Employees' Retirement Fund and the State Teachers' Retirement Fund are discretely presented component units. In addition to its own fund, the board of the Public Employees' Retirement Fund administers the following funds: the 1977 Police Officer and Firefighters' Pension and Disability Fund, the Excise Police and Conservation Enforcement Officers' Retirement Fund, the Prosecuting Attorneys' Retirement Fund, the Legislators' Retirement System, and the Judges' Retirement Fund.

Major Initiatives

K-12 Education – Indiana, through the Education Roundtable, continues its efforts to develop and implement rigorous standards in math, language arts, science and social studies. Consistent with the No Child Left Behind Act and Indiana's own P.L. 221-1999, ISTEP+ testing is now being

given in grades 3-10 in math and language arts. Science is being piloted now. Social Studies testing is scheduled to begin in the next couple of years. The General Assembly rewrote the school funding formula to include charter schools in the regular distribution of state money for all schools.

Public Health – Indiana's Chronic Disease Management Program won a National Vision Award from the Robert Wood Johnson Foundation's Office of Improving Chronic Illness Care. The Indiana Chronic Disease Management Program is a joint effort between the Family and Social Services Administration and the Indiana State Department of Health. The program allows nurse care managers to work directly with Medicaid participants to provide a personalized plan to help them improve their health.

Public Health – The Indiana Dawn Project was recognized by the President's New Freedom Commission on Mental Health as one of the best programs in the nation. The Dawn project stresses intensive community-based care over in-patient hospital facilities.

Public Health – The U.S. Department of Health and Human Services awarded Indiana a \$500,000 federal grant award to increase awareness of programs such as Indiana's M.E.D. Works, designed to allow working individuals with incomes too high for regular Medicaid to be eligible for health coverage.

Public Health – For the second year in a row the Division of Family and Children at the Family and Social Services Administration received a TANF high performance bonus award for helping TANF recipients find and keep jobs. The award totaled \$9.1 million.

Public Health – The American Council for an Energy-Efficient Economy has presented Indiana an Exemplary Award for its Refrigerator Replacement Program. The Council found Indiana among the nation's leaders in helping low-income families save thousands of dollars in energy costs.

Public Health – The President's New Freedom Initiative awarded Indiana a \$500,000 grant to enhance community-based services for senior citizens and people with disabilities. The Family and Social Services Administration will use the grant to provide quality improvement and oversight to people receiving services on Medicaid waivers administered by the Bureau of Aging and In-Home Services.

Public Health – Once again, Indiana's Healthy Families program has been honored by Prevent Child Abuse/Healthy Families America as one of the top two states with a multi-site prevention program for child abuse and neglect. Indiana serves 56 Healthy Family sites throughout the State providing early intervention to mostly low income, at risk families.

Higher Education – Indiana has concentrated part of its efforts on improving and enriching the Indiana economy through higher education. A new program was initiated to provide additional funding to research institutions that are able to increase their research grants, infusing money and jobs into the economy. Indiana also provided targeted appropriations to all state supported colleges and universities designed to stimulate the economy, including funding for programs in Informatics, Biomedical Engineering, Digital Communications and Nursing. State aid for students attending public and private colleges and universities is increased 14% in fiscal year (FY) 04 and an additional 12% in FY 05.

Awards and Acknowledgements

Certificate of Achievement Award

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Indiana for its comprehensive annual financial report for the fiscal year ended June 30, 2002. This was the tenth consecutive year that the State of Indiana has achieved this prestigious award.

In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgments

We acknowledge the cooperation and assistance of all State agencies in the preparation of this report.

Sincerely,

Connie K. Nass **Auditor of State**

INDEPENDENT AUDITOR'S REPORT

TO: The Honorable Joseph E. Kernan
The Members of the General Assembly, and
The Citizens of the State of Indiana

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Indiana, as of and for the year ended June 30, 2003, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the State of Indiana's management. Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of certain component units of the State, as discussed in Note I(A), which represent 10.4% and .6% of the assets and revenues of the governmental activities, 71.1% and 58.8% of the business-type activities and 100% of the assets and revenues of the governmental and proprietary discretely presented component units. The financial statements of these component units were audited by other auditors whose reports thereon have been furnished to us, and our opinions, insofar as they relate to those units, are based upon the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinions.

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Indiana as of June 30, 2003 and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note IV(G) to the financial statements, the State of Indiana has restated certain beginning fund balances and net assets. The Housing Finance Authority, a discretely presented component unit, reports on a December 31, 2002 year-end.

The Management Discussion and Analysis, schedule of funding progress for employee retirement systems and plans and budgetary comparison information as listed in the table of contents are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State of Indiana's basic financial statements. The introductory section, combining and individual nonmajor and discretely presented component unit fund information, and statistical tables are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining and individual nonmajor and discretely presented component unit financial statements have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects, in relation to the basic financial statements taken as a whole. The introductory section and statistical tables have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

State Board of accounts

December 29, 2003

MANAGEMENT'S DISCUSSION AND ANALYSIS

STATE OF INDIANA Management's Discussion and Analysis June 30, 2003

The following discussion and analysis of the State of Indiana's financial performance provides an overview of the State's financial activities for the fiscal year ended June 30, 2003. Please read it in conjunction with the transmittal letter at the front of this report and the State's financial statements, which follow this section.

Financial Highlights

- For FY 2003, on a government-wide basis, the assets of the State of Indiana exceeded its liabilities by \$14.5 billion. This compares with \$14.7 billion for FY 2002, as restated. Of this amount, \$3.0 billion may be used to meet the government's ongoing obligations to citizens and creditors
- At the end of the current fiscal year, unreserved fund balance for the general fund was \$871.1 million, or 11.6% of the total general fund expenditures.
- On a government-wide basis for the primary government, the State incurred expenses net of program revenue of \$11.9 billion, which are partially offset by general revenues and transfers of \$11.7 billion, giving a decrease in net assets of \$202.1 million. The financial position of the State has deteriorated as can be seen in this decrease in net assets. This compares with a decrease in net assets of \$907.1 million for FY 2002.
- Indiana continues to feel the effects of the economic recession. While the unemployment rate dropped from 5.1% to 4.7% in FY 2003, there have been increases in personal bankruptcies and increases in the number of citizens on

- welfare for the State over the course of FY 2003. Per the American Bankruptcy Institute, for FY 2003, the State ranks sixth worst in number of households in personal bankruptcy filings. During calendar year (CY) 2002, the State had an 11.4% rise in personal bankruptcy filings, compared to a 7.2% increase nationally. In 2002, Indiana experienced the largest percentage increase (20%) in the number of people on welfare, compared to a 2.2% decrease nationwide, according to a study by the Center for Law and Social Policy.
- General revenue for the primary government increased by \$1.25 billion, or 12.0%, from FY 2002. The revenue increased because the budget bill passed during the General Assembly's special session, which was signed into law on July 1, 2002, increased the sales tax from 5% to 6% effective December 1, 2002, increased riverboat gaming, cigarette, and gasoline taxes, and reduced property taxes and corporate income taxes.
- The State of Indiana is rated AA+ by Standard & Poor's (on a scale where AAA is the best). As of November 4, 2003, 20% of the states were rated AAA, 20% were rated AA+, and 28% were rated AA. Standard & Poor's changed the outlook for the State to negative as of January 18, 2002, which means that the rating may be lowered. Each bond issue of the State's component units is rated separately by Moody's. 21 of the 30 bond issues are rated Aaa (on a scale where Aaa is the best), with the outlook for the State revised to negative as of November 15, 2003.

2003	35,753	899	1,039	1,217	38,908

For information on State employees by agency, please see pages 188-189 in the Statistical Section.

Overview of the Financial Statements

This Financial Section consists of four parts: management's discussion and analysis (this part), the basic financial statements, required supplementary information, and other supplementary information. The basic financial statements include two kinds of statements that present different views of the State. The first two statements are government-wide financial statements that provide both long-term and short-term information about the State's overall financial status.

The remaining statements are fund financial statements that focus on individual parts of the State government, reporting the State's operations in more detail than the government-wide statements.

- The governmental fund statements tell how general government services such as public safety, education, and welfare were financed in the short term as well as what remains for future spending.
- Proprietary fund statements offer short and longterm financial information about the activities the government operates like businesses, such as the State Lottery Commission and the Indiana Transportation Finance Authority's Toll Roads.
- Fiduciary fund statements provide information about the financial relationships in which the State acts solely as a trustee or agent for the benefit of others, to whom the resources in question belong, such as the retirement plan for the State's employees.

The financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The statements are followed by a section of *required supplementary* *information* and *other supplementary information* that further explain and support the information in the financial statements.

Government-wide Financial Statements

The government-wide financial statements report information about the State as a whole using accounting methods similar to those used by private-sector companies. The statement of net assets includes all the government's assets and liabilities. All of the current year's revenues and expenses are accounted for in the statement of activities regardless of when cash is received or paid.

The two government-wide statements report the State's net assets and how they have changed. Net assets, the difference between the State's assets and liabilities, is one way to measure the State's financial health, or position. Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position of the State of Indiana is improving or deteriorating. To assess the overall health of the State, additional non-financial factors should be considered, such as changes in the State's tax base, the condition of the State's roads and the State's student population. The government-wide financial statements of the State are divided into three categories:

 Governmental activities. Most of the State's basic services are included here, such as the State's roads and bridges, and health and environmental programs. State sales and income taxes and federal grants finance most of these activities.

- Business-type activities. The State provides goods and services through these activities that are financed or recovered primarily through fees and user charges. The Hoosier Lottery and the East-West Toll Road are included here.
- Discretely Presented Component Units. These are legally separate discretely presented entities for which the State is financially accountable. These include, among others, the Indiana Bond Bank, the Board for Depositories, the Indiana Housing Finance Authority, and colleges and universities that receive state funding.

Fund Financial Statements

The fund financial statements provide more detailed information about the State's most significant funds, not the State as a whole. Funds are accounting devices that the State uses to keep track of specific sources of funding and spending for particular purposes. The State of Indiana uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

The State has three kinds of funds: governmental funds, proprietary funds, and fiduciary funds.

1. Governmental funds. Most of the State's basic services are included in governmental funds, which focus on (1) cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the governmental funds statements provide a detailed short-term view that helps the reader determine whether there are more or fewer financial resources that can be spent in the near future to finance the State's programs.

Relationship and Reconciliation. Because the information provided in the governmental funds statements does not encompass the additional long-term focus of the government-wide statements, reconciliation pages are provided. On the page following each governmental fund's financial statement, these reconciliations explain the differences between the government-wide and the fund financial statement. Government-wide statements use full accrual accounting. Revenues are recognized when they are earned and expenses are recognized as soon as the liability is incurred, regardless of the timing of related cash inflows and outflows. Governmental fund financial statements use the modified accrual basis of accounting. Revenues are recognized when earned so long as they are collectible within the current period or soon enough afterwards to pay liabilities of the current period. Debt service payments and a number of specific accrued liabilities are recognized as expenditures when payment is due because that is when they are normally liquidated with expendable available financial resources.

Noncurrent assets such as infrastructure, land, and property, plant and equipment appear on the government-wide statements but not on the governmental fund statements where they are expensed as acquired rather than capitalized. Noncurrent liabilities such as revenue bonds payable and net pension obligations also appear on the government-wide statements but not on the fund statements. Internal service funds are included as part of the governmental activities in the government-wide statements but not the governmental fund financial statements because they provide services to the governmental funds.

- 2. Proprietary funds. Services for which the State charges customers a fee are generally reported in proprietary funds. These funds use the economic resources measurement focus and the accrual basis of accounting. Proprietary funds, like the government-wide statements, provide both long-term and short-term financial information. In fact the State's enterprise funds (one type of proprietary fund) are the same as its business-type activities, but provide more detail and additional information such as cash flows. The State uses internal service funds (the other type of proprietary fund) to report activities that provide supplies and services for the State's other programs and activities. An example would be the State Office Building Commission.
- 3. Fiduciary funds. The State is the trustee, or fiduciary, for its employees' pension plans. It is also responsible for other assets that, because of a trust arrangement, can be used only for the trust beneficiaries. The State is responsible for ensuring that the assets reported in these funds are used for their intended purposes. Fiduciary funds use the economic resources measurement focus and the accrual basis of accounting. All of the State's fiduciary activities are reported in a separate statement of fiduciary net assets and a statement of changes in fiduciary net assets. These activities are excluded from the State's government-wide financial statements because the State cannot use these assets to finance its operations.

Financial Analysis of the State As a Whole

Net Assets

The following is condensed from the Statement of Net Assets:

State of Indiana Condensed Schedule of Net Assets (in millions of dollars)								
			Primary G	overnment				
		mental vities		ess-type vities	Total Primary	/ Government		
	2003	2002	2003	2002	2003	2002

Current liabilities Long-term liabilities Total liabilities	3,972.8 1,763.6 5,736.4	3,479.7 1,842.1 5,321.8	167.8 1,544.8 1,712.6	161.6 1,289.7 1,451.3	4,140.6 3,308.4 7,449.0	3,641.3 3,131.8 6,773.1		
Net assets: Invested in capital assets, net of related debt Restricted Unrestricted Total net assets	9,664.9 534.1 2,456.3 \$ 12,655.3	8,683.3 666.4 2,970.9 \$ 12,320.6	36.9 1,218.2 590.4 \$ 1,845.5	19.8 2,054.3 21.4 \$ 2,095.5	9,701.8 1,752.3 3,046.7 \$ 14,500.8	8,703.1 2,720.7 2,992.3 \$ 14,416.1		

At the end of the current fiscal year, unrestricted net assets for governmental activities were \$2.5 billion, or 12.8% of the total governmental activities' expenses, as compared to \$3.0 billion, or 16.2%, for FY 2002. Unrestricted net assets were 36.1% of expenses for business-type activities, as compared to 1.4% in FY 2002.

The State maintains a Counter-Cyclical Revenue and Economic Stabilization Fund ("Rainy Day Fund"). This fund was established to assist in stabilizing revenue of the State's general fund during periods of economic recession. The fund had total assets of \$248.1 million or 10.1% of the total governmental activities' unrestricted net assets.

Changes in Net Assets

Governmental Activities

Expenses exceeded program revenues by \$11.3 billion. General revenues and transfers were \$11.4 billion, leaving an increase in net assets of \$89.0 million, which is 0.5% of total revenues. During the fiscal year the State received \$148 million from Tobacco Settlement Master Agreement, which

represents 0.8% of total revenues. Transfers of \$108.7 million, or 0.6% of total revenues, were received from the State Lottery Commission. Without these two revenue sources, the state would have had a decrease in net assets of \$168 million, which is 0.9% of total revenues.

Tax revenues for governmental activities were broken down as follows:

Tax Revenues - Governmental Activities

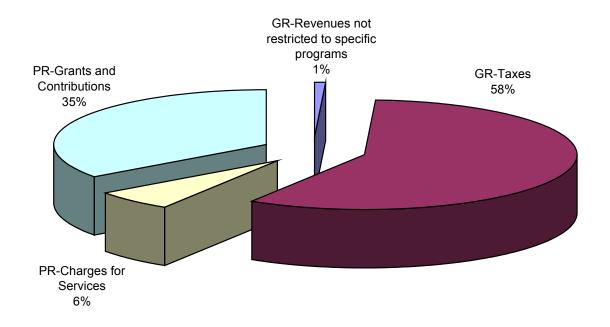

Tax revenues of \$11.1 billion represent 57.9% of total revenues for governmental activities. Income tax dropped from 43% of tax revenues in FY 2002 to 39% in FY 2003 due to the increase in sales tax and cigarette tax, which increased from 37% to 38% and from 5% to 8%, respectively. Program revenues accounted for \$7.9 billion or 41% of total revenues,

which decreased from 43% of total revenues in FY 2002. Revenues not restricted to specific programs were \$172 million or 0.9% of total revenues. Of this \$172 million, \$60.3 million was investment earnings, which decreased from \$124.5 million in FY 2002 due to historically low interest rates.

Total revenues for governmental activities were broken down as follows:

Revenues to Support Governmental Activities

PR = program revenues GR = general revenues

Total revenues were 99.9% of expenses, as compared to 95.3% in FY 2002. The difference was partially covered by transfers from business-type activities, primarily the Indiana State Lottery Commission.

The largest portion of the State's expenses is Health and Welfare, which is \$6.9 billion, or 35.7% of total expenses. This compares with \$6.7 billion, or 36.7% of total expenses in FY 2002. 66% is funded through operating grants, with the majority of the remainder funded from general revenues. \$4.1 billion was spent for Medicaid assistance, as compared to \$3.8 billion in FY 2002.

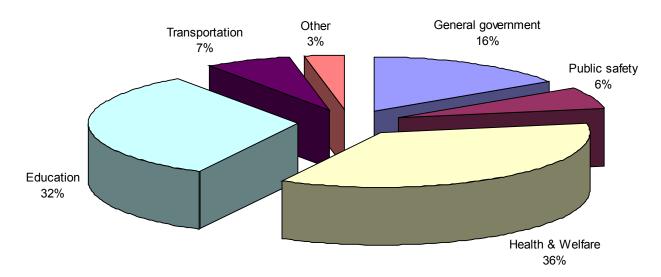

Education comprises 32.5%, or \$6.2 billion, of the State's expenses. In FY 2002, Education accounted for 31.1%, or \$5.7 billion, of expenses. All but \$607.7 million of this is funded from general revenues. The

expenses are composed of tuition support, transportation, and the ADA (average daily attendance) flat grant distribution. The National School Lunch Program is another area of expense, which is funded through program revenues.

\$3.0 billion, or 15.9% of expenses, was spent for General Government. General Government, which comprised \$3.1 billion (16.9%) of expenses in FY 2002, includes local distributions and money for state administration and those functions that serve the state as a whole. Examples of local distributions are the property tax replacement credit, which subsidizes local property tax collections, and the motor vehicle excise replacement credit, which subsidizes automobile license fees. Examples of state administration would be the executive branch of government, the state legislature, and the judiciary.

Total expenses for governmental activities were broken down as follows:

Expenses - Governmental Activities

Business-type Activities

Business-type activities represent 7.0% of the Primary Government's revenues and 7.9% of the expenses. The State Lottery Commission accounts for 63.8% of business-type activities' program revenues and 33.8% of expenses. Profits of the State Lottery Commission

help to fund the State's retirement plans, and, through the Build Indiana Fund, the motor vehicle excise tax credit, and capital projects for local governments. The Unemployment Compensation Fund's expenses make up 54.3% of business-type activities' expenses.

