III. Biennial Regional Services Strategic Plan 2019-2020 Overview

The Indiana Department of Child Services (DCS) was created as a standalone agency in 2005, charged with administering Indiana's child protection services, foster care, adoption and the Title IV-D child support systems throughout the state of Indiana. After the Department was formed, DCS engaged national and local organizations for guidance and support to improve the system that cares for its abused and neglected children. This collaboration marked the beginning of Indiana's practice reform efforts. Over the course of the last 10 years, DCS has launched a number of initiatives to improve the manner in which child welfare is administered in Indiana, including the DCS practice model (Teaming, Engaging, Assessing, Planning and Intervening; TEAPI) and the Safely Home Families First Initiative.

In 2008 State legislation was passed that added the requirement for a Biennial Regional Services Strategic Plan that would be tailored toward the provision of services for children in need of services or delinquent children. The "Biennial Plan" incorporates the "Early Intervention Plan" and the "Child Protection Plan" as well as new requirements under the Biennial Plan. The Early Intervention Plan was a focus on programs and service to prevent child abuse and neglect or to intervene early to prevent families from entering the child welfare or delinquency system. The Child Protection Plan describes the implementation of the plan for the protective services of children. It included the following information: Organization; Staffing; Mode of operations; Financing of the child protection services; and the provisions made for the purchase of services and interagency relations.

The Regional Services Council is the structure responsible for this Biennial plan. The purpose of the Regional Services Council is to: Evaluate and address regional service needs, regional expenditures, and to Serve as a liaison to the community leaders, providers and residents of the region.

The Biennial Plan includes an evaluation of local child welfare service needs and a determination of appropriate delivery mechanisms. Local service providers and community members were represented in the evaluation of local child welfare service needs. A survey was sent to local providers as well as interested community partners. In addition, the regional services council conducted a meeting to take public testimony regarding local service needs and system changes.

The Department of Child Services began the process of analyzing service availability, delivery and perceived effectiveness in the summer of 2017. The planning process to develop the Plan involved a series of activities led by a guided workgroup composed of representatives from the Regional Service Council and others in the community. The activities included a needs assessment survey, public testimony, and review of relevant data. While DCS has several other means with which to determine effectiveness of DCS provided services, such as Federal Child and Family Services Review measures, practice indicator reports, Quality Service Reviews (QSRs) and Quality Assurance Reviews (QARs), this process took that information and looked at it through a contracted service lens. The workgroup considered this information in conjunction with the needs assessment, previous service utilization and public testimony to

determine the appropriate utilization of available services and to identify gaps in service. As a result, the workgroup developed a regional action plan to address service needs and gaps that are specific to the region. In addition, to address known statewide system issues, the Regional Action Plan includes specific action steps to address the following areas:

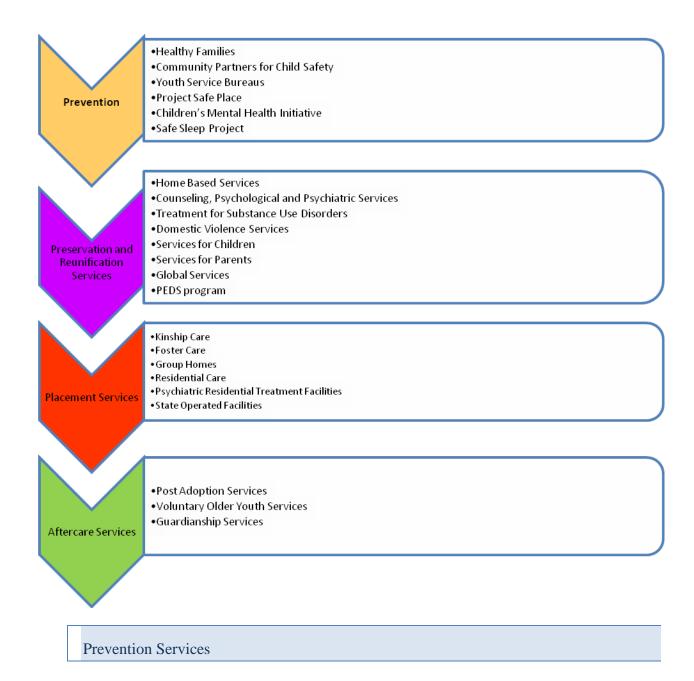

- **1.** Prevention Services
- 2. Maltreatment After Involvement
- **3.** Permanency for children in care 24+ months
- **4.** Substance Use Disorder Treatment

Biennial Regional Services Strategic Plans were approved by the Regional Service Council and subsequently submitted to the Director of the Department of Child Services on February 2, 2018 for final approval.

IV. Service Array

The Indiana Department of Child Services provides a full continuum of services statewide.

