Overview

Pursuant to Public Law 130-2009, the Division had to publish protocols in order to facilitate making Odyssey public case data available to other court case management systems currently operating in the State of Indiana. The purpose of the interface is to share case information. Until recently, there had been no interest in implementing this protocol. The Division anticipated that the protocol would be modified once the technical work began. Because of this, the Division's Judicial Technology and Automation Committee (JTAC) staff reserve the right to modify this protocol as changes in the business needs are identified. JTAC will publish these changes as quickly as possible and will share with interested parties.

Odyssey data is exposed via a web service that provides the ability to search case data by case number, county, first name and last name. The data includes a wide array of information pertaining to the case including parties, charges, dispositions, hearings, judgments and sentences (depending on the case type).

Data exposed by this web service should not be used to build and maintain an external data store as some data may become restricted from public access and some data identifiers/associations may change over time.

Technical Details

The web service exposes data via the Simple Object Access Protocol (SOAP). This protocol relies on XML for its message structure and therefore the case data is in the XML format. The endpoint for the service and the method is not published here for security reasons, but is readily available to appropriate parties upon request.

The GetCaseData method accepts 6 parameters:

- 1) UserID – User ID supplied to a CMS vendor by JTAC
- 2) Password - Password supplied to a CMS vendor by JTAC. This password can be changed with a request to JTAC.
- 3) Optional Parameters (note: at least one is required):
 - a. Case Number – The Court Case Number as it exists on the Odyssey case
 - b. County Code – (e.g. 2 for Allen County, 29 for Hamilton County)
 - c. Last Name – Last name of any party on the case (defendant, plaintiff, etc.)
 - d. First Name - First name of any party on the case (defendant, plaintiff, etc.)