Net Cost of Primary Government (in millions of dollars)									
	June 30, 2003	June 30, 2002	% Change						
Governmental Activities:									
Education	5,636.0	5,184.7	8.7%						
General government	2,502.3	2,613.6	-4.3%						
Welfare	1,931.6	1,888.6	2.3%						
Public safety	425.9	487.3	-12.6%						
Transportation	378.0	352.7	7.2%						
Conservation, culture, and development	193.0	176.2	9.5%						
Health	140.0	168.0	-16.7%						
Other	80.9	87.8	-7.9%						
Business-type Activities:									
Unemployment Compensation Fund	717.0	547.5	31.0%						
Other	6.2	(1.8)	-438.8%						
State Revolving Fund	(16.8)	(97.2)	-82.8%						
State Lottery Commission	(112.2)	(105.2)	6.7%						
TOTAL	11,881.9	11,302.3	5.1%						

This schedule shows the net expense (revenue) attributable to each function of government. Each function of Indiana government is either self-supporting (a negative number) or requires additional general revenues to cover expenses (a positive number).

Financial Analysis of the State's Funds

The following is an analysis of the State's major governmental funds:

General Fund

The General Fund is maintained to account for resources obtained and used for those services traditionally provided by State government which are not required to be accounted for in another fund. The fund balance of the General Fund at June 30, 2003 was \$1.26 billion, which is 34.4% of assets. This compares to a fund balance at June 30, 2002 of \$1.08 billion, which was 35.3% of assets. This indicates that the State's financial position in the General Fund is better than the prior year by \$0.18 billion. The fund balance of \$1.26 billion is composed of reserves of \$387 million and unreserved of \$871 million. Major reserves are:

- Encumbrances of \$25 million, which is money set aside to pay for future obligations.
- Loans of \$54.1 million, which consists of \$37.1 million in loans to entities outside the primary government and \$17.0 million in interfund loans.
- Tuition support of \$305 million, which is money set aside for July distributions to schools.

The State calculates a cash basis surplus balance monthly. The year-end surplus balance is combined with estimated revenue forecasts to assess and determine the State's budget. This surplus balance is contained in the General Fund. As of June 30, 2003, the surplus balance was \$689.7 million. The balance increased 167.7 million over the June 30, 2002 balance of 522.0 million. This surplus balance is composed of:

- \$305.0 million tuition support, which is money set aside to pay for July distributions to schools.
- \$248.1 million rainy day fund, which is to assist in stabilizing revenue during periods of economic recession and is part of designated unreserved.
- \$136.6 million, which represents the excess of revenues over expenditures and accounts for the bulk of the increase over FY 2002.

The \$136.6 million is on a cash basis. Accrual adjustments of \$36.4 million reconcile this to the General Fund unreserved, undesignated fund balance on a GAAP basis of \$173.0 million. For more information on the cash basis surplus, see page 158 in the Statistical Section. The unreserved, undesignated fund balance of \$173.0 million plus the unreserved fund balance designated for

appropriations of \$290.0 million, plus the unreserved fund balance designated for allotments of \$408.1 million give the total unreserved fund balance of \$871.1 million. This ties to the Balance Sheet for the General Fund. For more information on designations of unreserved fund balance, see the chart at the bottom of page 62.

The General Fund's revenues increased 4.1%, or \$298.1 million, from FY 2002, primarily due to a 333% increase, or \$243.0 million, in cigarette tax revenue and a 956% increase, or \$106.4 million, in grant revenue, due to the Federal Jobs & Growth Tax Relief Reconciliation Act of 2003. Income tax revenue dropped by 1.9%, or \$82.1 million, in comparison with FY 2002. The General Fund's expenditures decreased 0.2%, or \$13.8 million, from FY 2002.

Motor Vehicle Highway Fund

The Motor Vehicle Highway Fund receives portions of gas and special fuel tax, motor vehicle registration fees, the motor carrier surtax, federal revenue, and other revenues. These are distributed to cities and towns, counties and the State Department of Transportation and are used to help fund the State Police, the Bureau of Motor Vehicles, the Department of Revenue and others. The fund collected \$463 million in taxes, \$56.1 million in International Registration Plan (IRP) fees from motor carriers, \$15 million in federal grants, and \$12 million in other fees. The fund received \$246 million in transfers in, which are taxes collected in other funds. These figures are virtually unchanged from FY 2002. The fund distributed \$290 million to local units of government, \$191 million for public safety, and transferred \$315 million to other funds, which include the Department of Transportation and the General Fund. These amounts compare to FY 2002 distributions of \$276 million to local units of government, \$172 million for public safety, and transfers of \$411 million to other funds.

Medicaid Assistance Fund

Medicaid is an insurance program for low-income and needy people. It is jointly funded by the Federal government and the State. The Medicaid Assistance Fund received \$2.6 billion in Federal revenue and used \$1.5 billion in State revenue. The Fund distributed \$4.1 billion in Medicaid assistance. This compares to \$2.5 billion in Federal revenue, \$1.9 billion in State revenue, and \$3.8 billion distributed in FY 2002.

Build Indiana Fund

The Build Indiana Fund receives revenues from the Hoosier Lottery through the State Lottery Commission, Riverboat Wagering Tax through the Indiana Gaming Commission, Horse Racing Parimutuel Wagering Tax through the Indiana Horse Racing Commission, and Charity Gaming Excise Tax through the Department of Revenue. The revenues are used to help fund Motor Vehicle Excise Tax Replacement, capital projects for local units of government, and State projects such as the 21st Century Research and Technology Fund, the Indiana Technology Fund and other education technology grants.

The Build Indiana Fund received \$250.0 million in gaming revenue which was transferred in from other funds. The revenue decreased from \$437.3 million in FY 2002 because the General Assembly capped Build Indiana Fund revenue. Of this amount, \$108.7 million came from the State Lottery Commission. The fund received \$132.0 million in transfers from the Property Tax Replacement Fund to cover a cash deficit in the The Fund distributed \$29.0 million for the Higher Education Technology Fund, \$9.5 million for the Digital Television Conversion Project, \$4.1 million for the 21st Century Research and Technology Fund. \$3.8 million for capital projects for local units of government and \$6.7 million for other technology and local grants. The Fund also earned \$0.9 million in investment earnings and \$0.5 million from securities lending transactions. Transfers out of the Fund included \$236.2 million to the Motor Vehicle Excise Replacement account in the General Fund and \$175 million to the Property Tax Replacement Fund.

State Highway Department Fund

The State Highway Department Fund was created to fund the construction, reconstruction, operation, maintenance, and control of state highways and tollways. The fund collected \$706 million in grants and received \$456 million in transfers in, which are taxes collected in other funds, compared with \$551.3 million and \$547 million in FY 2002, respectively. The fund expended \$1,197 million during the year, compared with \$987 million in FY 2002.

Property Tax Replacement Fund

The Property Tax Replacement Fund collects sales and corporate income taxes that are dedicated to tuition support and to property tax replacement

distribution to local units of government. This is to relieve the property tax burden for the citizens of Indiana who own property. In FY 2003, the fund collected \$2,020 million in sales and corporate income taxes, as compared to \$1,477 million in FY2002. The fund received a transfer in of \$430.9 million from the State Gaming Fund. The General Assembly enacted legislation that directs surplus lottery revenues greater than \$250 million to the Property Tax Replacement Fund, rather than the Build Indiana Fund. The fund also received transfers in of \$203.8 million for individual income tax, \$58.8 million for corporate income tax, and \$19.3 million for sales tax collected in the General Fund and \$175 million from the Build Indiana Fund. \$1.4 billion was distributed to local units of government for property tax relief.

Payments of property tax replacement and homestead tax credits to counties were shifted from May 2003 to July 2003 by legislation passed by the General Assembly, which left excess money in the Property Tax Replacement Fund. Any excess in the fund is transferred to the General Fund. For the year ended June 30, 2003, \$158.0 million was transferred to the General Fund. In addition, transfers out include \$1.5 billion to the General Fund for tuition support and \$136.2 million to the Build Indiana Fund.

Tobacco Settlement Fund

The Tobacco Settlement Fund is used to receive and distribute revenue received from the Tobacco Settlement Agreement entered into on November 23, 1998, by the State and leading United States tobacco product manufacturers. During fiscal year 2003, the State collected \$148.0 million from tobacco product manufacturers. The State expended \$25.7 million for tobacco education, prevention, and use control, \$16.9 million to fund operating and capital expenses associated with community health centers, \$6.5 million for the Hoosier Rx Prescription Drug program, and \$3.0 million for the Indiana Local Health Department Trust Account. Net transfers out of the Fund include \$33.6 million for the Children's Health Insurance Program (CHIP), \$30.3 million to the General Fund per an order of the State Board of Finance, \$24.3 million for Residential Services, and \$7.9 million for various health-related programs, including \$4.0 million for Aging and Community Services, \$2.0 million for Developmentally Disabled Services, \$1.4 million for Local Maintenance, and \$0.5 million for Newborn Screening. The State earned \$1.1 million in investments of this money.

General Fund Budgetary Highlights

An economic downturn that began in Indiana in 2000 affected the State's General Fund. Because of a continuing decline in revenue, a special session of the General Assembly was convened in May, 2002. During that session, the governor and Legislature succeeded in passing a major tax restructuring plan, saving taxpayers from significant increases in their property taxes by raising the homestead and renters' exemptions. This restructuring was necessitated by a court ordered change in the assessment. The 2002 legislation increased the sales tax by 1 percent, the cigarette tax by 40 cents per pack and the gas tax by 3 cents per gallon. Revenue was also enhanced through an increase in the tax imposed on riverboats. Owners of the riverboats, in turn, were granted their request that dockside gambling be allowed. Actual revenue collections for fiscal year 2003 were 4.5% over the revised revenue forecast of April, 2003.

In all, a total of \$1.5 billion in taxes (\$800 million alone from the sales tax increase) was raised, and over \$1 billion of that was earmarked for property tax relief. The state's increase in the homestead exemption could not totally offset the tax implications of a court order mandating that property assessments be based on market value. In response, lawmakers reduced schools' reliance on local property taxes. With the restructuring, 67 percent of the property taxes levied for a school general fund will be paid through a state property tax replacement credit. This will result in the

state being responsible for 85% of the funding of the school general fund.

Even with the tax restructuring, a series of spending reductions, transfers, and reallocations of other revenues were used to offset the reduced revenues in the General Fund. The following summarizes the differences between the original and final budget amounts for fiscal year 2003:

- Agencies controlled spending to create budgetary savings of \$323.4 million.
- Delays in payments of local school aid and higher education created a savings of \$20.0 million.
- Transfers of certain restricted funds were made to the General Fund in the amount of \$123.0 million.
- The Lottery and Gaming Surplus Account in the Build Indiana Fund transferred \$175.0 million to the Property Tax Replacement Fund
- The Federal Jobs & Growth Tax Relief Reconciliation Act of 2003 provided \$103.4 million of General Fund revenues.

Spending during state fiscal year 2004 will be carefully monitored and other measures will be used, if necessary, to maintain an acceptable General Fund balance.

Capital Asset and Debt Administration

Capital Assets

Capital assets were \$10.7 billion, which was 48.7% of total assets for the primary government. Related debt was \$1.0 billion. Total capital assets net of related

debt for the primary government was \$9.7 billion. The ratio of capital assets to related debt was 1,087%.

The following table shows the percentage change from fiscal year 2002 to fiscal year 2003.

State of Indiana Capital Assets (in millions of dollars)							_,,
	Governmental Activities		Business-type Activities		Total Primary Government		Total % Change
	2003	2002	2003	2002	2003	2002	
Land	\$ 1,111.7	\$ 1,058.8	\$ 28.2	\$ 30.7	\$ 1,139.9	\$ 1,089.5	4.6%
Infrastructure	7,480.9	7,473.1	180.3	180.4	7,661.2	7,653.5	0.1%
Construction in Progress	303.1	192.7	6.6	0.5	309.7	193.2	60.3%
Property, plant and equipment	2,435.2	2,292.7	124.1	117.7	2,559.3	2,410.4	6.2%
Less accumulated depreciation	(901.3)	(836.3)	(83.5	(80.2)	(984.8)	(916.5)	7.5%
Total	\$ 10,429.6	\$ 10,181.0	\$ 255.7	\$ 249.1	\$ 10,685.3	\$ 10,430.1	2.4%

Overall capital assets increased by 2.4% from 2002 to 2003. Construction in Progress increased by 60.3% due to increased spending. Property, plant, and equipment increased 6.18%, or \$148.9 million. \$100.0

million of the increase is due to a prior period adjustment. More detailed information about the State's capital assets is presented in Note IV(D) to the financial statements.

Long-term Obligations

Major long-term obligations items are included in the following table. These major items comprised 100%

of total long-term liabilities and 44.4% of total liabilities.

The following table shows the percentage change from fiscal year 2002 to fiscal year 2003.

					erm L	ndiana Liabilitio of dolla							Total

Total	\$ 1,7	763.6	\$1	,842.1	\$1 ,	544.8	\$1 ,	289.7	\$3	,308.4	\$3	,131.8	5.6%

Accrued liability for compensated absences is an estimate of the State's liability for vacation and personal leave time not taken by State employees and accrued at June 30, 2003. This total liability decreased by 7.7% from FY 2002 to FY 2003. This was offset, however, by the \$4.4 million long-term accrual in salaries, health, and disability benefits payable, for the State Incentive Retirement Plan (SIRP). Another \$4.4 million was accrued as a current liability for SIRP payments made in July, 2003.

The amount due to component units is money due to the Indiana Bond Bank from the State Revolving Fund. The Indiana Bond Bank is a separate body corporate and politic from the State and is reported as a discretely presented component unit. The State Revolving Fund is administered by the State Budget Agency and the Indiana Department of Environmental Management, which are agencies of the State. Proceeds from State revolving bonds issued by the Indiana Bond Bank are used by the State Revolving

Infrastructure

As required by GASB Statement No. 34, the State has capitalized its infrastructure. This amounts to \$7.5 billion in roads and bridges using the modified approach, \$904 million in right of way classified as

Fund to assist qualified entities in obtaining below market financing for water pollution control projects.

The repayment of these loans is used by the State Revolving Fund to repay the Indiana Bond Bank, which makes the bond payments. The 4.8% increase is attributable to \$141.8 million Series 2002A & 2002B bonds issued by the Indiana Bond Bank on behalf of the State Revolving Fund.

Of the \$2.1 billion in revenue bonds/notes payable, \$1.2 billion were issued by the Indiana Transportation Finance Authority, \$853 million by the Indiana State Office Building Commission, and \$26 million by the Recreational Development Commission. Revenue bonds/notes payable increased 5.9% over FY 2002, primarily due to the issuance of \$150.1 million in Highway Bond Anticipation Notes by the Indiana Transportation Finance Authority in June, 2003.

More detail about the State's debt is presented in note IV(F) of the notes to the financial statements.

land, and \$14 million in dams being depreciated. In order to utilize the modified approach, the State is required to:

Maintain an asset management system that

includes an up-to-date inventory of eligible infrastructure assets.

- Perform condition assessments of eligible assets and summarize the results using a measurement scale.
- Estimate each year the annual amount to maintain and preserve the assets at the condition level established and disclosed by the State.
- Document that the assets are being preserved approximately at or above the established condition level.

Under the modified approach, the State expenses certain maintenance and preservation costs and does not report depreciation expense. Assets accounted for under the modified approach include approximately 23,000 lane miles of roads and approximately 5,100 bridges that the State is responsible to maintain.

The State has consistently maintained the assessed conditions of roads over the past two years. It is the State's policy to maintain Interstate and National

Highway System (NHS) Non-Interstate roads at an average Pavement Quality Index (PQI) of 75 and Non-NHS roads at an average PQI of 65. The most recent condition assessment, completed for fiscal year 2003, indicated that the average PQI for roads exceeded the minimum acceptable standard.

The State has maintained the assessed conditions of bridges at levels which are above the established benchmarks. It is the State's policy to maintain Interstate bridges at an average sufficiency rating of 87%, NHS Non-Interstate bridges at an average sufficiency rating of 85%, and Non-NHS bridges at an average sufficiency rating of 83%. The most recent condition assessment, completed in August 2002, indicated that the average sufficiency rating for bridges exceeded the minimum acceptable standard.

Although the actual maintenance and preservation costs for NHS Non-Interstate roads and Interstate and NHS Non-Interstate bridges were lower than planned, this has not caused the condition level to fall below the State's policy.

Economic Factors

The economic forecast, upon which the state budget for fiscal years 2004 and 2005 was based, was updated in April 2003. At that time, real Gross Domestic Product (GDP) was projected to increase by 1.3% in the first quarter of calendar year (CY) 2003. Real GDP growth was projected to increase through the remainder of 2003 before stabilizing at 3.4%. On a state fiscal year basis, real GDP was projected to increase by 2.8% in FY 2004 and increase by 3.4% in FY 2005.

Growth was slightly stronger than expected in the first quarter of CY 2003, and as the effects of the federal economic stimulus package began to materialize, growth was significantly stronger than expected in the second and third quarters of CY 2003. Through the first three quarters of CY 2003, real GDP exceeded expectations and increased by 2.7% compared to the April forecast of 2.1%.

The April 2003 forecast projected the Indiana nonfarm personal income growth to gradually increase

through the fourth quarter of CY 2002 and the first quarter of CY 2003 before rapidly increasing in the second quarter of CY 2003. Through the remainder of CY 2003, CY 2004, and CY 2005, Indiana non-farm personal income was expected to continually grow, reaching 5.2% growth in the first quarter of CY 2005. On an annual basis, Indiana non-farm personal income growth was projected to increase by 4.6% in CY 2004 and by 5.0% in the first half of CY 2005.

Indiana non-farm personal income exceeded expectations in the fourth quarter of CY 2002 and was weaker than expected in the first and second quarters of CY 2003. Through the first half of CY 2003, Indiana non-farm personal income growth did not meet expectations and increased by 3.1% compared to the April forecast of 3.6%.

The April forecast projected baseline growth in General Fund and Property Tax Replacement Fund revenues of 3.1% in FY 2004 and 4.5% in FY 2005.

Contacting the Auditor of State

This financial report is designed to provide our citizens, taxpayers, customers, and investors and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. If you have questions about

this report or need additional financial information, contact the Auditor of State, 240 State House, 200 West Washington Street, Indianapolis, Indiana 46204-2793.

State of Indiana

Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities

For the Year Ended June 30, 2003

(amounts expressed in thousands)

Net change in fund balances-total governmental funds	\$ (33,055)
Amounts reported for governmental activities in the statement of activities are different because:	
Governmental funds report net capital outlays for infrastructure as expenditures. However in the statement of activities these outlays are capitalized and under the modified approach not depreciated. This is the amount of the net capital outlays for infrastructure under the modified approach in the current period	175,491
Governmental funds report net capital outlays as expenditures. However in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which depreciation (\$46,801) exceeds net capital outlays (\$5,520) in the current period.	(52,321)
Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.	106,542
Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds.	(100,678)
Internal service funds are used by management to charge the costs of certain activities, such as insurance, data processing, telecommunications, fleet management, and printing, to individual funds. The net revenue (expense) of certain internal service funds is reported with governmental activities.	(6,930)
Change in net assets of governmental activities.	\$ 89,049

STATE OF INDIANA Notes to the Financial Statements June 30, 2003

(schedule amounts are expressed in thousands)

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

As required by generally accepted accounting principles, these financial statements present the government (State of Indiana) and its component units. Blended component units, although legally separate entities, are in substance part of the government's operations; data from these units are combined with data of the primary government. Discretely presented component units are reported in one column in the government-wide financial statements. This column contains the governmental and proprietary fund types and colleges and universities. This is to emphasize that, as well as being legally separate from the government, they also provide services to and benefit local governments and/or the citizens of the State of Indiana. Of the component units, the Housing Finance Authority has a December 31, 2002, year-end.