Those services can be categorized in the following manner:

Kids First Trust Fund

A member of the National Alliance of Children's Trusts, Indiana raises funds through license plate sales, filing fee surcharges, and contributions. This fund was created by Indiana statute, is overseen by a Board, and staffed by DCS. Kids First funds primary prevention efforts through the Prevent Child Abuse Indiana (PCAI), Healthy Families Indiana and the Community Partners for Child Safety program.

Youth Service Bureau

Youth Service Bureaus are created by Indiana statute for the purpose of funding delinquency prevention programs through a state-wide network. This fund supports 31 Youth Service Bureaus to provide a range of programs including: Teen Court, Mentoring, Recreation Activities, Skills Training, Counselling, Shelter, School Intervention, and Parent Education.

Project Safe Place

This fund, created by Indiana statute, provides a state-wide network of safe places for children to go to report abuse, neglect, and runaway status. These safe places are public places like convenience stores, police departments, fire departments and other places where children gather. Some emergency shelter is also funded through licensed emergency shelter agencies.

Community-Based Child Abuse Prevention

Federal funds available through the Child Abuse Prevention and Treatment Act (CAPTA) support building a community-based child abuse prevention network through which prevention services can be delivered.

Healthy Families Indiana (HFI)

A combination of federal, state, and local funding provides prevention home visiting services through contract to parents of children zero to three years old. The purpose is to teach parents to bond with and nurture their children. The program also advocates for positive, nurturing, non-violent discipline of children.

Community Partners for Child Safety (CPCS)

The purpose of this service is to develop a child abuse prevention service array that can be delivered in every region of the state. This service builds community resources that promote support to families identified through self-referral or other community agency referral to a service that will connect families to the resources needed to strengthen the family and prevent child abuse and neglect. It is intended, through the delivery of these prevention services, that the need for referral to Child Protective Services will not be necessary. Community resources

include, but are not limited to: schools, social services agencies, local DCS offices, Healthy Families Indiana, Prevent Child Abuse Indiana Chapters, Youth Services Bureaus, Child Advocacy Centers, the faith-based community, local school systems and Twelve Step Programs.

Maternal Infant Early Childhood Home Visiting (MIECHV)

Maternal Infant Early Childhood Home Visiting (MIECHV) grants are designed to: (1) strengthen and improve the programs and activities carried out under Title V of the Social Security Act; (2) improve coordination of services for at-risk communities; and (3) identify and provide comprehensive services to improve outcomes for families who reside in at-risk communities. The Indiana State Department of Health (ISDH) and the Department of Child Services (DCS) are co-leads of this federal grant, collaborate with Indiana University, Goodwill Industries of Central Indiana, Riley Child Development Center, Women, Infants, and Children (WIC), and the Sunny Start Healthy Bodies, Healthy Minds Initiative at the state agency level to achieve MIECHV goals.

The Indiana MIECHV funding supports direct client service through the expansion of two evidence-based home visiting programs, Healthy Families Indiana (HFI) and Nurse Family Partnerships (NFP), to pair families—particularly low-income, single-parent families—with trained professionals who can provide parenting information, resources and support during a woman's pregnancy and throughout a child's first few years of life. These models have been shown to make a real difference in a child's health, development, and ability to learn and include supports such as health care, developmental services for children, early education, parenting skills, child abuse prevention, and nutrition education or assistance.

Children's Mental Health Initiative

The Children's Mental Health Initiative (CMHI) provides service access for children with significant mental health issues who have historically been unable to access high level services. The Children's Mental Health Initiative specifically focuses on those children and youth who do not qualify for Medicaid services and whose families are struggling to access services due to their inability to pay for the services. The CMHI helps to ensure that children are served in the

most appropriate system and that they do not enter the child welfare system or probation system for the sole purpose of accessing mental health services.

The Children's Mental Health Initiative is collaboration between DCS and the local Access Sites, Community Mental Health Centers and the Division of Mental Health and Addiction. Available services include:

- Rehabilitation Option Services,
- Clinic Based Therapeutic and Diagnostic Services,
- Children's Mental Health Wraparound Services,
- Wraparound Facilitation,
- Habilitation,
- Family Support and Training,
- Respite (overnight respite must be provided by a DCS licensed provider), and
- Placement Services.

Eligibility for the CMHI mirrors that of Medicaid paid services under the Children's Mental Health Wraparound and includes:

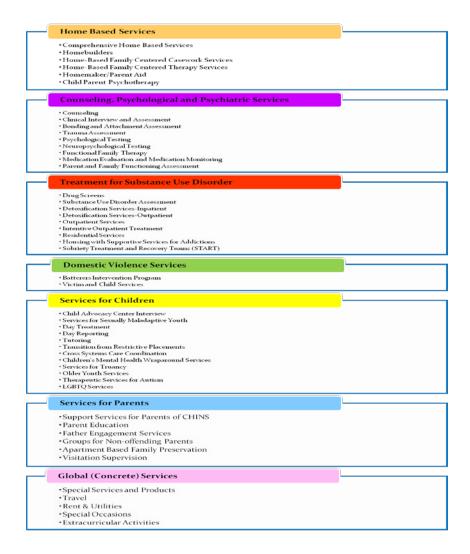

- DSM-V Diagnosis- Youth meets criteria for two (2) or more diagnoses.
- CANS 4, 5, or 6 and DMHA/DCS Project Algorithm must be a 1
- Child or adolescent age 6 through the age of 17
- Youth who are experiencing significant emotional and/or functional impairments that impact their level of functioning at home or in the community (e.g., Seriously Emotionally Disturbed classification)
- Not Medicaid Eligible/Lack funding for service array
- Other children who have been approved by DCS to receive services under the Children's Mental Health Initiative because they are a danger to themselves or others

