ABOUT US

The NeuroDiagnostic Institute and Advanced Treatment Center, Indiana's newest state psychiatric hospital, delivers advanced evaluation and treatment for patients with the most challenging and complex neuropsychiatric illnesses and move them more efficiently into the most appropriate treatment settings within the community or state mental health system. The dedicated staff of the 159-bed facility serves a diverse patient population, with programs that include adolescent autism, adult acute psychiatric, adult psychiatric intensive care, neuro-cognitive disorders, psych-med for children and adolescents. Patients are referred to the hospital from Community Mental Health Centers, state psychiatric hospitals and judicial partners.

PARTNERS

The NDI also serves as a teaching hospital by partnering with local universities for medical and nursing students, as well as interns of other disciplines like social work and psychology in order to gain hands-on experience, helping NDI patients in their recovery.