Blended Component Units.

The following are blended component units of the State of Indiana. The primary government appoints a voting majority of their boards and is able to impose its will. Although they are legally separate from the State, the units are reported as if they were part of the State because they provide services entirely or almost entirely to the State. All of these component units are audited by auditors other than the State Board of Accounts.

The Indiana Transportation Finance Authority (ITFA) was established to include the construction, reconstruction and improvement of all toll roads, toll bridges, state highways, bridges, and streets and roads. The Authority was further authorized to finance improvements related to an airport or aviation-related property or facilities including the acquisition of real property. The Authority is reported in various proprietary funds.

The Recreational Development Commission was created to provide funds for projects involving the Department of Natural Resources' (DNR) properties. The five member commission includes the Treasurer of State, Director of DNR and three gubernatorial appointees. The Commission is reported as an internal service fund.

The State Lottery Commission of Indiana is composed of five members appointed by the Governor. Net proceeds from the Lottery are distributed to the State to be used to supplement teachers' retirement, pension relief, and the Build Indiana Fund. A portion of the Build Indiana Fund is then used to supplement Motor Vehicle Excise Tax Replacement. The Commission is reported as an enterprise fund.

The State Office Building Commission was created to issue revenue bond debt obligations to provide funds for financing the implementation of the Indiana Government Center Master Plan and to construct certain correctional facilities. The Commission is reported as an internal service fund.

Discretely Presented Component Units.

The following are discretely presented component units of the State of Indiana. The primary government appoints a voting majority of their boards and is able to impose its will. All governmental and proprietary component units are audited by outside auditors.

The Indiana Development Finance Authority (IDFA) provides job-creating industrial development projects with access to capital markets where adequate financing is otherwise unavailable. The Authority is governed by a board consisting of the Lieutenant Governor, the Treasurer of State, and seven members appointed by the Governor. The Authority is reported as a governmental fund.

The Indiana Secondary Market for Education Loans, Inc. (ISM) was formed at the request of the Governor to purchase education loans in the secondary market. The Governor appointed the original Board of Directors. ISM provides in its articles of incorporation that changes in the composition of its directors or in its bylaws are subject to the approval of the Governor. The unit is reported as a proprietary fund.

The Indiana Board for Depositories was established to ensure the safekeeping and prompt payment of all public funds deposited in Indiana banks. The Board, consisting of the Governor, Treasurer of State, Auditor of State, Chairman of the Commission for Financial Institutions. State Examiner of the State Board of

Accounts and four members appointed by the Governor, provides insurance on public funds in excess of the \$100,000 Federal Deposit Insurance Corporation limit. The unit is reported as a proprietary fund.

The Indiana Bond Bank, created in 1984, is controlled by a board composed of the Treasurer of State, Director of the Department of Financial Institutions and five appointees of the Governor. The Bond Bank issues debt obligations and invests the proceeds in various projects of state and local governments. The unit is reported as a proprietary fund.

The Indiana Housing Finance Authority was created in 1978 for the purpose of financing residential housing for persons and families of low and moderate incomes. The Authority's board consists of the Director of the Department of Financial Institutions, the Director of the Department of Commerce, the State Treasurer and four persons appointed by the Governor. By statute, the Lieutenant Governor is Director of the Indiana Department of Commerce. The unit is reported as a proprietary fund.

The Indiana Housing Finance Authority, the Indiana Bond Bank and the Indiana Development Finance Authority were determined to be significant for note disclosure purposes involving the discretely presented proprietary and governmental component units.

Effective July 1, 2000, the Public Employees Retirement Fund (PERF) became an independent body corporate and politic. PERF is not a department or agency for the State but is an independent instrumentality exercising essential government functions. The PERF board is composed of five trustees appointed by the Governor. The board of trustees administers the following funds: Public Employees Retirement Fund, Judges Retirement System, Excise Police and Conservation Enforcement Officers' Retirement Plan, the 1977 Police Officers' and Firefighters' Pension and Disability Fund, the Legislators' Retirement System Defined Benefit Plan, the Legislators' Retirement System Defined Contribution Plan, the Prosecuting Attorneys'

Retirement Fund, the Pension Relief Fund, and two death benefit funds. For more information on PERF see Note V(I) Employee Retirement Systems and Plans. All of these funds have been aggregated for presentation in the Discretely Presented Component Units' financial statements.

Effective July 1, 2000, the Teachers Retirement Fund (TRF) became an independent body corporate and politic. TRF is not a department or agency for the State but is an independent instrumentality exercising essential government functions. The TRF board is composed of five trustees appointed by the Governor. For more information on TRF see Note V(I) Employee Retirement Systems and Plans.

The Public Employees Retirement Fund and the Teachers Retirement Fund were determined to be significant for note disclosure purposes involving the discretely presented fiduciary component units.

Each of the seven colleges and universities included in this report was established by individual legislation to provide higher education opportunities to the citizens of Indiana. The authority to administer the operations of each institution is granted to a separate board of trustees for each of the seven institutions. The number and makeup of the board of trustees of each college and university is prescribed by legislation specific for that institution. Four universities have nine member boards; two have ten member boards; Indiana Vocational Technical College has a thirteenmember board of trustees. Appointments to the boards of trustees are made by the Governor and by election of the alumni of the respective universities.

Indiana University and Purdue University were determined to be significant for note disclosure purposes involving the colleges and universities.

The primary government's officials are also responsible for appointing the members of the boards of other organizations, but the primary government's accountability for these organizations does not extend beyond making the appointments. The primary government appoints the board members of the Health Facilities Financing Authority.

The financial statements of the individual component units may be obtained from their administrative offices as follows:

B. Government-Wide and Fund Financial Statements

The government-wide financial statements consist of a statement of net assets and a statement of activities. These statements report information about the overall government. They exclude information about fiduciary activities, including component units, which are fiduciary in nature, such as the public employee retirement systems. They distinguish between the primary government and its discretely presented component units as defined under the reporting entity above. They also distinguish between governmental activities and business-type activities of the State. Governmental activities rely on taxes and intergovernmental revenues for their support. Business-type activities, on the other hand, rely on fees and charges for services provided for their support.

The statement of activities matches the State's direct functional expense with the functional program revenue to identify the relative financial burden of each of the State's functions. This format identifies the extent to which each function of the government draws from the general revenues of the government self-financing or through fees and intergovernmental aid. Certain indirect costs are included in the program expense reported for individual functions of government. revenues derive directly from the program itself or from parties outside the State's taxpavers, as a whole. They reduce the net cost of the function to be financed from the general revenues. Program revenues include charges for services, programspecific operating grants and contributions, and program-specific capital grants and contributions. Revenues that do not meet the criteria of program revenues are general revenues. These include all taxes, even those levied for a specific purpose and are reported by type of tax. Investment income is also a general revenue.

Separate financial statements are presented for the State's governmental, proprietary and fiduciary funds. Governmental fund financial statements are the balance sheet and the statement of revenues, expenditures, and changes in fund balances. Major governmental funds are presented in separate columns and non-major funds are aggregated in a separate column. Proprietary and fiduciary funds are reported using the statement of net assets, and the statement of changes in net assets. In addition proprietary funds include a statement of cash flows.

C. Measurement Focus, Basis of Accounting and Financial Statement Presentation

Measurement Focus and Basis of Accounting.

The government-wide statements and the proprietary and fiduciary fund statements use the economic resources measurement focus and the accrual basis of accounting. Revenues, expenses, gains, losses, assets, and liabilities resulting from exchange and exchange-like transactions are recognized when the exchange takes place. Government-mandated nonexchange revenues and voluntary nonexchange revenues, including federal government mandates on the state, certain grants and entitlements, and most donations, are recognized in the period when all applicable eligibility requirements have been met.

For the government-wide financial statements and proprietary and fiduciary fund statements, the State applies all applicable FASB pronouncements issued

before December 1, 1989, and those issued after that date which do not contradict any previously issued GASB pronouncements.

Governmental funds are used to account for the government government's general activities. Governmental fund types use the flow of current financial resources measurement focus and the modified accrual basis of accounting. Under the modified accrual basis of accounting revenues are recognized when susceptible to accrual (i.e., when they are "measurable and available"). "Measurable" means the amount of the transaction can be determined and "available" means collectible within the current period or soon enough thereafter to pay liabilities of the current period. For the State of Indiana, "available" means collectible within one month of the fiscal year end. Expenditures are recorded when the related fund liability is incurred. except for unmatured interest on general long-term debt which is recognized when due, and certain compensated absences and related liabilities, and claims and judgments which are recognized when the obligations are expected to be liquidated with expendable available financial resources.

Individual and corporate income tax, sales tax, inheritance tax, cigarette tax, alcoholic beverage tax, motor fuel tax, fines, and penalties are accrued using one month's revenues.

Gaming taxes and fees and vehicle licenses are received daily via electronic funds transfer with a one working day delay, so the first working day in July revenues are reviewed for materiality and accrued accordingly.

Financial Statement Presentation A fund is an independent fiscal and accounting entity with a self-balancing set of accounts. Fund accounting segregates funds according to their intended purpose and is used to aid management in demonstrating compliance with finance-related legal and contractual provisions.

Governmental funds are used to account for the government's general government activities. Governmental funds include the general fund, special revenue funds, capital projects funds, debt service funds and permanent funds.

The General Fund is the State's primary operating fund. It is maintained to account for resources obtained and used for those services traditionally provided by State government, which are not required to be accounted for in another fund. The General Fund is a major fund.

The *special revenue* funds account for revenue sources that are legally restricted to expenditure for specific purposes except for major capital projects.

The following special revenue funds are presented as major.

- The Motor Vehicle Highway Fund collects motor fuel taxes, special fuel taxes, motor carrier surtaxes, vehicle license fees and uses them for public safety programs and distributions to local units of government for transportation programs.
- The Medicaid Assistance Fund receives federal grants and State appropriations which are used to administer the Medicaid program.
- The State Highway Department Fund receives federal grants and State appropriations that are used for State transportation programs.
- The Property Tax Replacement Fund receives corporate income tax and sales tax which is used for education and property tax replacement distributions to local units of government.
- The Tobacco Settlement Fund is used to account for funds received under the master tobacco settlement agreement and is used to fund the children's health insurance program.
- The Build Indiana Fund receives gaming revenues and uses them to fund local capital projects.

The *capital projects funds* account for the acquisition of fixed assets or construction of major capital projects not being financed by proprietary or fiduciary funds.

The *permanent funds* are used to account for resources that are legally restricted to the extent that only earnings and not principal may be used for the benefit of the government or its citizens. There are no major permanent funds.

Proprietary funds focus on the determination of operating income, changes in net assets, financial position and cash flows. Operating revenues and expenses are the revenues and expenses that pertain to the fund's principal operations. For the Unemployment Compensation Fund, operating revenues consist of grants and taxes. For the State Revolving Fund, grant revenue is considered operating revenue. Nonoperating revenues and expenses are those revenues resulting from secondary or auxiliary activities of the fund.

Nonoperating items include interest/investment revenue and expense. Proprietary funds include both enterprise funds and internal service funds.

Enterprise funds are used to account for those operations that are financed and operated in a manner similar to private business or where the board has decided that the determination of revenues earned, costs incurred and/or net income is necessary for management accountability.

The State reports the following major enterprise funds:

- The Toll Roads Fund under the Indiana Transportation Finance Authority, collects tolls that are used to make payments on revenue bonds used to finance the construction of the East-West Toll Road in northern Indiana.
- The ITFA Aviation Technology Bond Fund accounts for the financing of a portion of the costs of the Aviation Technology Center located at Indianapolis International Airport.
- The ITFA Airport Facilities Bond Fund accounts for the financing of improvements for the airport or aviation-related property or facilities, including the acquisition of real estate.
- The State Revolving Fund uses proceeds from bonds issued by the Indiana Bond Bank to assist qualified entities in obtaining below market financing for water pollution control projects.
- The Unemployment Compensation Fund collects employer taxes and the federal share of unemployment compensation. Benefits are paid to eligible individuals.
- The State Lottery Commission Fund collects lottery revenues that are distributed to the Pension Relief Fund, the Teachers Retirement Fund and the Build Indiana Fund.

Internal service funds account for operations that provide services to other departments or agencies of the government, or to other governments, on a cost-reimbursement basis. The services provided include fleet management, information technology and communication, printing, debt financing, and self-insurance. Major fund reporting requirements do not apply to internal service funds. Combined totals for all internal service funds are reported as a separate column on the face of the proprietary fund financial statements.

Fiduciary funds account for assets held by or on behalf of the government in a trustee capacity or as

an agent on behalf of others. They cannot be used to support the State's own programs. Fiduciary funds include pension (and other employee benefit) trust funds, private-purpose trust funds, and agency funds.

Pension (and other employee benefit) trust funds are used to report resources held in trust for the members and beneficiaries of defined benefit pension plans, defined contribution plans, and other postemployment benefit plans. Pension trust funds include the Deferred Compensation Plan Fund and the State Police Pension Fund.

Private-purpose trust funds are used to account for trust arrangements in which both the principal and interest may be spent for the benefit of individuals, private organizations or other governments. Private Purpose funds include the Property Custody Fund, the Abandoned Property Fund, the Unclaimed Funds Fund, and the Private Purpose Trust Fund.

Agency funds are custodial in nature and do not present results of operations or have a measurement focus. These funds are used to account for assets that the government holds for others in an agency capacity. Agency Funds include Employee Payroll Withholding and Benefits, Local Distributions, Child Support and Department of Insurance.

D. Assets, Liabilities and Equity

1. Deposits, Investments and Securities Lending

For purposes of reporting cash flows, cash and cash equivalents are defined as short-term, highly liquid investments that are both readily convertible to known amounts of cash and near their maturity (generally three months or less from the date of acquisition). Cash and cash equivalents are stated at cost, which approximates fair value.

Cash balances of most State funds are commingled in general checking accounts and several special purpose banking accounts. The available cash balance not necessary beyond immediate need is pooled and invested. Interest earned from investments purchased with pooled cash is deposited in the general fund, except as otherwise provided by statute.

Investments and secured lending transactions are stated at fair value. However, money market investments and participating interest-earning investment contracts that mature within one year of acquisition are reported at amortized cost, which approximates fair value. Fair value is determined by quoted market prices which approximate fair value.

Indiana Code 5-13-9 authorizes the Treasurer to invest in deposit accounts issued or offered by a designated depository; securities backed by the full faith and credit of the United States Treasury; and repurchase agreements that are fully collateralized, as determined by the current market value computed on the day the agreement is effective, by interest-bearing obligations that are issued, fully insured or guaranteed by the United States or any U.S. government agency.

The Treasurer of State is authorized by statute to accept as collateral safekeeping receipts for securities from: (1) a duly designated depository or (2) a financial institution located either in or out of Indiana, having physical custody of securities, with a combined capital and surplus of at least \$10 million, according to the last statement of condition filed by the financial institution with its governmental supervisory body. The Treasurer may not deposit aggregate funds in deposit accounts in any one designated depository in an amount aggregating at any one time more than 50 percent of the combined capital, surplus and undivided profits of that depository as determined by the last published statement.

Bond indentures of the Indiana Transportation Finance Authority authorize investments in obligations of the U.S. Treasury, U.S. government agencies and instrumentalities, tax exempt securities, savings accounts, certificates of deposit (CDs) and repurchase agreements (repos) secured by government securities.

The State Office Building Commission trust indentures authorize obligations of the U.S. Treasury, U.S. government agencies and instrumentalities, tax exempt securities, new Housing Authority bonds, savings and CDs, repos and reverse repos secured by government securities, investment agreements and commercial paper. Indiana Code permits investment in shares of management type investment trusts provided those trusts invest in securities of the types specified above.

Money held in the trust fund of the State Lottery Commission for the deferred payment of prizes may be invested by the Treasurer of State in annuities sold by an insurance company licensed to do business in Indiana (A.M. Best rating of A or equivalent) or in direct U.S. Treasury obligations.

Investments of the Recreational Development Commission will be kept in depositories designated as depositories for funds of the State as selected by the Commission, in the manner provided by IC 5-13-9.

The investments of the State's retirement systems are governed by separate investment guidelines. Investments which are authorized for the State

Teachers' Retirement Fund include: U.S. Treasury and Agency obligations, State and municipal obligations, domestic corporate bonds/notes, common stock and equity securities, foreign stocks and bonds, mortgage securities, venture capital and partnerships, and real estate. Investments which are authorized for the State Police Retirement fund include: U.S. Treasury and Agency obligations, State and municipal obligations, domestic corporate bonds/notes, common stock and equity securities, foreign stocks and bonds, mortgage pool investments, and repurchase agreements. The remaining six retirement systems and the Pension Relief Fund are administered by the Public Employees' Retirement Fund Board. The Board is required to diversify investments in accordance with prudent investment standards. Investment guidelines, issued by the Board, contain limits and goals for each type of investment portfolio, and specify prohibited transactions. These guidelines authorized investments of: U.S. Treasury and Agency obligations, domestic corporate bonds/notes, common stock and equity securities, foreign stocks and bonds. mortgage securities, mutual funds, asset backed, commercial mortgage backed, international stocks, and real estate.

Certain deposits of State funds are entrusted to an outside agent to invest and disburse as per federal requirements or contract. The State Revolving Fund is held by a fiscal agent and included as an enterprise fund.

2. Receivables and Payables

In the government-wide and proprietary fund financial statements, revenues are recognized on the flow of economic resources measurement focus. Material receivables are recognized as follows. Uncollected taxes due in the following periods are subject to accrual.

Individual income tax – Individual withholding tax is due from employers by the 20th day after the end of the month collected. Estimated payments are due from individuals by the 15th of the month immediately following each quarter or the calendar year.

Corporate income tax - Due on or before the last day of the month immediately following each quarter of the calendar year.

Sales tax – Due by the 20th day after the end of the month collected.

Fuel tax – Gasoline tax is due the 20th day after the end of the month collected. Special fuel tax, depending on the status of the taxpayer, is due by the 15th day after the end of the month collected or the 15th day after the end of the quarter collected. Motor carrier surtax is due at the end of the month following the end of the quarter.

Financial institutions tax – due on or before the fifteenth day of the fourth month following the close of the taxpayer's taxable year.

Alcohol and tobacco taxes – Cigarette distributors purchase tax stamps within 6 days after they accept delivery of the cigarettes. Cigarette tax is due within 30 days of the issuance of the tax stamp. Alcoholic beverage tax is due by the 20th day after the end of the month collected.