Note: The Children's Mental Health Initiative is a voluntary service. The caregiver must be engaged in order to access services.

The CMHI started as a pilot project in 2012 and has spread throughout Indiana in 2013 and early 2014. The CMHI and the Family Evaluation process were implemented jointly to improve service access to families without requiring entry into the probation system or the child welfare system in order to access services. As the CMHI service availability expands, the need for Family Evaluations for this target population diminishes.

Preservation and Reunification Services

Indiana DCS will continue to provide a full service array throughout the state. Services provided to families will include a variety of services outlined below.

These services are provided according to service standards found at:

http://www.in.gov/dcs/3159.htm

Services currently available under the home based service array include:

Home Based Services			
Service Standard	Duration	Intensity	Conditions/Service Summary
Homebuilders * (Must call provider referral line first to determine appropriateness of services) (Master's Level or Bachelors with 2 yr experience)	4 – 6 Weeks	Minimum of 40 hours of face to face and additional collateral contacts	Placement Prevention: Provision of intensive services to prevent the child's removal from the home, other less intensive services have been utilized or are not appropriate or Reunification: it is an unusually complex situation and less intensive services are not sufficient for reunification to occur. Services are available 24/7 Maximum case load of 2-3
Home-Based Therapy (HBT) (Master's Level)	Up to 6 months	1-8 direct face-to face service hrs/week (intensity of service should decrease over the duration of the referral)	Structured, goal-oriented, time-limited therapy in the natural environment to assist in recovering from physical, sexual, emotional abuse, and neglect, mental illness, personality/behavior disorder, developmental disability, dysfunctional family of origin, and current family dysfunction. Service is available 24/7. Beginning 7/1/11, some providers will have a 1 hour response time for families in crisis. Maximum case load of 12.
Home-Based Casework (HBC) (Bachelor's Level)	Up to 6 months	direct face- to-face service hours/week (intensity of service should decrease over the duration of the referral)	Home-Based Casework services typically focus on assisting the family with complex needs, such as behavior modification techniques, managing crisis, navigating services systems and assistance with developing short and long term goals. Service is available 24/7. Beginning 7/1/11, some providers will have a 1 hour response time for families in crisis. Maximum case load of 12.
Homemaker/ Parent Aid	Up to 6	1-8 direct face-to-face	Assistance and support to parents who are unable to appropriately fulfill parenting and/or homemaking

Home Based Services			
Service Standard	Duration	Intensity	Conditions/Service Summary
(HM/PA) (Para-professional)	months	service hours/week	functions, by assisting the family through advocating, teaching, demonstrating, monitoring, and/or role modeling new, appropriate skills for coping. Some providers have a 1 hour response time for families in crisis. Maximum case load of 12.
Comprehensive Home Based Services	Up to 6 months	5-8 direct hours with or on behalf of the family	Utilizing an evidence-based model to assist families with high need for multiple home based intensive services. Additionally, will provide: supervised visits, transportation, parent education, homemaker/parent aid, and case management. Some evidence-based models require a therapist to provide home based clinical services and treatment. These services are provided by one agency. This is referable through service mapping or the Regional Services Coordinator Maximum case load of 5-8.

Comprehensive Home-Based Services

The most recent addition to the home-based service array includes Comprehensive Home-Based Services. Comprehensive Services include an array of home based services provided by a single provider agency. All providers offering services through this standard are required to utilize an Evidence-Based Practice (EBP) model in service implementation, which include but is not limited to, Motivational Interviewing, Trauma Focused Cognitive Behavioral Therapy and Child Parent Psychotherapy.

In addition, Family Centered Treatment is being supported by DCS as a model of Comprehensive Home-Based Services. This service provides intensive therapeutic services to families with children at risk of placement or to support the family in transitioning the child from residential placement back to the family. This model also is effective in working with families

who have very complex needs. The service works to implement sustainable value change that will improve life functioning and prevent future system involvement.

