**675 IAC 21-1-11 Licensed elevator mechanic; scope of work**

~~Sec. 11.(a) The installation, alteration, maintenance, repair, replacement, performance of safety tests as required by IC 22-15-5-4(d), and placement out of service as described in Section 8.11.1.4(b) of 675 IAC 21-3.1 of regulated lifting devices shall be performed by a licensed elevator mechanic under the control of a licensed elevator contractor. However, performance of demolition, hole drilling, or monthly fire service testing as described in Section 8.6.10.1 of 675 IAC 21-3.1 is not required to be performed by a licensed elevator mechanic under the control of a licensed elevator contractor.~~

~~(b) Licensed elevator mechanics are not required to perform installation, alteration, maintenance, safety tests, or any other work associated with a regulated lifting device to which ASME A18.1 applies.~~

**REASON STATEMENT AND FISCAL IMPACT**

Modified the name of the term being defined from "elevator work" to "work" as the term "elevator work" is not used anywhere in the rule.

Fiscal – NA. No new requirements.

**Commented [GJK1]:** Post meeting recommendation to delete this language because it does not explicitly exempt this work from being performed by a licensed mechanic, just one under the control of a contractor. Therefore, this language should be struck to be clear it does not need to be performed by a licensed mechanic at all.

**Formatted:** Strikethrough

**Formatted:** Indent: First line: 0.5"

**Commented [GJK2]:** This was added following the meeting due to the exemption in IC 22-15-5-2(b)(1).