Inheritance tax – due nine months after the decedent's date of death.

In the governmental fund financial statements, revenue is recognized on the flow of current financial resources. Material receivables are subject to accrual for receipts collected in the month of July.

The State of Indiana does not collect property tax, which is collected by local units of government; a minor portion is remitted to the state semiannually (June and December) for distribution to the State Fair Commission, Department of Natural Resources and Family and Social Services Administration.

3. Interfund Transactions and Balances

The State has the following types of interfund transactions in the governmental fund and proprietary financial statements:

Interfund service provided and used (reciprocal interfund activity) - Charges for goods or services rendered by one fund to another are treated as revenues of the recipient fund and expenditures/expenses of the disbursing fund.

Interfund Transfers (non-reciprocal interfund activity) - Legally authorized transfers whereby the two parties do not receive equivalent cash, goods or services are reported as transfers.

The types of assets and liabilities resulting from these transactions are:

Interfund loans - These are balances arising from the short-term and long-term portion of interfund transactions.

Interfund services provided / used - These are balances arising in connection with reciprocal interfund activity or reimbursements. Balances

relating to discretely presented component units are presented as 'Due from / to component units'.

Interfund services provided and interfund loans are eliminated in the government-wide statements if they are provided by one governmental activity on behalf of another or by one business-type activity on behalf of another. The net amount of interfund services provided and interfund loans provided by a governmental activity for a business-type activity or by a business-type activity for a governmental activity are presented in the government-wide statement of net assets under the title "Interfund balances".

4. Inventories and Prepaid Items

Inventories for the Inns & Concessions, State Lottery Commission, Institutional Industries and Administration Services Revolving are valued at cost; Toll Road inventories are valued at lower of cost or market. The costs of governmental fund-type inventories are recorded as expenditures when purchased. The first in/first out (FIFO) method is used for valuation of inventories.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items.

5. Restricted Net Assets

Certain net assets are classified as restricted net assets because their use is completely restricted by bond indentures, contracts, grantors, contributors, laws or regulations of other governments, or through constitutional provisions or enabling legislation.

6. Capital Assets

Capital outlays are reported as expenditures in the governmental funds and as assets in the government-wide statements to the extent the State's \$20,000 capitalization threshold is met. In accordance with GASB Statement No. 34, all infrastructure assets have been capitalized retroactively.

The Indiana Department of Transportation (INDOT) uses the modified approach for reporting its infrastructure. The Department of Natural Resources (DNR) uses the depreciation approach for reporting its infrastructure.

Under the modified approach, the State has determined that the condition level for INDOT infrastructure assets to be maintained is:

- an average Pavement Quality Index (PQI) of 75 for Interstate and NHS Non-Interstate roads,
- an average PQI of 65 for Non-NHS roads,

- an average sufficiency rating of 87% for interstate bridges,
- an average sufficiency rating of 85% for NHS Non-Interstate bridges, and
- an average sufficiency rating of 83% for Non-NHS bridges.

The Division of Program Development of INDOT is responsible for determining the appropriate condition level of the infrastructure assets.

No amounts are capitalized in connection with improvements that lengthen the lives of such assets, unless the improvements also increase their service potential.

The State maintains an inventory of these infrastructure assets and performs periodic condition assessments to establish that the predetermined condition level is being maintained. Condition assessments are determined on an annual basis for interstates and on a biennial basis for other roads. Sufficiency ratings are determined at least on a biennial basis for all bridges and more frequently for certain bridges depending on their design.

The State makes annual estimates of the amounts that must be expended to preserve and maintain these infrastructure assets at the predetermined condition levels.

Capital assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated fixed assets are recorded at their estimated fair value at the date of donation.

Capital assets are depreciated in the proprietary and similar trust funds using the straight-line method on both the fund basis and the government-wide basis. Both the government-wide statements and proprietary and similar trust funds use the following estimated useful lives:

<u>Assets</u>	<u>Years</u>
Buildings	20-40
Improvements other than buildings	10-20
Infrastructure (not using modified approach)	20
Furniture, machinery and equipment	5-14
Motor Pool Vehicles	10 ¢ / mile

The State of Indiana maintains several collections of works of art, historical treasures, and similar assets

that are not capitalized. While the collections are maintained by different agencies, each collection is:

- Held for public exhibition, education, or research in furtherance of public service, rather than financial gain.
- Protected, kept unencumbered, cared for, and preserved.
- Subject to an organizational policy that either prohibits sale or requires the proceeds from sales of collection items to be used to acquire other items for collections.

The State's major collections are:

- The State Museum Collection, which is a part of the Indiana Department of Natural Resources, consists of historical buildings and furnishings; personal artifacts; tools and equipment; communication, transportation, recreational and societal artifacts; and art objects.
- The Commission on Public Records, State Archives Collection consists of historical and legal documents, that are generated on: paper or paper substitutes; photographic or chemically based media; magnetic or machine readable media; or any other materials, regardless of form or characteristics.
- The State Library has two collections, the Manuscript Collection and the Indiana History Collection. These collections include historical documents and works of art, most of it of Indiana origin.

Other collections include the Historical Bureau's Indiana Governors' Portrait Collection, the Department of Administrations' Statehouse Collection, and the Indiana Arts Commission's Collection. These collections consist primarily of art objects.

7. Compensated Absences

Full-time employees of the State of Indiana are permitted to accumulate earned but unused vacation and sick pay benefits. Vacation leave accumulates at the rate of one day per month and sick leave at the rate of one day every two months plus an extra day every four months. Bonus vacation days are awarded upon completion of five, ten and twenty years of employment.

Personal leave days are earned at the rate of one day every four months; any personal leave accumulated in excess of three days automatically becomes part of the sick leave balance. Upon separation of service, in good standing, employees will be paid for a maximum of thirty (30) unused vacation leave days.

No liability is reported for unpaid accumulated sick leave. Vacation and personal leave and salary-related payments that are expected to be liquidated with expendable available financial resources are reported as an expenditure and a fund liability of the governmental fund that will pay it. Amounts not expected to be liquidated with expendable available financial resources are reported as long term liabilities in government-wide and proprietary and fiduciary fund financial statements.

8. Long-Term Obligations

Long-term debt and other obligations are reported in the government-wide statements and the proprietary funds statements as liabilities in the applicable governmental activities, business-type activities, or proprietary fund.

In the governmental fund financial statements, bond issuance costs and bond discounts are treated as period costs in the year of issue. Proceeds of long term debt, issuance premiums or discounts and certain payments to escrow agents for bond refundings are reported as other financing sources and uses.

9. Fund Equity

In the fund financial statements reservations of fund equity represent those portions of fund balances that are legally restricted by outside parties for a specific purpose or are not appropriable. In the accompanying balance sheet, reserves for encumbrances and tuition support are examples of the former. Reserves for intergovernmental loans and advances receivables are examples of the latter. The following is a brief description of each reserve and the purpose for which it was established:

Reserve for Tuition Support - established to recognize that the legislature has set aside

money, as determined by the State Budget Agency, for paying the monthly distributions to local school units at the beginning of the succeeding fiscal year.

Reserve for Encumbrances - established to recognize money set aside out of one year's budget for goods and/or services ordered during that year that will not be paid for until they are received in a subsequent year.

Reserve for Restricted Purposes – established to recognize legal limitations that specify the purpose or purposes for which resources derived from government-mandated and voluntary nonexchange transactions are to be used.

Reserve for Prepaid Items – established to recognize payments made in advance of receipt of goods and services in an exchange transaction.

Reserve for Interfund Loans - established to recognize short-term and long-term loans issued to other funds within this government and therefore not currently available for expenditure.

Reserve for Intergovernmental Loans - established to recognize that the legislature has set aside money to lend to local units of government for specific purposes. These amounts are loans to individual school corporations, cities, towns, counties and other governmental units. Additionally, the general fund lends money to nonprofit entities. All loans require review and approval of the Board of Finance prior to issuance.

Reserve for Debt Service, Special Purposes - established to recognize that certain amounts have been set aside for debt service and for purposes specific to a particular component. Designations of fund balance represent tentative management plans that are subject to change.

II. RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

As described in Note I, Summary of Significant Accounting Policies, differences exist between the government-wide and the governmental fund financial statements. These differences are summarized in the reconciliations that follow the governmental fund financial statements.

A. Reconciliation of the Governmental Funds Balance Sheet to the Statement of Net Assets

In the government-wide financial statements, capital assets are considered economic resources and are capitalized at cost or estimated historical cost at time of acquisition. Where applicable these costs are offset by accumulated depreciation.

The government-wide statements use the flow of economic resources and accrue receivables that are not available soon enough in the subsequent period to pay for the current period's expenditures. Also under the flow of economic resources, expenses reported in the statement of activities do not require the use of current financial resources. Both these receivables and payables are accrued in the government-wide statements, but not in the fund financial statements.

Internal service funds are used by management to charge the costs of certain activities to individual funds. In the government-wide financial statements, the assets and liabilities of internal service funds are included in governmental activities in the statement of net assets. In the proprietary fund financial statements internal service fund balances are segregated and reported as their own fund type.

B. Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities

In the government-wide financial statements, the cost for capital outlays, except for governmental infrastructure, is allocated over the assets' useful lives and is reported as depreciation expense. In the fund financial statements, capital outlays are reported as expenditures.

The government-wide statements use the flow of economic resources and therefore do not report revenues and expenses dependent on the availability of financial resources, as is reported in the fund financial statements. Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the fund financial statements. Expenses reported in the statement of activities that do not require the use of current financial resources are not reported as expenditures in the fund financial statements. Bond proceeds provide current financial resources to governmental funds, but issuing debt increases longterm liabilities in the statement of net assets. Repayment of bond principal is an expenditure in the governmental fund financial statements, but the repayment reduces long-term liabilities in the statement of net assets.

Internal service funds are used by management to charge the costs of certain activities to individual funds. In the government-wide financial statements, the expenses of internal service funds are included in governmental activities in the statement of activities. In the proprietary fund financial statements internal service fund balances are segregated and reported as their own fund type.

III. STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

A. Budgetary Information

The Governor submits a budget biennially to be adopted by the General Assembly for the ensuing two-year period. The budget covers the general fund and most special revenue funds, but excludes the Armory Board and the Recreation funds at state institutions and mental facilities. The General Assembly enacts the budget through passage of specific appropriations, the sum of which may not exceed estimated revenues. Appropriations for programs funded from special revenue funds may allow expenditures in excess of original appropriations to the extent that revenues collected exceed estimated revenues.

The original budget is composed of the budget bill and continuing appropriations. The budget bill is enacted as the Appropriations Act that the Governor may veto, subject to legislative override. Continuing appropriations report budgeted expenditures as equal to the amount of revenues received during the year plus any balances carried forward from the previous year as determined by statute. Except as specifically provided by statute, appropriations or any part thereof remaining unexpended and unencumbered at the close of any fiscal year will lapse and be returned to the fund from which it was appropriated.

The final budget is composed of budgeted amounts as adopted and as amended by supplemental appropriations or appropriation transfers that were necessary during the current year. The State Board of Finance, which consists of the Governor, Auditor of State and Treasurer of State, is empowered to transfer appropriations from one fund of the State to another, with the exception of trust funds. The State Budget Agency may transfer, assign, and reassign almost any appropriation, except those restricted by law; but only when the uses and purposes of the

funds concur. Excess general fund revenue is used to cover non-budgeted recurring expenditures and overdrafts of budgeted amounts at the end of the current year. Capital appropriations are initially posted to general government. As projects are approved by the State Budget Committee the appropriations are transferred to the function of government from which they are disbursed. These actions are considered supplemental appropriations; therefore, expenditures do not exceed appropriations for individual funds.

The legal level of budgetary control (the level on which expenditures may not legally exceed appropriations) is maintained at the fund level by the State Budget Agency. When budgets are submitted for each fund center, certain recurring expenditures are not budgeted (medical service payments, unemployment benefits, tort claims) according to instructions from the State Budget Agency to the various agencies. The Budget Agency monitors all fund centers regularly in addition to monitoring excess general fund revenue that will be available at the end of the fiscal year to cover the non-budgeted, recurring expenditures.

Encumbrance accounting is employed in governmental funds. Encumbrances (e.g., purchase orders, contracts) outstanding at year end are reported as reservations of fund balances and do not constitute expenditures or liabilities. Funds encumbered in the prior year are carried forward in the ensuing year's budget. The availability of unencumbered funds in the subsequent year is dependent upon the legislative or administrative controls established when the fund center was originated.

B. Deficit Fund Equity

At June 30, 2003, various funds had a deficit fund balance caused by overdrafts from pooled cash and investments and the posting of accruals to the

balance sheet. Temporary cash overdrafts are reported as interfund loans from the general fund.

Fund	 draft from led cash	Accrual deficits		
Governmental Funds	 			
Motor Vehicle Highway Fund	\$ (5,263)	\$	(18,262)	
Property Tax Replacement Fund	-		(682,122)	
County Welfare Administration	(6,724)		(8,697)	
Patients Compensation	-		(3,346)	
Federal Food Stamp Program	(522)		(88)	
Major Construction Army National Guard	-		(890)	

C. Unreserved Fund Balance

The State of Indiana designates its unreserved fund balance as designated for appropriations, designated for allotments, and undesignated. In order for money to be spent out of a fund it must be appropriated by the legislature and then allotted by the State Budget Agency. The following are the designations of unreserved fund balance at June 30, 2003:

		Designations	of U	nreserved F	und E	Balance		
								Total

IV. DETAILED NOTES ON ALL FUNDS

A. Deposits, Investments and Securities Lending

The deposits with financial institutions for the primary government and its discretely presented component units at year end were entirely insured by federal depository insurance, state depository insurance, or collateralized securities held by the State or by an agent in the State's name. An exception to this is \$68 million in deposits of the Public Employees' Retirement Fund which exceeded federal depository insurance limitations.

Investment are categorized into these three categories of credit risk: (1) Insured or registered, or securities held by the State (or its component unit) or

an agent in the State's or unit's name. (2) Uninsured and unregistered, with securities held by the counterparty's trust department or agent in the State's or unit's name. (3) Uninsured and unregistered, with securities held by the counterparty, or by its trust department or agent but not in the State's or unit's name.

Blended component units that are included in the financial statements as described in Section I(A) account for \$147.2 million of the primary government's total investments included in these totals.

State statutes and policies permit the State to lend securities to broker-dealers and other entities (borrowers) for collateral with a simultaneous agreement to return the collateral for the same securities in the future. The State's custodial banks manage the securities lending programs and receive securities or cash as collateral. The types of securities lent during the year may include U.S. Treasury and agency obligations, corporate bonds/notes, and foreign bonds. Collateral securities and cash are initially pledged at 102 percent of the market value of the securities lent. Generally, there are no restrictions on the amount of assets that can be lent at one time, except for the Public Employees Retirement Fund and the State Teachers Retirement Fund (discretely presented component units), which

allow no more than 40% to be lent at one time. The collateral securities cannot be pledged or sold by the State unless the borrower defaults, but cash collateral may be invested. At year-end, the State had no credit risk exposure to borrowers because the amount the State owes the borrowers exceed the amounts the borrowers owe the State. Cash collateral is generally invested in securities of a longer term with the mismatch of maturities generally 0-15 days. The contracts with the State's custodians requires them to indemnify the funds if the borrowers fail to return the securities (and if the collateral is inadequate to replace the securities lent) or fail to pay the funds for income distributions by the securities' issuers while the securities are on loan.

B. Interfund Transactions

The composition of interfund balances as of June 30, 2003 is as follows:

E. Leases

Investment in Direct Financing Lease
The Indiana Transportation Finance Authority (ITFA)
Airport Facilities Revenue Bonds and the ITFA

Aviation Technology Center Lease Bonds have investments in direct financing leases with the Indianapolis Airport Authority.

The future minimum lease receipts together with the amounts representing principal and interest are as follows:

		Busi	ness-t	ype Activiti	es		
Year Ending, June 30	Р	rincipal	li	nterest	Total		
2004	\$	9,230	\$	11,531	\$	20,761	
2005		10,445		10,949		21,394	
2006		11,485		10,288		21,773	
2007		12,165		9,587		21,752

2008-2013		75,800		32,428		108,228	
2013-2018		80,210		9,408		89,618	
Total	\$	212,155	\$	93,105	\$	305,260	

Operating Leases

The State leases building and office facilities and other equipment under non-cancelable operating leases. Total payments for such leases with aggregate payments of \$20,000 or more were \$38.1 million for the year ended June 30, 2003. A table of future minimum lease payments (excluding executory costs) is presented below.

Capital Leases Liabilities

The State has entered into various lease agreements with aggregate payments of \$20,000 or more to finance the acquisition of buildings, land and equipment. These lease agreements qualify as capital leases for accounting purposes and, therefore, have been recorded at the present value of the future minimum lease payments as of the inception date in the government wide statements.

The future minimum lease obligations, the net present value of these minimum lease payments as of June 30, 2003 and the assets acquired through capital lease during the fiscal year are as follows:

Future minimum lease payments				
Year ending June 30,		perating leases	Gove	tal leases ernmental ctivities
2004 2005 2006 2007 2008 2009-2013 2014-2018 2019-2023 2024-2028 2029-2033	\$	35,845 29,840 24,433 19,490 16,734 45,871 14,204 2,806 750 400	\$	4,155 3,543 3,120 2,289 2,294 7,292

Assets acquired through capital lease	9			
Machinery and equipment less accumulated depreciation			\$	156 (59)
			\$	97

Discretely Presented Component Units
The Indiana Development Finance Authority, a discretely presented component unit, has future obligations under an operating lease which total \$0.3 million.

Purdue University, a significant discretely presented component unit, also is the lessee for capital leases

totaling \$146.9 million, of which \$56.9 million represents interest.

Indiana University's liability for capital leases is \$20.6 million, of which \$6.0 million represents interest.

Indiana University has future obligations under operating leases of \$46.5 million.

F. Long-Term Obligations

Changes in long-term obligations for the primary government for the year ended June 30, 2003 were as follows:

Long-term obligations of the governmental activities consists of revenue bond obligations of the Indiana Transportation Finance Authority Highway Revenue Bonds, the State Office Building Commission and Recreational Development Commission. Other long term obligations of governmental activities include capital lease obligations of governmental funds as presented in Section IV(E), net pension obligations for the Prosecuting Attorney's Retirement Fund and Legislators' Retirement System as presented in Section V(I), construction retention, amount due the compensated federal government, obligations, and salaries and benefits payable because of the State Incentive Retirement Plan. The General Fund typically has been used to liquidate other long-term liabilities.

Long-term obligations of the business-type activities consists of claims liability of the Indiana Residual Malpractice Insurance Authority. It also includes compensated absences, revenue bonds issued by the Indiana Transportation Finance Authority Aviation

Technology, the Indiana Transportation Finance Authority Airport Facilities, and the Indiana Transportation Finance Authority Toll Roads. The State Revolving Fund has obligations due to both a discretely presented component unit and the Indiana Bond Bank. Long-term obligations also includes prize liability accrued by the Indiana State Lottery Commission. These entities have been established by statute as corporate and politic units with the separate legal authority to finance certain essential governmental functions.