	Services Available Through Comprehensive Home Based Services				
Service Standard	Target Population	Service Summary			
FCT – Family Centered Therapy	 Families that are resistant to services Families that have had multiple, unsuccessful attempts at home-based services Traditional services that are unable to successfully meet the underlying need Families that have experienced family violence Families that have previous DCS involvement High risk juveniles who are not responding to typical community based services Juveniles who have been found to need residential placement or are returning from incarceration or residential placement 	This program offers an average of 6 months of evidence-based practice that quickly engages the entire family (family as defined by the family members) through a four-phase process. The therapist works intensively with the family to help them understand what their values are and helps motivate them to a sustainable value change that will improve the lives of the whole family.			

	Services Available Through Comprehensive Home Based Services			
Service Standard	Target Population	Service Summary		
MI – Motivational Interviewing	 Effective in facilitating many types of behavior change Addictions Non-compliance and running away of teens Discipline practices of parents. 	This program offers direct, client-centered counseling approaches for therapists to help clients/families clarify and resolve their ambivalence about change. Motivational Interviewing identifies strategies for practitioners including related tasks for the clients within each stage of change to minimize and overcome resistance. This model has been shown to be effective in facilitating many types of behavior change including addictions, non-compliance, running away behaviors in teens, and inappropriate discipline practices of parents.		
TFCBT — Trauma Focused Cognitive Behavioral Therapy	 Children ages 3-18 who have experienced trauma Children who may be experiencing significant emotional problems Children with PTSD 	This program offers treatment of youth ages 3-18 who have experienced trauma. The treatment includes child-parent sessions, uses psychoeducation, parenting skills, stress management, cognitive coping, etc. to enhance future safety. Treatment assists the family in working through trauma in order to prevent future behaviors related to trauma, and a non-offending adult caregiver must be available to participate in services.		
AFCBT – Alternatives for Families: A Cognitive Behavioral Therapy	 Children diagnosed with behavior problems Children with Conduct Disorder Children with Oppositional Defiant Disorder 	This program offers treatment to improve relationships between children and parents/caregivers by strengthening healthy parenting practices. In addition, services enhance child coping and social skills, maintains family safety, reduces coercive practices by caregivers and other family members, reduces the use of physical force by caregivers and the child and/ or		

	Services Available Through Comprehensive Home Based Services				
Service Standard	Target Population	Service Summary			
	Families with a history of physical force and conflict	improves child safety/welfare and family functioning.			
ABA – Applied Behavioral Analysis	• Children with a diagnosis on the Autism Spectrum	This program offers treatment for youth with autism diagnosis to improve functional capacity in speech and language, activities of daily living, repetitive behaviors and intensive intervention for development of social and academic skills.			
CPP – Child Parent Psychothera py	 Children ages 0-5 who have experienced trauma Children who have been victims of maltreatment Children who have witnessed DV Children with attachment disorders Toddlers of depressed mothers 	This program offers techniques to support and strengthen the caregiver and child relationship as an avenue for restoring and protecting the child's mental health, improve child and parent domains, and increase the caregiver's ability to interact in positive ways with the child(ren). This model is based on attachment theory but integrates other behavioral therapies.			

	Services Available Through Comprehensive Home Based Services			
Service Standard	Target Population	Service Summary		
IN-AJSOP	Children with sexually maladaptive behaviors and their families	This program offers treatment to youth who have exhibited inappropriate sexually aggressive behavior. The youth may be reintegrating into the community following out-of-home placement for treatment of sexually maladaptive behaviors. Youth may have sexually maladaptive behaviors and co-occurring mental health, intellectual disabilities or autism spectrum diagnoses. CBT-IN-AJSOP focuses on skill development for youth, family members and members of the community to manage and reduce risk. Youth and families learn specific skills including the identification of distorted thinking, the modification of beliefs, the practice of pro social skills, and the changing of specific behaviors		
Intercept	Children of any age with serious emotional and behavioral problems	Treatment is family-centered and includes strength-based interventions, including family therapy using multiple evidence-based models (EBM), mental health treatment for caregivers, parenting skills education, educational interventions, and development of positive peer groups.		

Sobriety Treatment and Recovery Teams

The program combines a specially trained Family Case Manager, Family Mentor, and Treatment Coordinator to serve families where there are children under the age of 5 and the parent struggles with a substance use disorder. The Family Mentor is someone who has had history with the child welfare system and is currently in recovery. The Family Mentor is paired with a Family Case Manager and they work the case in conjunction with one another in a dyad structure. Monroe County has 2 dyads and 1 Treatment Coordinator. DCS has seen promising results from the

program.

Trauma Assessments, TF-CBT, CPP

DCS recently expanded the service array to include Trauma Assessments and Bonding and Attachment Assessments. Trauma Assessments will be provided to appropriate children, using at least one standardized clinical measure to identify types and severity of trauma symptoms. Bonding and Attachment Assessments will use the Boris direct observation protocol. These new assessments will provide recommendations for appropriate treatment.

