## Appendixes

- Appendix 1 - Indiana NEMSIS Data Element List
- Appendix 2 - Indiana NEMSIS Data Element Definitions  
(Detailed definitions located on NEMSIS.org [Data Dictionary](#))
- Appendix 3 - Indiana Homeland Security (IN DHS) Districts and Counties List
- Appendix 4 - Indiana FIPS County Codes
- Appendix 5 - Indiana County, Township & State List
- Appendix 6 - Indiana Hospital Destination /Facility List & Codes  
Excel spreadsheet is available upon request

## **Indiana EMS Commission Data Registry NEMSIS Reporting System**

### **1. Authority:**

A. Indiana statute prescribes the authority to collect data for review to the EMS Commission.

B. IC 16-31-2-11 states:

(a) The commission shall develop procedures for ongoing review of all emergency ambulance services.

(b) The commission may review any pre-hospital ambulance rescue or report record regarding an emergency patient that is utilized or compiled by an emergency ambulance service employing paramedics, advanced emergency medical technicians, or emergency medical technicians. However, except as provided in subsection (d), those records shall remain confidential and may be used solely for the purpose of compiling data and statistics. The use of such data or statistics is subject to IC 4-1-6.

C. 836 IAC 1-1-5 states:

(a) All emergency medical service provider organizations shall comply with this section.

(b) All emergency medical service provider organizations shall participate in the emergency medical service system review by collecting and reporting data elements.

### **2. Purpose:**

A. The EMS Commission's "ongoing review" is designed to evaluate EMS systems and provide quality improvement. This is accomplished by "compiling data and statistics". The collection of run data enables the commission to evaluate each component of the EMS system.

B. Through multiple data sources linking this data will be used for research to determine the impact EMS has on outcome data. A few of the focus areas would include trauma, stroke care and other time critical conditions. This data linkage will also allow opportunities to influence Indiana citizens' lives through awareness and prevention programs.

### **3. NEMSIS Data Elements:**

A. The Indiana EMS Commission has adopted the National EMS Information System Version 3.40 (NEMSIS) and 225 of the 400+ NEMSIS data elements that would collect at a minimum the "essential data elements" to serve as a completed EMS run for a data registry entry. **See Attachment 1.**

B. The NEMSIS program is set for accepting all runs regardless if transport occurred.

#### 4. **Reporting:**

The EMS Commission has defined the required data elements needed to collect and report to the EMS Registry. The commission's directive about developing reporting methods was to encompass every Certified EMS Provider in the state. The commission approved the following two methods of reporting data to the EMS Registry via the NEMSIS Version 3 data code set.

The EMS Commission requires all transporting, air ambulance and ALS non-transport provider organizations to collect and submit data on all incidents. Providers solely certified as a basic life support non-transporting provider organizations are required to collect but are not required to report data at this time.

##### **A. State Software:**

- (1) The state EMS office contracted with ImageTrend that is compliant and certified by the University of Utah, the NEMSIS development center.
- (2) Indiana EMS providers are to collect and report the 225 elements required by Indiana EMS Commission. (See Attachment 1.)
- (3) The state software program allows EMS providers to collect their data for reporting to the EMS Data Registry and to evaluate their own individual system by using the report writing program capabilities.
- (4) The state software also allows users to use more data elements beyond the 225 data points for their own in-house EMS run tracking and statistical reporting.

##### **B. Independent Software:**

- (1) Indiana EMS providers may choose to collect the required data elements prescribed by the Indiana EMS Commission on a private vendor software program that is NEMSIS Version 3 compliant.
- (2) Those Indiana EMS providers are to collect and report at a minimum the required 225 data elements. The providers may choose to collect more data elements beyond the 225 for their own in-house EMS run tracking and statistical reporting. These additional elements shall not be reported to the state. See Attachment 1.
- (3) The providers are responsible to transfer their data to the EMS Data Registry by the 15<sup>th</sup> of the following month in the NEMSIS Version 3 format.
- (4) Data transfers will be electronic as prescribed by the Indiana EMS Commission.
- (5) All providers shall insure that their independent software vendor submit data to the EMS manager for verification and that all validations are met and data successfully uploads.