Long-term obligations of the significant discretely presented component units consists of bonds issued or backed by the Indiana Housing Finance Authority, the Indiana Development Finance Authority, the Indiana Bond Bank, Indiana University, and Purdue University. It also includes capital leases of Indiana University and Purdue University. As with the entities in the proprietary funds, these entities have the separate legal authority to finance certain essential governmental functions.

Revenue bonds are issued by entities established by statute as corporate and politic units with the separate legal authority to finance certain essential governmental functions. Income from the acquired or constructed assets is used to pay debt service.

Governmental Activities

Indiana Transportation Finance Authority (ITFA) Highway Revenue Bonds – In 1988 the Transportation Finance Authority was granted the power to construct, acquire, reconstruct, improve and extend Indiana highways, bridges, streets and roads (other than the East-West Toll Road) from proceeds of highway revenue bonds issued by the Authority. The bonds are paid solely from and secured exclusively by the pledge of revenues from leases to the Indiana Department of Transportation of completed highway revenue bond projects. Bonds issued are corporate obligations of ITFA and are payable solely from and secured exclusively by the pledge of revenues from the leases of the projects financed out of the bond proceeds, the proceeds of such bonds and the investment earnings thereon. ITFA has no taxing power and any indebtedness incurred by ITFA does not constitute an indebtedness of the State within the meaning or application of any constitutional provision or limitation.

On November 15, 2000, ITFA issued Highway Revenue Bonds, Series 2000 in the par amount of \$269.5 million, which included \$21.9 million of refunding debt and \$247.6 million of new money debt. New refunding debt service requirements required a \$2.7 million increase in cash funds needed over the prior debt service requirements. The economic gain, or present value savings, on the refunding was \$556,875. The primary purpose of the refunding bond issue was to level out the debt service requirements over time to increase the volume capacity for future bond issuances, as well as present value savings.

The \$247.6 million new money debt is being used for the payment of construction costs for the Series 2000 projects. The refunding debt was used to refund in advance of their stated maturity dates the Series 1990A and 1993A bonds maturing from June 1, 2006 to June 1, 2011. A portion of the proceeds, \$22.7 million was deposited in an escrow fund established pursuant to an Escrow Deposit Agreement between ITFA and the escrow trustee, Bank One Trust Company, N.A., and were used to purchase direct obligations of the United States of America. The initial cash deposit and interest earned thereon will pay when due the principal and interest for the Series 1990A Bonds and the Series 1993A Bonds. As of June 30, 2003, the amount of defeased debt still outstanding, but no longer considered long-term debt, was \$9.7 million with total Series 1990A capital appreciation bonds maturing at \$14.1 million and total Series 1993A capital appreciation bonds maturing at \$9.2 million.

In June 2003, the Authority issued \$150.1 million of Highway Bond anticipation Notes to provide interim financing for highway and bridge projects under the Highway Revenue Bond Program. The interest rate on the notes was 1.50 percent (yield was .95 percent), and the notes were due October 3, 2003.

Indiana State Office Building Commission - The Indiana State Office Building Commission (SOBC) was created as a public body corporate and politic by the 1953 Acts of the Indiana General Assembly. The SOBC is authorized to construct and equip such facilities as the General Assembly may authorize through the issuance of revenue bonds. The SOBC has issued debt obligations to provide funds for financing the implementation of the Indiana Government Center Master Plan and to finance acquisition costs (including design and construction costs) of the Indiana State Museum, Miami Correctional Facility, Pendleton Juvenile Correctional Facility, New Castle Correctional Facility and the Replacement Evansville State Hospital. The facilities are rented to the Indiana Department of Administration (DOA) under use and occupancy agreements.

Bonds issued by the SOBC are obligations only of the SOBC and are payable solely from and secured exclusively by the pledge of the income of the applicable facility financed. The SOBC has no taxing authority and rental payments by the DOA are subject to and dependent upon appropriations made for such purposes by the General Assembly.

The Hoosier Notes agreement provides interim financing for the acquisition and construction of the various facilities. On October 31, 2002, the Commission amended and restated the Hoosier Notes credit agreement dated February 18, 1998, which reduced the maximum advance of tax exempt commercial paper from \$200 million to \$150 million. On March 25, 2002, the Commission amended and restated the Hoosier Notes credit agreement and reduced the maximum advance from \$250 million to \$200 million effective on October 1, 2002. Borrowings outstanding under this facility at June 30, 2003 were \$45.4 million, with interest computed at the LIBOR rate plus .25% or 70% of the Bank's prime lending rate. The interest rate in effect was .95% at June 30. 2003. The credit facility expires on December 31, 2005.

Pursuant to prior advance refundings, the Commission had \$246.1 of defeased revenue bonds outstanding at June 30, 2003. In accordance with

generally accepted accounting principles, these amounts are not included in the accounts of the Commission.

Recreational Development Commission - The Recreational Development Commission was created in 1973 pursuant to I.C. 14-14-1, for the purpose of providing funds for projects involving Department of Natural Resources' properties. The Commission consists of five members. The Treasurer of State and the Director of the Department of Natural Resources (DNR) are members by virtue of their offices and the other three members are appointed by the Governor.

In 1987 and 1990 revenue bonds were issued to provide funds to renovate and equip Abe Martin Lodge and Turkey Run Inn and to construct cabins at Harmonie and Whitewater State Parks. Lease agreements with the Indiana Department of Natural Resources State Park Inns are used to repay the bond issues. The buildings and land will then be deeded back to the State of Indiana.

In 1994, the Commission executed three Escrow Deposit Agreements with bank trustees for the purpose of refunding revenue debentures issued in 1987 and 1990. A portion of the proceeds from the 1994A Revenue Bonds was used to fund the redemption.

On January 1, 1997, the Commission issued \$6.6 million of Series 1997 Revenue Bonds with interest rates from 4% to 5.35% to finance a golf course at Ft. Harrison State Park.

On December 19, 2002, the Commission issued Revenue Bonds. Series 2002, with a face value of \$14.4 million to finance the cost of the development of park facilities at Prophetstown State Park, located near Battle Ground, Indiana, in Tippecanoe County. The project will include construction of picnic areas, camparound sites, trails, a gatehouse and maintenance facilities. Proceeds from the bond issue were also used to refund, in advance of their stated maturing dates, a portion of the 1994A Series Revenue Bonds. At June 30, 2003, outstanding revenue bonds of \$10.2 million are considered to be defeased. The advance refunding was undertaken to reduce total debt service requirements. Cash funds needed for the new refunding debt decreased by \$477,016 from that needed under the prior debt service requirements. The economic gain, or present value savings, on the refunding was \$342,252.

Business-type Activities:

<u>Indiana Transportation Finance Authority – East-West</u>
Toll Roads – The Indiana Transportation Finance

Authority (ITFA) is the successor to the Indiana Toll Finance Authority created in 1983 pursuant to IC 8-9.5. ITFA is a body both corporate and politic and, although separate from the State, the exercise by ITFA of its powers constitutes an essential government function. ITFA's duties consist of the construction, reconstruction, improvement, maintenance, repair and operation of all toll roads and bridges in the state. To exercise its duties, ITFA may issue bonds under statute.

Bonds issued are corporate obligations of ITFA and are payable solely from and secured exclusively by the pledge of the revenues from the leases to the Indiana Department of Transportation of the projects financed out of the bond proceeds and the proceeds of such bonds and the investment earnings thereon. ITFA has no taxing power and any indebtedness incurred by ITFA does not constitute an indebtedness of the State within the meaning or application of the any constitutional provision or limitation.

During September 1985, ITFA issued \$256.9 million of Indiana Toll Finance Authority Toll Road Revenue Refunding Bonds, Series 1985 for the refunding of the outstanding portion of the \$259.5 million Indiana Toll Commission East-West Toll Road Revenue Bonds, 1980 Series. At June 30, 2003, the principal amount of the Series 1980 bonds, which have been defeased in substance, was \$108.0 million.

During October 1993, ITFA issued \$76.1 million of Indiana Transportation Finance Authority Taxable Toll Road Lease Revenue Refunding Bonds, Series 1993 (Series 1993 Bonds) to provide resources to purchase U.S. government securities that were placed in an irrevocable trust for the purpose of generating resources for all future debt service payments of a portion of the outstanding Indiana Transportation Finance Authority Taxable Toll Road Lease Revenue Refunding Bonds, Series 1985. The Series 1993 Bonds are secured by the renewable lease between ITFA and the Indiana Department of Transportation (INDOT).

As a result, the refunded portion of the Series 1985 Bonds are not reported as a debt of the ITFA since repayment of principal and interest will be from escrowed funds and earnings. The advance refunding of the Series 1985 Bonds resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$14.2 million.

This difference is being charged to interest expense in the amount of \$1.2 million through the year 2005 using the straight-line method. Accordingly, \$2.4 million through the period ended June 30, 2003 has been reported in the accompanying financial statements as a deduction from bonds payable. This advance refunding was undertaken to reduce total debt service payments over the next 11 years by \$9.6 million and to obtain an economic gain (difference between the present values of the old and new debt service payments) of \$7.1 million.

During October 1996, ITFA issued \$134.8 million of Indiana Transportation Finance Authority Toll Road Lease Revenue Refunding Bonds, Series 1996 (Series 1996 Bonds), to refund a portion of the Indiana Toll Finance Authority Toll Road Revenue Refunding Bonds, Series 1987. Proceeds from the sale of the Series 1996 Bonds were used to purchase assets placed in an irrevocable trust that will be used to pay principal and interest on the Series 1987 Bonds when due. The Series 1996 Bonds are secured by the renewable lease between ITFA and INDOT.

The advance refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$15.5 million. The difference is being charged to interest expense in the amount of \$1.25 million for the year ended June 30, 2003, using the effective interest rate method over the life of the bond. Accordingly \$5.7 million through the year ended June 30, 2003, has been reported in the accompanying financial statements as a deduction from bonds payable. This advance refunding was undertaken to reduce total debt service payments over the next 16 years by \$8.1 million and to obtain an economic gain (difference between the present values of the old and new debt service payments) of \$4.7 million.

At June 30, 2003, the ITFA was in compliance with all material requirements and restrictions contained in the Trust Indentures.

Indiana Transportation Finance Authority (ITFA) Airport Facilities Revenue Bonds — In 1991, the General Assembly authorized, under Indiana Code 8-21-12, to finance improvements related to an airport or aviation related property or facilities, including the acquisition of real estate, by borrowing money and issuing revenue bonds. Any bonds issued are corporate obligations of ITFA and are payable solely from and secured exclusively by the pledge of revenues from the leases of the projects financed out of the bond proceeds, the proceeds of such bonds and the investment earnings thereon.

ITFA has no taxing power and any indebtedness incurred by ITFA does not constitute an indebtedness of the State within the meaning or application of any constitutional provision or limitation.

On February 11, 1992, the Transportation Finance Authority issued bonds in the principal amount of \$201.3 million. Additionally, Series 1995A parity bonds in the amount of \$29.7 million were issued May 15, 1995. The bonds were issued to finance certain improvements related to the United Airlines maintenance facility at Indianapolis International Airport. These bonds are payable from rental revenues as may be appropriated by the Indiana General Assembly for that purpose.

On December 1, 1996, ITFA issued Airport Facilities Lease Revenue Refunding Bonds, Series 1996A, in the amount of \$137.8 million with interest rates from 4.5% to 6%. The refunding debt was used to refund in advance of their stated maturity dates the Series 1992A bonds maturing on November 1, 2006 through November 1, 2014. A portion of the proceeds, \$136.9 million, was deposited in an escrow fund established pursuant to an Escrow Deposit Agreement between ITFA and the escrow trustee, Bank One, N.A., and was used to purchase direct obligations of United States of America. The initial cash deposit and interest earned thereon will pay when due the principal and interest on the remaining bonds. During fiscal year 2003 remaining bonds were paid in full. As of June 30, 2003, there was no defeased debt on Series 1992A still outstanding in a separate escrow account.

Indiana Transportation Finance Authority (ITFA) Aviation Technology Center Lease Bonds - On February 27, 2002, ITFA issued Aviation Technology Center Lease Revenue Refunding Bonds, Series 2002 with a principal amount of \$10.1 million. The refunding debt was used to refund in advance of their stated maturity dates all outstanding Series 1992A bonds. A portion of the proceeds totaling \$9.9 million, as well as funds available from the Series 1992A bonds totaling \$660,717, was deposited in an escrow fund established pursuant to an Escrow Deposit Agreement between ITFA and the escrow trustee, Fifth Third Bank, Indiana, and was used to purchase direct obligations of United States of America. The initial cash deposit and interest earned thereon will pay when due the principal and interest on the remaining bonds.

The difference in cash flows required between the prior debt service requirements and new refunding debt service requirements resulted in cash flow savings of \$780,582. The economic gain, or present value savings, was \$660,851. During fiscal year 2003 remaining bonds were paid in full. As of June 30, 2003, there was no defeased debt on Series 1992A still outstanding in a separate escrow account.

The following is a summary of long term-debt including revenue bonds outstanding at June 30, 2003.

Summary of Long-Term Debt including surrent portion (in thousands)	Interest Rates Range	Maturity Range	Annual Payment Range	Amount
Sovernmental Activities				
Recreational Development Commission	2.10% - 6.125%	2004 - 2019	\$1,405 - 2,976	\$ 26,67

tate Revolving Fund	3.50% - 7.00%	2004 - 2024	\$27,667 - 102,427	1,078,63
nns and Concessions	5.60%	2004	\$91	
				\$ 1,611,83

State Lottery Commission Accrued Prize Liability – Accrued prize liability includes an estimate of unclaimed instant and on-line game winners and future television game show prizes awarded on shows committed to as of June 30, 2003, as well as installment amounts payable to past instant, on-line and game show winners. Installment prizes are

recorded at a discount based on interest rates that range from approximately 2% to 6% and reflect the interest earned by the investments held to fund the related liabilities. At June 30, 2003, the accrued prize liability was \$102.2 million including \$44.1 million in current prize liability and \$58.1 million in long-term prize liability.

Revenue bond debt service and accrued prize liability requirements to maturity including interest are as follows:

			ental Activit	ies

Long-Term Debt of the Significant Discretely Presented Component Units is as follows:

Indiana Housing Finance Authority -- In 1978, the Indiana Housing Finance Authority (the Authority) was granted the power to issue bonds for the purpose of financing residential housing for persons and families of low and moderate incomes. These bonds are special obligations of the authority and are payable solely from the revenues and assets pledged. Various series of bonds have been issued with an original amount of \$1,478 million with interest rates ranging from 1.35% to 7.85%. The total outstanding debt associated with these bond issues as of December 31, 2002 was \$998 million.

During 2002, the Single Family Mortgage Program Fund issued 2002 Bond Series with a face value of \$249.9 million and interest rates varying from 1.35%

to 5.55%. The Single Family Mortgage Program Fund provides for the purchase of mortgage loans made to eligible borrowers for owner-occupied housing.

Indiana Bond Bank – The Bond Bank is an instrumentality of the State of Indiana but is not a state agency and has no taxing power. It has separate corporate and sovereign capacity and is composed of the Treasurer of State (who serves as Chairman of the Board, ex officio), the Director of the Department of Financial Institutions (who serves as director, ex-officio), and five directors appointed by the Governor.

The Bond Bank is authorized to buy and sell securities for the purpose of providing funds to Indiana qualified entities. To achieve its purpose, the Bond Bank has issued various bonds and notes payable. The bonds and notes payable were issued under indentures of

trust. Each indenture requires the maintenance of debt service reserve accounts. Total outstanding debt as of June 30, 2003 was \$3,204 million with interest rates ranging from 1.10% to 7.0%. Assets held in debt service reserve accounts are included in cash, cash equivalents, and investments and amounted to \$18.2 million.

In January 2000, the Bond Bank issued its Special Program Series 2000A Refunding Bonds in the amount of \$32.9 million. Proceeds from this issue and certain related investments were used to defease the Special Program Bonds Series 1985B, 1986B, 1986C, 1986E, 1987A, 1989C, 1990A, 1990B, and Special Loan Program Bonds Series 1988A, 1988B, 1988C, and 1989A in entirety. The difference between the amount deposited in an irrevocable trust with an escrow agent to provide for all future debt service payments on the defeased debt and the net carrying amount of the defeased debt resulted in a deferred cost on defeasance of \$1.2 million, which is being amortized over the life of the Special Program Series 2000A Refunding Bonds. However, the issuance of the Special Program Series 2000A Refunding Bonds will reduce the Bond Bank's aggregate debt service payments by \$17.7 million over the 20-year period extending through February 2020, resulting in an economic gain (the difference between the present values of the old and new debt service payments) of approximately \$4.9 million.

Special Program Bonds Series 1985A, 1989A, 1991B 1992A, and 1992B are considered to have been defeased and have been removed from the financial statements and in total have remaining outstanding principal balances of approximately \$46.9 million at June 30, 2003.

In April 2002, the Bond Bank issued Special Program Bond Series 2002B with a face amount of \$5.8 million with interest rates based on the lowest available rate in the interest period (weekly, monthly, quarterly, annually, or fixed) as selected by the qualified entity, not to exceed 10%. The interest rate was 1.35% at June 30, 2003.

In July 2002, the Bond Bank issued its Special Program Bond Series 2002D with a face amount of \$60.0 million at interest rates ranging from 3.0% to 5.375%. Proceeds from this issue were used to refund and redeem the Special Hospital Program Bonds, Series 1992A.

The transaction will reduce the Bond Bank's aggregate debt service payments by \$4.7 million over the 20-year period extending through April, 2023, resulting in an economic gain (the difference between the present values of the old and new debt service payments) of approximately \$1.8 million.

In July 2002, the Bond Bank issued its Advance Funding Program Notes Series 2002B with a face amount of \$19.8 million at an interest rate of 1.6%. This money goes out to all participants who want to receive their funds ahead of the Advance Funding Program Notes. These Advanced Funding Interim Notes are repaid when the Advance Funding Program Notes are issued.

In September 2002, the Bond Bank issued its Special Program Bond Series 2002E in the amount of \$10.2 million at interest rates ranging from 1.65 to 5.25%.

In September 2002, the Bond Bank issued School Severance Program Bonds Series 2 with a face amount of \$32.3 million at interest rates ranging from 1.98% to 5.72%.

In December 2002, the Bond Bank issued School Severance Program Bonds Series 3 with a face amount of \$73.0 million at interest rates ranging from 1.65% to 5.85%.

In December 2002, the Bond Bank issued its State Revolving Fund Program Bonds, Series 2002A in the amount of \$75.1 million at interest rates ranging from 1.86 to 4.84%. Proceeds from this issue were used to refund and redeem the State Revolving Fund Program Bonds, Series 1993. The transaction will reduce the Bond Bank's aggregate debt service payments by \$12.0 million over the 20-year period extending through February, 2023, resulting in an economic gain (the difference between the present values of the old and new debt service payments) of approximately \$4.0 million.