Child Parent Psychotherapy (CPP) and Trauma-Focused Cognitive Behavioral Therapy (TF-CBT) are two of the possible models that could be utilized. DCS has trained a cohort of 28 therapists to provide Child Parent Psychotherapy. This first cohort of trained therapists includes 9 teams of 3 therapists from within the CMHC network and one additional DCS clinician. These therapists completed their training in May 2014, but will receive another year of consultation through the Child Trauma Training Institute as they begin to fully implement the model. DCS began offering training to a second cohort of clinicians to ensure service availability for children in need. DCS has trained approximately 300 clinicians throughout the state to provide TF-CBT. These agencies are both CMHC's and community-based providers and will ensure that TF-CBT is available for children and families in need.

Successful Adulthood: Older Youth Services

Indiana's Older Youth Services delivery method utilizes the broker of resources model, which is designed to: 1) ensure youth have or establish ongoing connections with caring adults; and 2) promote youth to develop as productive individuals within their community, by the acquisition and maintenance of gainful employment, the achievement of educational/vocational goals, and the receipt of financial skills training. This model shall also aid in future program development and design for other resources to facilitate the successful transition to adulthood for foster youth.

This model places the provider in the role of connecting youth with services provided in the youth's community or through a natural, unpaid connection to the youth rather than by the contracted provider. Over time, the youth should be able to depend on their social network and individual knowledge in order to accomplish tasks related to living independently.

V. Available Services

Appendix A shows all contracted services in the region as well as the most frequently used services, expenditures by service, and the projected budget for SFY 2019 and 2020.

VI. Needs Assessment Survey

Each region in the state conducted a needs assessment survey of individuals who have knowledge and experience with child welfare and juvenile probation services. During spring and summer of 2015, the surveys were administered to Family Case Managers (FCMs), service providers, and other community members to measure their perceptions of 26 services in their communities in terms of need, availability, utilization and effectiveness. The intent of the survey was to evaluate local service needs. Results of the survey were used to assist in determining the regional child welfare and juvenile probation service needs, utilization and the appropriate service delivery mechanisms. Results of the surveys are located in Appendix B. Look at the appendix to view the highest available/utilized services and those that are lowest in availability.

VII. Public Testimony Meeting

The Public Testimony meetings were advertised on the DCS web page titled "Biennial Plan Public Notices" at least 48 hours in advance of the hearing (excluding holidays and weekends). The web page included the purpose, dates, times and locations for each of the meetings throughout all 18 DCS Region's. Additionally, the Public Testimony meetings were advertised in each of the local offices and included the purpose, dates, times and locations for each of the meetings throughout all 18 DCS Region's. Email notifications of the public meetings were sent to all contracted providers and other community groups.

The Public Testimony meeting for the Child Protection Plan/Biennial Regional Services Strategic Plan was held on 10/18/17 at 5PM at 938 N 10th St Noblesville, IN 46060. A summary of the testimony is provided in Appendix C.

No public testimony was provided.

VIII. Summary of the Workgroup Activities

Workgroups composed of representatives from the Regional Service Council and others in the community were held to review current data, information gained through public testimony, as well as the action plans created for the 2016 Biennial. The workgroups determined what items, if any, from the previous action plan have been accomplished and modified the plans accordingly for each topic area.

The topics of discussion included:

1. Prevention Services

The group defined Prevention Services for Region 11 as - services for children and families to help families (including adoptive and extended families) at risk or in crisis including services to assist families in preventing disruption and the unnecessary removal of children from their home (as appropriate). They help to maintain the safety of children in their own homes, support families preparing to adopt, and assist families in obtaining other services to meet multiple needs. The focus was on creating community awareness of services available which would prevent disruptions and maltreatment.

The partners identified to form efforts to market prevention services were: DCS, Community Partners, PCA, and the community Mental Health agency from each county of the region.

Projects that were discussed were: An updated Resource Manual of Services and distribution of the manual, open an RFP for substance abuse prevention through community partners/regional service counsel.

The discussion was also focused on DCS decreasing maltreatment through improving CFTM's that were focused on child safety.

2. Maltreatment After Involvement

This group discussed an opportunity to improve on engagement and assessment of the unmet unresolved or unidentified issues/needs of a family during the life of a case. There were concerns mentioned that families are not properly engaged in order to feel comfortable discussing "true needs" or that a trust building relationship hadn't been formed in order to talk about past trauma. Therefore, only treating the surface level symptoms. A possible solution was to assess past trauma by thoroughly engaging families and having thorough family stories during CFTMs. Another idea connected to CFTMs was identifying true informal supports for the family as well as locating absent parents and their supports. Another discussion was around a lack of financial resources and services to support pre-adoptive and adoptive families. Advocating for a better negotiation process for foster families willing to adopt children. There was a big discussion around identifying the child's voice in the case, when children are old enough. The idea of teaming around a child to allow them to identify their circle of support. SOC is not being fully utilized in the counties to create awareness of county issues, services, trends etc., Community Partners referrals are not being made at the end of cases to transition resources and supports.