In December 2002, the Bond Bank issued its State Revolving Fund Program Bonds, Series 2002B in the amount of \$66.7 million at interest rates ranging from 4.0 to 5.375%.

In January 2003, the Bond Bank issued its Special Program Bond Series 2003B in the amount of \$8.9 million at interest rates ranging from 2.0 to 5.0%.

In January 2003, the Bond Bank issued Advance Funding Program Notes Series 2003 Interim with a face amount of \$866.4 million and an interest rate of 2.0%.

In February 2003, the Bond Bank issued its Special Program Notes Series 2003A in the amount of \$19.0 million at interest rates ranging from 1.6 to 2.0%.

In March 2003, the Bond Bank issued its Special Program Bond Series 2003A in the amount of \$40.4 million at interest rates ranging from 2.75 to 5.25%. In May 2003, the Bond Bank issued its Reassessment

Assistance Program Bonds, Series 2003 in the amount of \$116.6 million at an interest rate of 1.75%.

In June 2003, the Bond Bank issued Advance Funding Program Notes Series 2003 Midyear with a face amount of \$349.2 million and an interest rate of 1.25%.

In June 2003, the Bond Bank issued School Severance Program Bonds Series 4 with a face amount of \$50.0 million at interest rates ranging from 1.47% to 5.07%.

In June 2003, the Bond Bank issued its Special Program Bond Series 2003C in the amount of \$10.4 million at interest rates ranging from 2.0 to 5.0%.

In June 2003, the Bond Bank issued its Special Program Bond Series 2003D in the amount of \$27.5 million at interest rates ranging from 3.0 to 5.0%.

<u>Colleges and Universities</u> -- Both Indiana University and Purdue University are authorized by acts of the Indiana General Assembly to issue bonds for the purposes of financing construction of student union buildings, halls of music and housing, athletic, parking, hospital, academic facilities and utility systems.

Indiana University

The outstanding long-term indebtedness from bonds and notes at June 30, 2003 was \$548.1 million with interest rates ranging from 0.95% to 7.25%.

On March 6, 2003, Indiana University Student Fee Bonds, Series O were issued in the amount of \$111.5 million. This series includes funds for a partial advance refunding of Indiana University Student Fee Bonds, Series K and Series M. The true interest cost for the entire bond issue was 4.26%. Cash flows needed for the new refunding debt decreased by \$2,105,110 from that needed under the prior debt service requirements. The economic gain, or present value savings, on the refunding was \$2,050,660.

In prior years, Indiana University has defeased bond issues either with cash or by issuing new debt. U.S. Treasury obligations have been purchased in amounts sufficient to pay principal and interest payments when due, through maturity, and have been deposited in irrevocable trust with the trustee. Neither the defeased bonds nor the related trusts are reflected on the University's books.

The total amount of defeased debt outstanding at June 30, 2003 was \$18.9 million.

Purdue University

The outstanding long-term indebtedness from bonds and notes at June 30, 2003 was \$380.6 million with interest rates ranging from 2.0% to 6.0%.

On April 8, 2003, Student Facilities System Revenue Bonds, Series 2003A bonds were issued in the amount of \$95.0 million. This series includes funds for the refunding of the Dormitory System Revenue Bonds, Series 1993, the Dormitory System Tax-Exempt Commercial Paper Notes, Series 2000, and for the continuation of the Cary Quad renovation and the Food Service Consolidation. As of June 30, 2003, the balance outstanding on these bonds was \$95.0 million. The interest rates were 4.0% to 5.38%. Cash flows needed for the new refunding debt decreased by \$2,566,396 from that needed under the prior debt service requirements. The economic gain, or present value savings, on the refunding was \$1,975,607.

On May 29, 2003, Student Facilities System Revenue Bonds, Series 2003B bonds were issued in the amount of \$24.4 million. This series was issued to finance student housing facilities on the Fort Wayne campus. As of June 30, 2003, the balance outstanding on these bonds was \$24.4 million. The interest rates were 2.0% to 5.0%.

In prior years, Purdue University has defeased bond issues either with cash or by issuing new debt. U.S. Treasury obligations have been purchased in amounts sufficient to pay principal and interest payments when due, through maturity, and have been deposited in irrevocable trust with the trustee. Neither the defeased bonds nor the related trusts are reflected on the University's books. The total amount of defeased debt outstanding at June 30, 2003 was \$115.7 million.

G. Prior Period Adjustments and Reclassifications

For the fiscal year ended June 30, 2003, certain changes have been made to the financial statements to more appropriately reflect financial activity of the State of Indiana. These restatements are reflected in the beginning net assets in the government-wide statement of activities.

Change in Capitalization Threshold

For discretely presented component units, there is a reduction of \$61.6 million in net assets because the capitalization threshold for capital assets was increased from \$1,000 to \$5,000 for Indiana University. There is also a reduction of \$16.0 million in net assets because the capitalization threshold for capital assets was increased from \$500 to \$5,000 for Ball State University.

Other Changes:

Prior Period Adjustment

For the government wide balance sheet, there is a \$142.7 million dollar increase in pension net assets. These were not included with the adoption of GASB Statement No. 34 in FY 2001-2002, and should have been.

For the government wide balance sheet, there is an increase of \$106.3 million in net assets for capital assets. This was the result of several State agencies not capitalizing fixed assets acquired prior to June 30, 2002 by that date.

For Internal Service Funds, there is an increase of \$18.2 million in net assets for the State Police Benefit Fund. This fund had a deficit net assets of this amount at the end of FY 2002. For FY 2003 it was determined that this deficit was being double counted, in the Governmental Fund statements and in the Internal Service Fund statements.

For Internal Service Funds there is an increase of \$4.3 million in net assets in the Administrative Services Revolving Fund due to an accounting error.

For discretely presented component units, there is a decrease in net assets of \$3.3 million because certain external grant funds received by Ball State University during the fiscal year ended June 30, 2001, were

recorded as revenue in accordance with accepted practice at that time. Under current practice these funds would have been recorded as deferred income and advances on long-term grants.

Reclassification of funds

The following reclassifications took place to the Hoosier Lottery Commission, an enterprise fund: \$24.6 million was reclassified from the Build Indiana, \$7.5 million from the Teachers Retirement Fund (TRF) and \$7.5 million from the Public Employees Retirement Fund (PERF). This resulted in a reclassification to the Hoosier Lottery Commission of \$39.6 million. In the past, the Hoosier Lottery Commission had been accruing transfers as a liability to the Build Indiana Fund, TRF and PERF. The State had been accruing a receivable for these transfers.

The Indiana Transportation Finance Authority (ITFA) Aviation Technology Bonds Fund and the ITFA Airport Facilities Bond Fund were reclassified from governmental funds to enterprise funds. This resulted in a decrease of net assets \$2.0 million for governmental activities and an increase in net assets of the same amount for business type activities on the government wide statements.

For Fiduciary component units, there was a reclassification of \$7.5 million from two agency funds to PERF funds. That increased beginning net assets by \$7.5 million.

The following schedule reconciles June 30, 2002 net assets as previously reported, to beginning net assets, as restated, to include the adoption of new pronouncements:

	_	overnmental Activities	Business- Type Activities	F	iduciary Funds	ı	II Discretely Presented Component Units
June 30, 2002, fund balance/retained earnings/net assets as reported	\$	12,320,675	\$ 2,095,481	\$	794,186	\$	20,940,420
Prior period adjustments:							
Changes in accounting principle:							
Change in policy for accrued vacation time		-	-		-		482
Change in capitalization threshold		-	- (100)		-		(77,577
Correction of errors		273,353	(162)		-		(2,576)
Reclassifications of funds		(27,742)	 41,278				(7,520)
Balance July 1, 2002 as restated	\$	12,566,286	\$ 2,136,597	\$	794,186	\$	20,853,229

V. OTHER INFORMATION

A. Risk Management

The State of Indiana is exposed to various risks of loss. This includes damage to property owned by the agencies, personal injury or property damage liabilities incurred by a State officer, agent or employee, errors, omissions and theft by employees, certain employee health benefits, employee death benefits, and unemployment and worker's compensation costs for State employees.

The State records an expenditure for any loss as the liability is incurred or replacement items are purchased. The State does purchase immaterial amounts of commercial insurance. Settlements related to commercial insurance have not exceeded coverage in the past three fiscal years.

The State does have risk financing activity for the state employees' disability, certain state employees' health benefits, and certain health, disability and death benefits for State Police officers. These are reported in three individual Internal Service Funds.

The state employees' disability program is financed partially by state employees through payroll withholdings and by the funds from which employees are paid. The employees' health benefits and the State Police traditional health plan are funded by the employees who have selected certain health care benefit packages and the funds from which those employees are paid. (An insurance carrier does provide claims administration services for the health insurance programs.)

Located below is the table of claim liabilities. The liabilities are not maintained in the accounting records of the State. The claim liabilities for the health insurance programs and the State Disability fund were estimated based on the historical experience rate of claims paid that were for service dates incurred during a prior fiscal year. The surplus retained earnings in these funds are reserved for future catastrophic losses.

	State Police Health Insurance Fund	State Employees' Health Insurance Fund	State Disability Fund	Total
<u>2003</u>				
Unpaid Claims, July 1 As Restated	\$ 1,900	\$ 9,750	\$ 5,092	\$ 16,742
Incurred Claims and Changes in Estimate	19,803	107,969	26,288	154,060
Claims Paid	(19,996)	(102,965)	(26,283)	(149,244)
Unpaid Claims, June 30	\$ 1,707	\$ 14,754	\$ 5,097	\$ 21,558
<u>2002</u>				
Unpaid Claims, July 1	\$ 1,600	\$ 9,000	\$ 7,119	\$ 17,719
Incurred Claims and Changes in Estimate	16,476	68,425	23,815	108,716
Claims Paid	(16,176)	(67,675)	(25,842)	(109,693)
Unpaid Claims, June 30	\$ 1,900	\$ 9,750	\$ 5,092	\$ 16,742

The trustees of Indiana University and Purdue University have chosen to assume a portion of the risk of loss for their respective institutions. Each university is exposed to various risks of loss related to torts; theft of, damage to, or destruction of assets; errors or omissions; job-related illnesses or injuries to employees; health and other medical benefits

provided to employees and their dependents. The universities individually handle these risks of loss through combinations of risk retention and commercial insurance. The amount of settlements did not exceed insurance coverage in the past three fiscal years. The universities' estimated liability for unpaid claims at June 30, 2003 was \$43.5 million.

B. Investment in Joint Venture

To finance the construction of the Indianapolis Maintenance Center (IMC) at Indianapolis International Airport, the Authority, a City of Indianapolis/Marion County-related financing authority (the City) and the Indianapolis Airport Authority (the Airport Authority) entered into a number of agreements, including leases, providing for the acquisition, construction, equipping and financing of the IMC (collectively, the Joint Venture).

Under the Joint Venture, the Authority's undivided interest as a tenant in the IMC is determined in proportion to the money it contributes to the acquisition, construction and equipping of the IMC from proceeds of the Authority's revenue bonds issued to finance the IMC. The City's and the Airport Authority's undivided interests are established in the same way, but by reference to the amount of money they contribute to the IMC from their revenue bond proceeds.

The Authority leases its undivided interest in the IMC to the Airport Authority. Upon termination of that lease, the Airport Authority will succeed to the Authority's interest in the Joint Venture. The Airport Authority is obligated to pay the Authority lease rentals sufficient to pay the principal of and interest on the revenue bonds and additional rentals sufficient to pay Authority expenses and ground rent obligations. The Airport Authority expects to pay the lease rentals through appropriations made by the General Assembly.

Financial Statements can be obtained from the

Indiana Transportation Finance Authority as noted in Note I(A).

C. Segment Information - Enterprise Funds

The State of Indiana has six major enterprise funds, which are intended to be self-supporting through user fees charged for services to the public. The Toll Roads collect fees for repayment of road construction and maintenance of roads. The ITFA Aviation Technology Bond Fund accounts for the financing of a portion of the costs of the Aviation Technology Center located at Indianapolis International Airport. The ITFA Airport Facilities Bond Fund accounts for the financing of improvements for the airport or aviation-related property or facilities, including the acquisition of real estate. The State Revolving Fund uses proceeds from bonds to assist qualified local governments in obtaining below market financing for water pollution control projects. The Unemployment Compensation Fund collects employer taxes and the federal share of unemployment compensation. Benefits are paid to eligible individuals. The State Lottery Commission provides money for various pension and educational funds, as well as for local building projects.

Four of these enterprise funds, the Toll Roads, the ITFA Aviation Technology Bond Fund, the ITFA Airport Facilities Bond Fund and the State Revolving Fund, are reported as segments. These four have debt secured by a pledged revenue stream and are externally required to be accounted for separately by their bond indentures.

Included below is segment information for enterprise funds for the fiscal year ended June 30, 2003.

	Toll Roads	Transportation Finance Authority Aviation Technology Bonds Uses proceeds of bonds to assist airport or aviation related property or facilities referred to by the Aviation Technology Center

D. Subsequent Events

During the first five months of FY 2003, the State experienced actual revenue shortfalls of \$140.3 million.

Subsequent to June 30, 2003, the Bond Bank has closed the following new bond issues: Reassessment Assistance Program Bonds Series 2003B in the amount of \$5.1 million, Reassessment Assistance Midyear Program Note in the amount of \$22.6 million, and Common School Advancement Purchase Refunding Bonds, Series A and B in the amounts of \$35.6 million and \$107.9 million, respectively.

During FY 2004, Institutional Industries entered into a lease purchase agreement for the construction of a building that will house its new commissary operation. Total payments over the term of the 30-year lease will total \$23,989,180, payments for which will commence in November, 2003, upon completion of the building.

The 2003A Highway Revenue bond anticipation notes in the amount of \$150.1 million were refunded in September, 2003, through Highway Revenue bonds, series 2003A, in the amount of \$433.2 million. The remaining amount of \$282.1 million was used to fund new projects.

E. Contingencies and Commitments

Litigation

The State does not establish reserves for judgments or other legal or equitable claims. Judgments and other such claims must be paid from unappropriated fund balances. With respect to tort claims only, the State's liability is limited to \$300,000 for injury or death of one person in any one occurrence and \$5 million for injury or death of all persons in that occurrence.

The Indiana Attorney General's office estimates a total payment for liabilities of \$4.5 million to \$5 million to be made from the Tort Claim Fund during the next fiscal year. During fiscal year ending June 30, 2003 the State paid \$6.2 million for settlements, judgments, claims and litigation expenses from the Tort Claim Fund.

The Indiana Attorney General's office is currently handling the following cases that could result in significant liabilities to the State:

In 1998, a group of (1) pediatric dentists who are Medicaid providers, and (2) Medicaid recipients of those services, filed a class action lawsuit against the State and its agent, Electronic Data Systems (EDS). The suit challenged the Medicaid reimbursement system for pediatric dental services under both federal

and state law. The Johnson County Superior Court granted summary judgment to the State on the federal law claims. The plaintiffs claim damages against the State in the amount of approximately \$17 million. Mediation was not successful. The state law claims are set for a court trial in February 2004.

In 2000, a gaming corporation operating one of the riverboats challenged the interpretation the Department of Revenue has placed on the Riverboat Gaming Tax, claiming that the tax is not an add-back for adjusted gross income tax and supplemental net income tax purposes. The case has been pending before the Tax Court on cross motions for summary judgment since 2001. The potential financial impact of this case is between \$5 million and \$10 million, with additional impact because of the precedent it would have on other riverboat casino operations.

In 2002, six federal retirees filed a class action complaint claiming that the Indiana method of taxing federal employees' retirement benefits results in greater taxation than is collected from retirees who collect social security, violating federal statutes and the U. S. Constitution. The total exposure exceeds \$5 million. Tax Court decision on partial summary judgment, entered in October 2003, upheld limits on who can be class members as stated in IC 6-8.1-9-7, thus significantly reducing potential exposure.

In July 2002, a corporation filed a breach of contract action against the Department of Environmental Management (IDEM) alleging that IDEM failed to abide by the terms of an agreed order relating to clean-up costs directed by the federal government. The plaintiff is seeking \$5 million in damages. Both State's Motion to Dismiss and Corporation's Motion for Summary Judgment were denied. Discovery is ongoing. Dispositive motions are due in December 2003 and trial is set for April 2004.

In August 2002, a large accounting firm hired to conduct the reassessment of real property in Lake County filed a breach of contract suit seeking \$12 million. Plaintiff asserts that the State approved invoices then failed to abide by contractual provision requiring it to take steps to force Lake County to pay invoices. Plaintiffs have moved for Partial Summary Judgment. Response is due in December 2003. Argument will be held in February 2004.

In January 2003, a large business with facilities in East Chicago filed an amended complaint in Marion Superior Court that claims East Chicago improperly reduced the assessed value it reported from \$1.2 billion to \$750 million during the process of determining budgets, rates and levies for 2002.

Plaintiff claims that various local and State officials did not follow proper procedures, which resulted in a tax rate that was higher than it should have been and an increased tax burden on the plaintiff. In addition, plaintiff claims that IC 6-1.1-17-0.5 permits an unconstitutional non-uniform and unequal rate of assessment. Claims are asserted against the County and State in unspecified amounts but could be several million dollars. The State filed motion to dismiss in March 2003. The same allegations by the same business were filed as a new case in Tax Court in April 2003. Briefings are scheduled for Tax Court case in October and December 2003.

In October 2003, a large group of financial services companies filed a case claiming that they are not subject to Indiana's financial institutions tax because they have no physical presence in this state and, therefore, the required nexus to tax is lacking. They claim that Indiana's requirements for doing business "within Indiana" are not consistent with recent decisions about what constitutes substantial nexus and that imposition of the financial institutions tax on them violates the Commerce Clause and the Equal Protection Clause of the U. S. Constitution. The State's exposure is approximately \$5 million to \$6 million.

The State intends to vigorously defend each of the foregoing suits or other claims.

In addition, the State Lottery Commission (the Commission) is the defendant in a class action suit. During 1997, a suit was filed in Marion County Court seeking class action status on behalf of all persons denied prizes on tickets submitted beyond the final sixty-day (60) claim period. Although the trial court granted the Commission's motion to dismiss the case, the Indiana Court of Appeals reversed that decision and ruled that the plaintiff was entitled to a trial on the merits. The Indiana Supreme Court chose not to alter the appellate decision thereby returning the matter to the original court of trial.

In July 2003, the trial court conditionally certified two classes: (1) A class of all persons who, prior to 1997, purchased and presented winning instant tickets for payment after the sixty (60) day claim period and were denied the associated prizes; and (2) A class of all persons who, prior to 1997, purchased winning instant tickets and have never presented the tickets for payment. Management and its legal counsel intend to vigorously defend the Commission's position and believe the Commission will prevail. However, the Commission cannot predict the final resolution of this matter or whether its resolution could materially affect the Commission's results of operations, cash flows or financial position.

Loss from reimbursement agreement

The Indiana Development Finance Authority (IDFA) is a party to a Reimbursement Agreement with Qualitech Steel Corporation (Qualitech) and a bank relating to the \$33.1 million Indiana Development Authority Taxable Variable Rate Demand Economic Development Revenue Bonds, Series 1996 (the Bonds). The proceeds of the bonds were used by Qualitech to help construct Qualitech's special bar quality steel mini-mill facility in Pittsboro, Indiana. The company filed for Chapter 11 bankruptcy in 1999 and the senior lenders purchased the assets of Qualitech in a credit bid. The senior lenders operated Qualitech SBQ, LLC until it ceased operations in January 2001. IDFA and the State are working with local officials to encourage potential purchasers.

To induce the bank to issue a letter of credit used as credit enhancement in the marketing of the bonds, the IDFA agreed to certain provisions in the Reimbursement Agreement. These provisions require the IDFA, in the event of certain defaults by Qualitech to either (1) pay bond and related expenses from certain monies legally available to the IDFA, or (2) seek an appropriation from the Indiana General Assembly to repay the bank the amounts due under the Reimbursement Agreement. The Amended Reimbursement Agreement requires that IDFA maintain the debt service reserve fund at the "fullyfunded" level, and it stipulates no declaration of default so long as bond and related payments are made.

In the fiscal year ending June 30, 2003, IDFA made bond and related payments of approximately \$2.0 million for Qualitech. In the 2003-2005 biennial budget, the Indiana General Assembly appropriated \$5.7 million for Qualitech bond and related payments, negating the need to access any IDFA guaranty funds in either FY 2004 or FY 2005.

IDFA could be obligated to pay the outstanding balance of the bond issue, which would result in recognition of losses in future years. The amount of this contingency is the outstanding principal of the bonds totaling \$26.3 million as of June 30, 2003. Debt service reserve fund aggregating \$3.7 million are currently held in trust and may be available to reduce the contingency obligation.

IDFA is also a party to a Reimbursement Agreement with Heartland Steel Corporation (Heartland) and a bank relating to the \$13.8 million Indiana Development Authority Taxable Variable Rate Demand Economic Development Revenue Bonds, Series 1998 (the Bonds).

The proceeds of the bonds were used by Heartland to help construct Heartland's steel mini-mill facility in Vigo County, Indiana. The company filed for Chapter 11 bankruptcy in January 2001 and CSN, a Brazilian steel company, purchased the assets of Heartland.

To induce the bank to issue a letter of credit used as credit enhancement in the marketing of the bonds, the IDFA agreed to certain provisions in the Reimbursement Agreement. These provisions require the IDFA, in the event of certain defaults by Heartland to either (1) pay bond and related expenses from certain monies legally available to the IDFA, or (2) seek an appropriation from the Indiana General Assembly to repay the bank the amounts due under the Reimbursement Agreement. The Amended Reimbursement Agreement requires that IDFA maintain the debt service reserve fund at the "fully-funded" level, and it stipulates no declaration of default so long as bond and related payments are made.

In the fiscal year ending June 30, 2003, IDFA made bond and related payments of approximately \$0.8 million for Heartland. In the 2003-2005 biennial budget, the Indiana General Assembly appropriated \$2.4 million for Heartland bond and related payments. IDFA could be obligated to pay the outstanding balance of the bond issue, which would result in recognition of losses in future years. The amount of this contingency is the outstanding principal of the bonds totaling \$11.4 million as of June 30, 2003. Debt service reserve fund aggregating \$2.2 million are currently held in trust and may be available to reduce the contingency obligation.

Federal Grants.

The State has received federal grants for specific purposes that are subject to review and audit by the grantor agencies. Although such audits could generate expenditure disallowances under the terms of the grants, it is believed that any required reimbursements will not be material.

F. Other Revenue

Other revenue represents revenue received which cannot accurately be included with any of the other revenue sources. In most cases, the amount of "other revenue" received by a fund is insignificant in comparison with total revenues received.

G. Economic Stabilization Fund

In 1982 the Indiana General Assembly adopted Indiana Code 4-10-18, which established the Counter-Cyclical Revenue and Economic Stabilization

Fund ("Rainy Day Fund").

This fund was established to assist in stabilizing revenue during periods of economic recession and is accounted for within the State general fund.

Each year the State Budget Director determines calendar year Adjusted Personal Income (API) for the State and its growth rate over the previous year, using a formula determined by the legislature.

In general, monies are deposited automatically into the Rainy Day Fund if the growth rate in API exceeds 2%; monies are removed automatically from the Rainy Day Fund if API declines by more than 2%. All earnings from the investments of the Rainy Day Fund remain in the Rainy Day Fund. If the balance in the fund at the end of the fiscal year exceeds 7% of total general fund revenues for the same period, the excess is transferred from the Rainy Day Fund into the Property Tax Replacement Fund.

Loans can be made from the Rainy Day Fund to local units of government for specific purposes. The Rainy Day Fund cash and investment balance at the end of fiscal year 2003 was \$248.1 million. Total outstanding loans were \$30.4 million, resulting in total assets of \$278.5 million.

H. Deferred Compensation

The State offers its employees a deferred compensation plan (the plan) created in accordance with Internal Revenue Code Section 457. The plan, available to all State employees and employees of certain quasi-agencies and political subdivisions within the State, permits them to defer a portion of their salary until future years. The deferred compensation is not available to employees until termination, retirement, death, or unforeseeable emergency.

All amounts of compensation deferred under the plan, all property and rights purchased with those amounts, and all income attributable to those amounts, property, or rights are (until paid or made available to the employee or other beneficiary) held for the exclusive benefit of participants of the plan and their beneficiaries as required by section 457(g) of the Internal Revenue Code. In addition, the State has an Indiana Incentive Match Plan which provides \$15 per pay period for each employee who contributes to the 457 Plan.

The State has established a deferred compensation committee that holds the fiduciary responsibility for the plan. The committee holds the deferred amounts in pension and other employee benefit trust funds.

I. Employee Retirement Systems and Plans

The State of Indiana sponsors eight public employee retirement systems (PERS) that are included in the State's financial statements. They are reported and administered as described in Note I(A).

<u>Summary of Significant Accounting Policies (Primary government and discretely presented component units)</u>

The accrual basis is used for financial statement reporting purposes. Contributions are considered due when the related payroll is issued by the employer and recognized as a receivable at that time. Employers are not required to submit the contributions until the month following the end of the quarter. Legislators receive the majority of their pay in January and February and the contributions are transferred on the pay dates. Therefore, no receivable is established for the legislators' retirement funds. According to the plans' policies, benefits and refunds are due at time of payment. Therefore no liability has been accrued.

Investments of defined benefit plans are reported at fair value. Short-term investments are reported at cost, which approximates fair value.

Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Mortgages are valued on the basis of future principal and interest payments, and are discounted at prevailing interest rates for similar instruments. Investments that do not have an established market are reported at estimated fair value.

The buildings purchased as investments by the Public Employees Retirement Fund (PERF) are reported at cost as there has not been a recent independent appraisal. The buildings are immaterial to PERF's total investments.

The state sponsors the following defined benefit single-employer plans:

<u>State Police Retirement Fund (Presented as a pension fund)</u>

<u>Plan Description</u> The State Police Retirement Fund (SPRF), is a defined benefit, single-employer PERS, and is administered by the Indiana Department of State Police. Indiana Code 10-1-1 grants authority to the Department to establish and operate an actuarially sound pension plan governed by a pension trust and to make the annual contributions necessary to prevent any deterioration in the actuarial status of the trust fund.

<u>Funding Policy</u> The pre-1987 plan requires employee contributions of five percent of the salary of a third-year trooper. The 1987 plan applies to all officers hired after June 30, 1987. In addition, state police officers hired prior to July 1, 1987 could elect to be covered under this plan if the employee filed an election with the trustee before July 1, 1989. Participants under the 1987 plan contribute six percent of their monthly base salary.

Periodic employer contributions to the pension plan are determined on an actuarial basis using the entry age normal actuarial cost method. Normal cost is funded on a current basis. The unfunded actuarial accrued liability is funded over a forty year period. Periodic contributions for both normal cost and the amortization of the unfunded actuarial accrued liability are based on the level percentage of payroll method. The funding policy for normal cost and unfunded actuarial accrued liability should provide sufficient resources to pay employee pension benefits on a timely basis.

The State is required to contribute at an actuarially determined rate; the current rate is 20.3% of covered payroll.

Excise Police and Conservation Enforcement Officers'
Retirement Plan (Presented as part of PERF – a
discretely presented component unit)

<u>Plan Description</u> The Excise Police and Conservation Enforcement Officers' Retirement Plan (ECRP) is a defined benefit single-employer plan administered by the Board of Trustees of the Public Employees' Retirement Fund. The retirement fund is for employees of the Indiana Department of Natural Resources and Indiana Alcohol and Tobacco Commission who are engaged exclusively in the performance of law enforcement duties.

The Excise Police and Conservation Enforcement Officers' Retirement Plan provides retirement, disability, and survivor benefits. Indiana Code 5-10-5.5 governs the requirements of the Fund. The Public Employees' Retirement Fund Board of Trustees issues a publicly available financial report that includes financial statements and required supplementary information for the plan as a whole. That report may be obtained by writing the Public Employees Retirement Fund, Harrison Building, Room 800, 143 West Market Street, Indianapolis, IN 46204, or by calling 317-233-4162.

<u>Funding Policy</u> Members are required by statute to contribute three percent of the first \$8,500 of annual salary to the Plan. The State of Indiana, as employer, is required by statute to contribute the remaining

amount necessary to actuarially finance the coverage; the current rate is 19.0% of covered payroll.

The funding policy for employer contributions of the Excise Police and Conservation Enforcement Officers' Retirement Plan provides for biennial appropriations authorized by the Indiana General Assembly, which when combined with anticipated member contributions are sufficient to actuarially fund benefits (normal cost), amortize the unfunded accrued liability for forty years, and prevent the state's unfunded accrued liability from increasing.

<u>Prosecuting Attorneys' Retirement Fund (Presented as part of PERF – a discretely presented component unit)</u>

<u>Plan Description</u> The Prosecuting Attorneys' Retirement Fund (PARF) is a defined benefit single-employer plan administered by the Board of Trustees of the Public Employees' Retirement Fund. The Prosecuting Attorneys' Retirement Fund provides retirement, disability retirement, and survivor benefits for individuals who serve as a prosecuting attorney or chief deputy prosecuting attorney on or after January 1, 1990.

These individuals are paid from the General Fund of the State of Indiana. Indiana Code 33-14-9 governs the requirements of the Fund. The Public Employees' Retirement Fund Board of Trustees issues a publicly available financial report that includes financial statements and required supplementary information for the plan as a whole. That report may be obtained by writing the Public Employees Retirement Fund, Harrison Building, Room 800, 143 West Market Street, Indianapolis, IN 46204, or by calling 317-233-4162.

<u>Funding Policy</u> Contributions made by or on the behalf of members are not actuarially determined but are set by statute at six percent (6%) of wages. The amount required to actuarially fund participants' retirement benefits, as determined by the Board of Trustees on the recommendations of an actuary, is to be appropriated from the State's General Fund.

<u>Legislators' Retirement System – Legislators' Defined</u> <u>Benefit Plan (Presented as part of PERF – a discretely presented component unit)</u>

<u>Plan Description</u> The Legislators' Defined Benefit Plan (IC 2-3.5-4), a defined benefit single-employer PERS, applies to each member of the General Assembly who was serving on April 30, 1989 and files an election under IC 2-3.5-3-1(b). The Legislators' Defined Benefit Plan provides retirement, disability and survivor benefits. The plan is administered by the Board of Trustees of the Public Employees'

Retirement Fund. The Public Employees' Retirement Fund Board of Trustees issues a publicly available financial report that includes financial statements and required supplementary information for the plan as a whole. The report may be obtained by writing the Public Employees Retirement Fund, Harrison Building, Room 800, 143 West Market Street, Indianapolis, IN 46204, or by calling 317-233-4162.

<u>Funding Policy</u> The amount required by the funding policy to actuarially fund participants' retirement benefits, as determined by the Board of Trustees on the recommendation of an actuary, is to be appropriated from the State's General Fund.

<u>Judges' Retirement System (Presented as part of PERF – a discretely presented component unit)</u>

Plan Description The Judges' Retirement System (JRS) is a defined benefit single-employer Public Employee Retirement System administered by the Board of Trustees of the Public Employees' Retirement Fund. The Judges' Retirement System provides retirement, disability retirement, and survivor benefits. Coverage is for any person who has served, is serving or shall serve as a regular judge of any of the following courts: Supreme Court of the State of Indiana; Circuit Court of any Judicial Circuit; Indiana Tax Court; County Courts including Circuit, Superior, Criminal, Probate, Juvenile, Municipal and County Court. IC 33-13-10.1 applies to judges beginning service after August 31, 1985. Indiana Code 33-13-8 governs the requirements of the Fund. The Public Employees' Retirement Fund Board of Trustees issues a publicly available financial report that includes financial statements and required supplementary information for the plan as a whole. That report may be obtained by writing the Public Employees Retirement Fund, Harrison Building, Room 800, 143 West Market Street, Indianapolis, IN 46204, or by calling 317-233-4162.

<u>Funding Policy</u> Member contributions are established by statute at six percent of total statutory compensation. However, no contribution is required and no such amounts shall be paid on behalf of any participant for more than twenty-two years.

Employer contributions are determined by the Indiana General Assembly as biennial appropriations from the State General Fund. Indiana Code 33-13-8-16(a)(1) provides that this appropriation only include sufficient funds to cover the aggregate liability of the Fund for benefits to the end of the biennium, on an actuarially funded basis. In addition to the General Fund appropriations, the statutes provide for remittance of docket fees and court fees. These are considered employer contributions.

The State sponsors the following defined benefit agent multiple-employer plan:

<u>Public Employees' Retirement Fund (Presented as part of PERF – a discretely presented component unit)</u>

Plan Description The Public Employees' Retirement Fund (PERF) is a defined benefit agent multipleemployer plan administered by the Public Employees' Retirement Fund Board of Trustees. PERF provides retirement, disability retirement, and survivor benefits. Indiana Code 5-10.2 and 5-10.3 governs the requirements of the Fund. The Public Employees' Retirement Fund Board of Trustees issues a publicly available financial report that includes financial statements and required supplementary information for the plan as a whole. The report may be obtained by writing the Public Employees Retirement Fund, Harrison Building, Room 800, 143 West Market Street, Indianapolis, IN 46204, or by calling 317-233-4162. At June 30, 2003, the number of participating political subdivisions was 1,049.

<u>Funding Policy</u> The State of Indiana and any political subdivision that elects to participate in the PERF fund is obligated by statute to make contributions to the

plan. The required employer contributions are determined by the Board of Trustees based on actuarial investigation and valuation. PERF funding policy provides for periodic employer contributions at actuarially determined rates, that, expressed as percentage of annual covered payroll, are sufficient to fund the pension portion of the retirement benefit (normal cost). administrative expenses. anticipated increase in the unfunded actuarial accrued liability for the next fiscal year. In addition, employers must remit quarterly payment of the amortization of the initial prior service cost. The amortization period is forty years for those employers whose effective date of participation was before 1985. Thereafter, employers joining have the prior service cost amortized over fifteen years.

Contributions made by or on the behalf of members are not actuarially determined but are set by statute at three percent (3%) of wages. These contributions are credited to the member's annuity savings account that funds the annuity portion of the retirement benefit.

The State is required to contribute for state employees at an actuarially determined rate; the current rate is 5.1% of covered payroll.

The Annual Pension Cost and Net Pension Obligations, the significant actuarial assumptions, and the historical trend information of the single and agent multiple employer defined benefit plans are as follows:

(amounts expressed in thousands)	Primary Government	Discretely Presented Component Unit

The State sponsors the following cost-sharing multiple-employer plans:

State Teachers' Retirement Fund (Presented as a discretely presented component unit)

Plan Description The State Teachers' Retirement Fund (STRF), is a defined benefit, multiple-employer cost-sharing PERS, administered by the Indiana State Teachers' Retirement Fund Board of Trustees. Indiana Code 21-6.1 governs the requirements of the Fund. The Indiana State Teachers' Retirement Fund Board of Trustees issues a publicly available financial report that includes financial statements and required supplementary information for the plan as a whole. That report may be obtained by writing the Indiana State Teachers' Retirement Fund, 150 West Market Street, Indianapolis, IN 46204, or by calling 317-232-3860.

At June 30, 2003, the number of participating employers was 363.

<u>Funding Policy</u> Each school corporation contributes the employer's share to the Fund for certified employees employed under a federally funded program and all the certified employees hired after July 1, 1995 (post July 1, 1995 plan). The employer's share of contributions for certified personnel who are not employed under a federally funded program or were hired before July 1, 1995 is considered to be an obligation of, and is paid by, the State of Indiana (pre July 1, 1995 plan). The pre July 1, 1995 plan is on a "pay as you go" basis. State appropriations are made for the amount of estimated pension benefit payouts for each fiscal year. These appropriations

include revenues from the State Lottery Commission.

1977 Police Officers' and Firefighters' Pension and Disability Fund (Presented as part of PERF – a discretely presented component unit)

Plan Description The 1977 Police Officers' and Firefighters' Pension and Disability Fund (PFPF) is a defined benefit, multiple employer cost sharing Public Employees Retirement System administered by the Public Employees' Retirement Fund Board of PERF provides retirement, disability Trustees. retirement, and survivor benefits. Indiana Code 36-8-8 governs the requirements of the Fund. The Public Employees' Retirement Fund Board of Trustees issues a publicly available financial report that includes financial statements and required supplementary information for the plan as a whole. The report may be obtained by writing the Public Employees Retirement Fund, Harrison Building, Room 800, 143 West Market Street, Indianapolis, IN 46204, or by calling 317-233-4162.

At June 30, 2003, the number of participating employer units totaled 156 (245 police and fire departments).

<u>Funding Policy</u> A participant is required by statute to contribute six percent of a first-class patrolman or firefighter's salary for the term of their employment up to thirty-two years. Employer contributions are determined actuarially. The funding policy mandated by statute requires quarterly remittances of member and employer contributions based on percentages of locally established estimated salary rates, rather than actual payroll.