3. Permanency for children in care 24+ months

The discussion pointed out opportunities with a few themes: Legal barriers and the court system. Effective use of and availability of services. Local placements meeting the needs of the children. Finally, the correlation of the CFTM and the case plan goals.

Opportunities including the correct services at the needed time. A lack of resources/appropriate services or availability of the correct services at the needed time for domestic violence and mental/ behavioral health, use of providers where their qualifications do not match the need of the person receiving the services, high staff turnover for both providers and DCS, children with numerous placement disruptions and high needs due to extreme behaviors, and a lack of foster parents in the area to meet the child's needs. Engagement of fathers too late. The distance between parent's homes and the placement of their children.

The team discussed; communicating with the local courts in each community regarding services and concurrent planning and training DCS staff regarding reports and testifying. Two items resembled steps in the last biennial plan; Refining a system for local and regional review of children over 24 months, and the use of the CFTM/Case planning process. The last plan focused on CFTM's during assessments solely, this focus is on the CFTM/case planning being consistent and ensures anyone who is not on the CFT is aware of the CFT plans, case plan, safety plan, and what is needed to reach permanency.

4. Substance Use Disorder Treatment

The work group discussed how substance use, support and treatment is a factor hitting many of the work groups. Caseloads have grown quickly and services and capacity have not grown in accordance. Client lack of engagement is a barrier. The group recognized the need for immediate treatment options when addicts want to receive treatment. The group saw an opportunity to cross train and coeducate DCS staff, providers and stakeholders (foster parents, CASA, etc.) to increase the knowledge of drug use, safety planning/relapse planning and the tools available. The group believed there to be an overuse of the drug screen and other assessment and planning tools should be more of a focus.

5. Other regional items were discussed; some items overlap in trends affecting the areas noted above. Categories of discussion included; lack of transportation, need for trained foster homes and group homes specific to the growing number of children with extensive or high needs. Access and availability of mental health services and lack of services in rural communities in general. Turnover in the field of child welfare for both DCS and community stakeholders and partners. These areas continue to be problems overarching our system.

The data considered are included in Appendix A: Service Array and Appendix D: Additional Regional Data

IX. Regional Action Plan

Overview

The Regional Action Plan presented in this section is based on all data collected that addressed regional service needs. These data sources assessed the following areas:

- Service availability (through the needs assessment survey)
- Service effectiveness (through the needs assessment survey)
- Public perception of regional child welfare services (through public hearings)
- Quality Service Review Indicators and Stress factors (4 rounds)
- Community Partners for Child Safety prevention services
- Regional services financing

Maggurahla Outcoma

- Regional workgroup determination of service available/accessibility
- Additional input provided by the workgroup

These data sources were considered by regional workgroups to determine service needs that were to be prioritized by a region for the relevant biennium. To address these service needs, regional workgroups formulated action steps which included distinct, measurable outcomes. Action steps also identified the relevant parties to carry out identified tasks, time frames for completion of tasks, and regular monitoring of the progress towards task completion.

X. Organization, Staffing and Mode of Operation

a. Describe the number of staff and the organization of the local child protection services (CPS) including any specialized unit or use of back-up personnel. **NOTE: The term CPS refers only to the reporting and assessment of child abuse and neglect**

1.	47	Number of Family Case Managers assessing abuse/neglect reports full time.
2.	1	Number of Family Case Managers with dual responsibilities; e.g., 50% CPS assessments and 50% ongoing services or 20% CPS and 80% ongoing services

3.	3		Number of Family Case Manager Supervisor IVs supervising CPS work only
4.	8		Number of Family Case Manager Supervisor IVs supervising both CPS work and ongoing services e.g., 50% CPS and 50% ongoing services
5.	0		Number of clerical staff with only CPS support responsibilities
6.	14		Number of clerical staff with other responsibilities in addition to CPS support
7.	Y	N	Does the Local Office Director serve as a line Supervisor for CPS?
			Tipton County only

b. Describe the manner in which suspected child abuse or neglect reports are received.

1.	Y	N	Is the 24 hour Child Abuse and Neglect Hotline (1-800-800-5556) listed in your local directories with the emergency numbers as required by law?
2.	All calls concerning suspected child abuse and neglect are received through to Indiana child abuse and Neglect Hotline at 1-800-800-5556, including times when the local DCS offices are closed.		