The annual required contributions, percentage contributed, and historical trend information, for the cost sharing, multiple-employer plans are as follows:

	Discretely Presented Component Units								
		STRF		PFPF*					
Historical Trend Information Year ended June 30, 2003 Annual required contribution percentage contributed	\$	638,541.1 94%	\$	98,686.9 85%					
Year ended June 30, 2002 Annual required contribution percentage contributed	\$	572,226.2 99%	\$	91,914.0 93%					
Year ended June 30, 2001 Annual required contribution percentage contributed	\$	537,789.7 128%	\$	82,654.7 93%

The State sponsors the following defined contribution plan:

<u>Legislators' Retirement System – Legislators' Defined</u> <u>Contribution Plan (Presented as part of PERF – a</u> <u>discretely presented component unit)</u>

Plan Description The Legislators' Contribution Plan (IC 2-3.5-5), a single employer defined contribution plan applies to each member of the General Assembly who was serving April 30, 1989 and files an election under IC 2-3.5-3-1(b), and each member of the General Assembly who is elected or appointed after April 30, 1989. The plan provides retirement and survivor benefits. The plan is administered by the Board of Trustees' of the Public Employees' Retirement Fund. The Public Employees' Retirement Fund Board of Trustees issues a publicly available financial report that includes financial statements and required supplementary information for the plan as a whole. That report may be obtained by writing the Public Employees Retirement Fund, Harrison Building, Room 800, 143 West Market Street, Indianapolis, IN 46204, or by calling 317-233-4162.

<u>Funding Policy</u> For the Legislators' Defined Contribution Plan, each participant is required to contribute five percent of his annual salary. In

addition, the State of Indiana is required to contribute twenty percent of the member's annual salary on behalf of the participant.

Discretely Presented Component Units

Governmental and proprietary fund types Employees of the Indiana Development Finance Authority, the Indiana Housing Finance Authority, and the Indiana Bond Bank are covered by the Public Employees' Retirement Fund (PERF). Contributions made during the fiscal year are included in the disclosures for PERF.

<u>Colleges and Universities</u> Substantially all permanent employees of the college and universities in the State are covered by either the independently administered Teacher Insurance and Annuity Association (TIAA-CREF) or the Public Employees' Retirement Fund (PERF).

The TIAA-CREF plan is a defined contribution plan with contributions made to individually owned deferred annuity contracts. This plan offers career faculty and professional staff mobility since over 5,000 colleges and universities nationwide participate in TIAA-CREF. These are fixed contribution programs in which the retirement benefits received are based on the contributions made plus interest and dividends.

Participants in this plan are immediately vested. Eligibility and contribution requirements for TIAA-CREF are determined by each institution. Indiana University and Purdue University contributed \$107.3 million for 13,276 participants for the year ended June

30, 2003. Other staff employees are eligible to become members of PERF. Contributions by the institutions during fiscal year 2003 are included in the disclosures for PERF.

Budget/GAAP Reconciliation Major Funds

The cash basis of accounting (budgetary basis) is applied to each budget. The budgetary basis differs from GAAP. The major differences between budgetary (non-GAAP) basis and GAAP basis are:

(amounts expressed in thousands)	General Fund	Special Revenue Funds	Total
Net change in fund balances (budgetary basis)	\$ 188,603	\$ (28,191)	\$ 160,412
Adjustments necessary to convert the results of operations on a budgetary basis to a GAAP basis are:			
Revenues are recorded when earned (GAAP) as opposed to when cash is received (budgetary)	(893)	126,267	125,374
Expenditures are recorded when the liability is incurred (GAAP) as opposed to when payment is made (budgetary)	(9,082)	(305,442)	(314,524)
Net change in fund balances (GAAP basis)	\$ 178,628	\$ (207,366)	\$ (28,738)

Infrastructure - Modified Reporting Condition Rating of the State's Highways and Bridges

Roads	Average Pavement Quality Index (PQI)						
	<u>2003</u>	<u>2002</u>	<u>2001</u>				
Interstate Roads (including Rest Areas and Weigh Stations)	87	N/A	87				
NHS Roads - Non-Interstate (including Rest Areas and Weigh Stations)	83	N/A	83				
Non-NHS Roads	80	N/A	80				

The condition of road pavement is measured using a pavement quality index (PQI), which is based on a weighted average of three distress factors found in pavement surfaces. The PQI uses a measurement scale that is based on a condition index ranging from zero for a failed pavement to 100 for a pavement in perfect condition. The condition index is used to classify roads in excellent condition (90-100), good condition (80-89), fair condition (70-79), and poor condition (less than 70). It is the State's policy to maintain Interstate and NHS Non-Interstate roads at an average PQI of 75 and Non-NHS roads at an average PQI of 65. Condition assessments are determined on an annual basis for Interstates and on a biennial basis for other roads.

Bridges	Average Sufficiency Rating						
	<u>2003</u>	<u>2002</u>	<u>2001</u>				
Interstate Bridges	91.1%	91.2%	N/A				
NHS Bridges - Non-Interstate	90.1%	91.2%	N/A				
Non-NHS Bridges	87.8%	88.1%	N/A				

The condition of the State's bridges is measured based on a sufficiency rating, which is based on a weighted average of four factors indicative of a bridge's sufficiency to remain in service. The sufficiency rating uses a measurement scale that ranges from zero for an entirely insufficient or deficient bridge to 100 for an entirely sufficient bridge. The sufficiency rating is used to classify bridges in excellent condition (90-100), good condition (80-89), fair condition (70-79), marginal condition (60-69) and poor condition (below 60). It is the State's policy to maintain Interstate bridges at a minimum sufficiency rating of 87%, NHS Non-Interstate bridges at 85%, and Non-NHS bridges at 83%. Sufficiency ratings are determined at least on a biennial basis for all bridges. Sufficiency ratings are determined more frequently for certain bridges depending on their design.

OTHER SUPPLEMENTARY INFORMATION

NON-MAJOR GOVERNMENTAL FUNDS

SPECIAL REVENUE FUNDS

Special revenue funds account for the proceeds of specific revenue sources that are legally restricted to expenditure for specified purposes. Funds of material significance are presented separately in these combining statements. All other funds are included under the description "Other Special Revenue Funds."

The following funds are used to account for welfare assistance and administration and other welfare-related entitlement programs:

County Welfare Administration State and Federal Welfare Assistance Federal Food Stamp Program Medicaid Indigent Care Trust

The following funds are used to account for transportation and motor vehicle related programs:

Bureau of Motor Vehicles Commission Primary Road and Street

The following funds are used to account for health and environmental programs:

Health and Environmental Programs Patients Compensation Fund

The following funds are used to receive and distribute certain revenues to the proper sources:

State Gaming Fund Bureau of Motor Vehicles Holding Account Student Loan Program

NON-MAJOR GOVERNMENTAL FUNDS

CAPITAL PROJECTS FUNDS

Capital project funds account for financial resources to be used by the State for the acquisition or construction of major capital facilities (other than those financed by proprietary and trust funds).

Post War Construction Fund - This fund accounts for new construction, rehabilitation and preventative maintenance of penal, benevolent and charitable institutions of the state.

Indiana Transportation Finance Authority Highway Revenue Bond Fund - This fund accounts for the financing of improvements for highway road and bridge projects that are managed by the Indiana Department of Transportation.

PERMANENT FUNDS

Permanent Funds account for resources of the State that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support State programs.

Common School Fund - The interest of the Common School Fund is annually appropriated for the purpose of making loans to school corporations for Capital Projects.

Veterans' Memorial School Construction Fund - This fund is used for the construction, remodeling, or repair of school buildings and classrooms.

Budget/GAAP Reconciliation Nonmajor Special Revenue Funds

The cash basis of accounting (budgetary basis) is applied to each budget. The budgetary basis differs from GAAP. The major differences between budgetary (non-GAAP) basis and GAAP basis are:

(amounts expressed in thousands)	Nonmajor Special Revenue Funds
Net change in fund balances (budgetary basis)	\$ (9,537)
Adjustments necessary to convert the results of operations on a budgetary basis to a GAAP basis are:	
Revenues are recorded when earned (GAAP) as opposed to when cash is received (budgetary)	401,688
Expenditures are recorded when the liability is incurred (GAAP) as opposed to when payment is made (budgetary)	(447,243)
Funds not subject to legally adopted budget	(957)
Net change in fund balances (GAAP basis)	\$ (56,049)

INTERNAL SERVICE FUNDS

Internal Service Funds account for the operations of State agencies that supply goods or services to other agencies of governmental units on a cost-reimbursement basis.

Institutional Industries - This fund accounts for revenues and expenses incurred from the operation of inmate employment programs. Goods produced or manufactured as a result of such programs are sold to state agencies and political subdivisions of the State as well as to the general public.

Administrative Services Revolving – This fund is used to account for the following three rotary funds.

Division of Information Technology Services provides telecommunications and data processing services to State agencies. Revenues consist of charges to user agencies.

Motor Pool Rotary Fund accounts for the operation and maintenance of State garages including the servicing and repair of all automotive equipment owned or controlled by the State. Revenues consist of charges to user agencies.

Printing Rotary Fund accounts for the operation of the State Print Shop, which provides printing services to other State agencies. Revenues consist of charges to user agencies.

Indiana Transportation Finance Authority Highway Bond Fund - This fund accounts for the financing of improvements for highway road and bridge projects that are managed by the Indiana Department of Transportation.

State Office Building Commission - This Commission, created as a public body both corporate and politic, is authorized by statute to issue debt obligations for financing of the Indiana Government Center and certain correctional facilities. The facilities are rented to the State of Indiana on a cost-reimbursement basis.

Recreational Development Commission - This Commission, created as a public body both corporate and politic, is authorized by statute to issue debt obligations for financing of the construction and renovation of state park inns. Lease agreements with the inns produce revenues sufficient to make the bond payments.

Self-Insurance Funds - The self-insurance funds consist of the **State Police Health Insurance Fund, State Employee Disability Fund, and the State Employee Health Insurance Fund.** These funds administer health insurance and disability plans for state employees and state police personnel.

FIDUCIARY FUNDS

Fiduciary funds account for assets held by or on behalf of the government in a trustee capacity or as an agent on behalf of others.

PENSION TRUST FUNDS

Pension trust funds are used to report resources that are required to be held in trust for the members and beneficiaries of defined benefit pension plans, defined contribution plans, and other post-employment benefit plans.

The Public Employees' Retirement Fund – This fund is a defined benefit agent multiple-employer plan administered by the Public Employees' Retirement Fund Board of Trustees.

The State Teachers' Retirement Fund – This fund is a defined benefit, multiple-employer cost-sharing public employee retirement system, administered by the Indiana State Teachers' Retirement Fund Board of Trustees.

Deferred Compensation Plan Fund - This fund is used to account for assets held for employees in accordance with the provisions of the Internal Revenue Code Section 457.

State Police Pension Fund - This fund is used to account for assets held for a defined benefit, single-employer public employee retirement system administered by the Indiana Department of State Police.

PRIVATE-PURPOSE TRUST FUNDS

Private-Purpose trust funds are used to account for trust arrangements in which both the principal and interest may be spent for the benefit of individuals, private organizations or other governments.

Property Custody Fund - This fund is used for safekeeping of funds held as unclaimed until such funds are presumed to be abandoned under IC 32-34-1-32.

Abandoned Property Fund - This fund is used to administer funds transferred from the Property Custody Fund under IC 32-9-1.5. When the balance of the Abandoned Property Fund exceeds \$500,000, the Treasurer of State may, and at least once each fiscal year shall, transfer this excess to the Common School fund.

Unclaimed Funds Fund - This fund is used to account for unclaimed warrants, checks, intestate estates, and other unclaimed property.

Private-Purpose Trust Fund - This fund is used to account for a group of fund centers under which principal and interest benefit individuals, private organizations, or other governments.

FIDUCIARY FUNDS

AGENCY FUNDS

Agency funds account for resources that are custodial in nature. They generally are amounts held by the State of Indiana on behalf of third parties.

Employee Payroll, Withholding and Benefits Funds - These funds are used for the disposition of various payroll-related deductions and contributions such as social security and insurance contributions.

Local Distributions Fund - This fund is composed of accounts used to distribute revenue collections to local units of government based upon statutory formulas.

Child Support Fund - This fund is used for the collection and distribution of child support payments.

Department of Insurance Fund - This fund includes security deposits of insurance companies, health maintenance organizations and third party administrators as required.

Other agency funds are composed of various escrows, revenue collection, and agency accounts for which the State acts in an agent capacity until proper disposition of the assets can be made.

NON-MAJOR DISCRETELY PRESENTED COMPONENT UNITS

PROPRIETARY FUNDS

Proprietary component units represent funds that are legally separate from the State of Indiana, but provide valuable and beneficial services to the State and its citizens. The non-major discretely presented component units consist of the following proprietary funds:

Secondary Market for Education Loans, Inc. - The purpose of this non-profit corporation is to purchase education loans in the secondary market.

Board for Depositories - The Board for Depositories is responsible for providing insurance on public funds in excess of the \$100,000 FDIC limit.

COLLEGES AND UNIVERSITIES

College and university funds are used to account for the operations of state-supported colleges and universities. The non-major discretely presented component units consist of the following institutions:

Vincennes University
Indiana State University
Ball State University
Ivy Tech State College
University of Southern Indiana

STATISTICAL SECTION

Hidden indoor well in basement

THE LEVI COFFIN HOUSE FOUNTAIN CITY, INDIANA

Now listed with the registry of National Historic Landmarks, the Levi Coffin House was a critical stop on Indiana's Underground Railroad — a network of antislavery supporters who helped escaped slaves to secretly reach freedom. Built in 1839 in Fountain City (then called Newport), the Coffin home was owned by Levi and Catherine

Coffin and was outfitted with many special features which helped their cause. A rare indoor well in the basement of the home held a secret supply of water for their additional guests. One of the home's bedrooms contained a concealed doorway to another room where runaway slaves could safely hide. The Coffins were so successful

in their endeavors that not a single slave they aided in Indiana — more than 2,000 in all — failed to achieve freedom.

Wagon used to conceal runaway slaves

Levi Coffin House

STATISTICAL AND ECONOMIC DATA

The Statistical Data are presented to give report users a better historical perspective and assist in assessing current financial status and trends of the governmental unit. Economic Data are presented to allow a broader understanding of the economic and social environment in which State government operates.

State of Indiana State Facts

AREA 36,185 square miles, including 253 square miles of water. Length, 275

miles breadth, 144 miles. Highest altitude, 1,257 feet in Wayne County;

lowest altitude, 320 feet in Posey County.

CLIMATE Four distinct seasons. Average temperatures in July range from 63 to 86

degrees Fahrenheit; January ranges from 17 to 35 degrees Fahrenheit. Record high: 116 degrees at Collegeville in 1936. Record low: 35 below zero at Greensburg in 1951. Average annual precipitation is 40 inches.

STATE CAPITAL Indianapolis (combination of Indiana and Greek word "polis" meaning city

-- thus, Indianapolis means "city of indiana").

STATE MOTTO The Crossroads of America. Adopted 1937.

STATE FLOWER Peony. Adopted 1957.

STATE TREE Tulip tree (yellow poplar). Adopted 1931

STATE BIRD Cardinal. Adopted 1933.

STATE SONG "On the Banks of the Wabash," by Paul Dresser. Adopted 1913

STATE POEM "Indiana", by Arthur Franklin Mapes, Kendallville. Adopted 1963.

STATE STONE Indiana limestone. Adopted 1971.

STATE SEAL The seal depicts a pioneer scene--a woodsman felling a tree, a buffalo

fleeing from the sound of the axe and the sun gleaming over a distant hill.

In use since 1801, the seal was officially adopted in 1963.

STATE FLAG The Indiana flag displays 19 gold stars surrounding a gold torch centered

on a rectangular field of blue. The torch stands for liberty and enlightenment. Thirteen stars in the outer circle represent the 13 original states; the five in the inner circle represent the five states next admitted to the Union. The star

above the torch stands for Indiana, the 19th state. Adopted 1917.

STATE NAME The name Indiana means "land of the Indian". It was coined in 1800

when Congress carved the new state of Ohio from the Northwest Territory and designated the remaining vast area as the Indiana Territory. The territorial name was retained when Indiana became a state in 1816.

NICKNAME The nickname for someone of Indiana birth or long residency is "Hoosier",

a word whose origin has never been determined. Some have said it stemmed from the pioneer custom of greeting night callers with, "Who's yere?" Others claimed it came from "hoosier men", referring to laborers for an early- day Indiana contractor named Sam Hoosier. Still others traced the word to the term "husher", meaning a river boat worker strong enough to "hush" any challenger, or to "hoozer", a dialect word meaning

hill-dweller.

State of Indiana Property Tax Schedules For Year Ended December 31, 2002

In the State of Indiana property taxes are levied by local units of government and overseen by the Indiana Department of Local Government Finance. The State of Indiana levies two rates of taxation against all taxable property in the State and Indiana Law fixes those rates. There is an eleven ten thousandths per one hundred dollars assessed value rate for the Indiana State Fair Board and a twenty-two tenthousandths rate for the Indiana State Forestry Fund.

Property taxes are collected by county treasurers and distributed by county auditors. County auditors are required by Indiana Law to file, with the Auditor of State, reports of property taxes charged, collected and distributed. It is from those reports the property tax information is provided on the following pages.

For property taxes payable in 2003 a statewide reassessment of property values is in progress. As of the publication of this 2003 Comprehensive Annual Financial Report the reassessment of property has not been completed for all counties and data is not available for all counties. On the following schedules, where applicable, it has been noted that the data is not available. In the 2004 Comprehensive Annual Financial Report complete schedules for 2003 property taxes payable will be included. Also, in the 2004 Comprehensive Annual Financial Report 2004 property taxes payable schedules will be included.

Property taxes paid by each property taxpayer in Indiana are reduced by a credit referred to as a property tax replacement credit. The credit is paid by the State to county treasurers and is funded by a portion of State sales tax, individual income tax and riverboat wagering taxes. County auditors distribute the credit to taxing units. The property tax replacement credit percentage is determined by a formula established by Indiana Law and is computed by the Indiana Department of Local Government Finance. There are two separate property tax replacement credits. One credit applies to real estate and individual personal property. The other property tax replacement credit applies to business personal property. The two credit percentages are different within each taxing district and there are different credit percentages for each taxing district. Both of the credit percentages are based on the type of taxes levied within each taxing district. Presently the average real estate and individual personal property credit is in the mid-twenty percent range and the business personal property credit is in the mid-teen percent range.

Residential property owners, who qualify, receive an additional credit on their property taxes. This credit is referred to as the homestead credit. There is a State homestead credit funded by a portion of the State sales tax, individual income tax and riverboat wagering taxes and in some counties there is a local homestead credit funded by a portion of their county option income tax. The State and local homestead credit is given on the residential taxes after the taxes have been reduced by the property tax replacement credit. The State homestead credit is paid by the State to county treasurers and, where applicable, the local homestead credit is paid by county auditors to county treasurers. County auditors distribute the homestead credit to taxing units. On the following schedules the State paid homestead credit and the locally funded homestead credit are shown in separate columns. The homestead credit percentages are determined by a formula established by Indiana Law and are computed by the Indiana Department of Local Government Finance. There are different homestead credit percentages for each taxing district, because the credit percentages are based on the type of taxes levied within each taxing district. Presently the State homestead credit percentages range between nine and fifteen percent and local homestead credit percentages range between three and eight percent.