c. Describe your current system of screening calls and reporting allegations of child abuse and neglect. (Attach any tools you presently use if helpful.)The Indiana Child Abuse and Neglect Hotline (hereinafter "Hotline") receives all calls, faxes, e-mails, etc. from inside and outside the state regarding the suspected abuse and neglect of children occurring within the state of Indiana. Intake Specialists, most of whom have been Family Case Managers, gather

the information from each caller and provide a verbal recommendation to parents, guardians, and professionals. The Intake Specialist bases that recommendation on current laws, policies, and practices regarding abuse or neglect. The Intake Specialist routes their completed report to a Hotline supervisor for approval via MaGIK. The Hotline supervisor can make edits/changes within the MaGIK system or send the report back to the Intake Specialist for changes. Once approved by the supervisor, all reports with a recommendation of assess or screen out are routed to the local county's queue for final approval. In the county queue, the local county has the ability to agree with or disagree with the Hotline recommendation. If the local county changes the decision, the local county will notify individuals who received a Hotline recommendation of that decision change. If an immediate response to a report is required, the Intake specialist calls the local office via telephone during regular business hours. After hours, the Intake Specialist provides the on call designee essential information needed to immediately initiate the assessment. The written documentation is then forwarded via MaGIK to the local office's county queue. From 4:30-9:30p, Monday-Thursday, the on-call designee is notified via telephone of all 24 hour response time reports. Upon Hotline Supervisor approval, 24 hour response time reports will be routed to the county queue. From 9:30p-7:00a Sunday-Thursday, the Hotline will contact the on-call designee **ONLY** for reports requiring an immediate initiation.

From Friday at 4:30 PM to Sunday at 9:30 p.m., the Hotline will contact the on-call designee on all 24 hour reports and Information/Referrals involving open cases. The Hotline will follow weekend processes for contacting on-call on Holidays.

All reports approved to a county queue will be emailed to that county's distribution list by MaGIK. All reports approved from the county queue with a decision of assess will automatically be emailed to that county's distribution list by MaGIK. Reports approved by the local office with a decision of screen out, can be changed after closure to assess.

d. Describe the procedure for assessing suspected child abuse or neglect reports:

1.	Please indicate when abuse assessments will be initiated				
	a.	Within 24 hours of complaint receipt. See Chapter 4, Section 38 of the Child Welfare Manual (Initiation Times for Assessment).	Y ⊠ N □		
	b.	Immediately, if the child is in imminent danger of serious bodily harm.	Y ⊠ N □		
2.		l icate who will assess abuse complaints received during and after s. (Check all that apply)			
	a.	CPS			
	b.	CPS and/or Law Enforcement Agency (LEA)	\boxtimes		
	C.	LEA only	\boxtimes		
3.	Please ind	icate when neglect assessments will be initiated. See Chapter 4,			
		of the Child Welfare Manual (Initiation Times for Assessment).			
	a.	Immediately, if the safety or well-being of the child appears to be endangered.	Y ⊠ N □		
	b.	Within a reasonably prompt time (5 calendar days).	Y ⊠ N □		
4.	Please indicate who will assess neglect complaints received during and after working hours. (Check all that apply)				
	a.	CPS only	\boxtimes		
	b.	CPS and/or LEA			
	C.	LEA only	\boxtimes		

e. Describe the manner in which unsubstantiated child abuse or neglect reports are maintained. Refer to Indiana Child Welfare Manual Chapter 2 Section 13, Expungement of Records.

 $N \square$

- f. Describe the policy and procedure you follow when receiving complaints of institutional child abuse/neglect from the Hotline. State assessments: Please describe procedures for reporting allegations in state institutions and facilities. Refer to Indiana Child Welfare Manual Chapter 4, Section 30 Institutional Assessments:
 - 1. Statewide Assessments: The Indiana Department of Child Services Hotline receives and processes reports of possible Child Abuse and/or Neglect (CA/N) that occurred in an institution setting located within the state. Licensed residential placement providers are mandated reporters and are required to report CA/N incidents and allegations. The Hotline staff will determine if the incident/allegation rises to the level of legal sufficiency to warrant further assessment and provide their recommendation to the Institutional Child Protection Services unit (ICPS). If the CA/N report is screened in for assessment, the ICPS unit will assess allegations of abuse and neglect in group homes, residential treatment centers, emergency shelter care centers, day cares, schools, correctional facilities, etc. Allegations involving a foster home will be assessed by the local DCS office staff where the alleged incident occurred. The ICPS Director will assign the new report to the ICPS assessor in the respective Super Region for follow up. There are currently ten (10) ICPS Family Case Managers based in local DCS offices throughout the state.

The ICPS unit handles the 24 hour and 5 day response times. In cases where immediate attention is warranted, ICPS staff works in tandem with the Hotline and DCS local offices to ensure one hour response times are achieved and child safety is established. All reports are forwarded to the appropriate licensing/governing bodies at the time of report and again at completion for further review. Reports that are screened out, are forwarded to the appropriate licensing people when applicable.

2. <u>Institutional Abuse or Neglect:</u> Institutional Child Protection Services (ICPS) for the Department of Child Services assesses allegations of abuse or neglect regarding children in an Institutional setting, when the alleged perpetrator is responsible for the children's care and safety.

Reports are received through the statewide hotline and assessments are initiated within the assigned timeframes (1 hour, 24 hour or 5 day) to determine the safety of the child.

Upon completion of the assessment, ICPS will make a determination of the allegations to be either unsubstantiated or substantiated. Further services, referrals, safety plans may take place during and at the conclusion of the assessment to continue to ensure child's safety and reduce future risk. ICPS assessments are completed by the ICPS unit, consisting of Family Case Managers stationed throughout the state. The Institutional Child Protection Service (ICPS) Unit will conduct an assessment of a report of Child Abuse and/or Neglect (CA/N) if the allegations state the incident of CA/N occurred while the child was in the care of one of the following:

- a. Residential Facility (i.e. DCS licensed Child Caring Institutions, Group Homes and Private Secure Facilities);
- b. School;
- c. Hospital;
- d. Juvenile Correction Facility;
- e. Adult Correctional Facility that houses juvenile offenders;
- f. Bureau of Developmental Disabilities (BDDS) Certified Group Home;
- g. Licensed Child Care Home or Center;
- h. Unlicensed Registered Child Care Ministry; or
- i. Unlicensed Child Care Home or Center (see Related

Information). ICPS will NOT conduct assessments

involving:

- a. Licensed Foster Homes through DCS
- b. Licensed Foster Homes through a private agency
- c. Fatality or near-fatality assessments regardless of allegations or where said allegations took place.
- d. Abandoned infants (IC 31-9-2-0.5, as amended):

XI. Inter-Agency Relations

a. Describe the inter-agency relations and protocols in existence regarding the provision of child protection service. Describe protocols outlining information sharing between DCS, law enforcement and prosecutors.

Each county office provides screen out and assigned reports of child abuse/neglect to the appropriate LEA agency and prosecutor in the county for review (generally via email). Each office ensures that all information is fluid among DCS, LEA and the prosecutor.

Each County office notifies the appropriate law enforcement agency immediately on 1 hour reports and receives notification from LEA that they will/not be working jointly on the investigation.

Each County Office has a Multi-Disciplinary Team (MDT) or Child Protection Team (CPT) that meet approximately 1 time each month. The team consists of various members but include information sharing between DCS, law enforcement and the prosecutor's office. The CPT reviews screen out reports in each county as well. DCS forwards all substantiated reports of abuse and neglect to the prosecutor's office in each county for review.

- b. Describe the Community Child Protection Team.
 - A Community Child Protection Team (CPT) is established in each county. The CPT is a multidisciplinary team comprised of members who reside in or provide services to residents of the county in which the team in formed. The team includes 13 members:
 - 1. DCS Local Office Director (LOD) or designee
 - 2. Two designees of the juvenile court judge
 - 3. The county prosecuting attorney or designee
 - 4. The county sheriff or designee
 - 5. Either: (a) the president of the county executive in a county not containing a consolidated city or the president's designee; or (b) the executive of a consolidated city in a county containing a consolidated city or the executive's designee
 - 6. Director of CASA or GAL program or designee

- Either: (a) a public school superintendent or designee or;
 (b) a director of a local special education cooperative or designee
- 8. Two persons, physicians or nurses, with experience in pediatrics or a family practice
- 9. Two county residents
- 10. Chief law enforcement officer or designee

The CPT shall meet at least monthly. The CPT members are bound by confidentiality. The CPT shall receive and review child abuse and neglect cases and complaints. The CPT shall prepare a periodic report regarding the child abuse and neglect reports and complaints reviewed by the team. Additional information on periodic reports can be found in IC 31-33-3-7.

XII. Financing of Child Protection Services

- a. List the cost of the following services for CPS only: (Please do not include items which were purchased with Title IV-B or other federal monies).
 - 1. List items purchased for the Child Protection Team and costs

2016	2017
None	None

2. Child Advocacy Center/Other Interviewing Costs

Region 11	Total
Hamilton	\$68, 746
Hancock	\$15,041
Madison	\$82,254
Tipton	\$5,119

b. Please provide the annual salary for the following positions and total the salaries for each of the classifications listed below: (Please include all staff with dual responsibilities and estimate and indicate the percentage of salary for CPS time only. For example, if a Family Case Manager works 40% CPS and 60% ongoing child welfare services, use 40% of the salary, the CPS portion. Also, if the Local Director acts as a line supervisor for CPS, include the proper percentage of the salary on the line for Family Case Manager Supervisors. (Attach a separate sheet showing your computations.))

Average Salaries to be used in calculations

	<u>2016</u>	<u>2017</u>
Family Case Managers	\$37,032.56	\$37,350.63
Family Case Manager Supervisor/LOD	\$45,296.79	\$45,086.73
Clerical Support Staff		\$28,528.46

XIII. Provision Made for the Purchase of Services

a. The Indiana Department of Administration's (IDOA) Request for Proposal (RFP) process is used to procure goods and services for Indiana Agencies. A RFP may be utilized to solicit providers that can satisfy the service needs for the Region. IDOA's fair bid process ensures that state agencies gain quality products/services at competitive prices while also ensuring equal opportunity to all qualified vendors and contractors. Additional information regarding RFPs for Community Based Services can be located on the DCS page http://www.in.gov/dcs/3158.htm.
