

# Death Investigation Guide

## *Detecting a Drug Overdose on Scene*

### Limbs

- ✓ Check for evidence of needle tracks, including fine needle punctures or bruising between fingers, under nails, toes, within the lines of tattoos, wrists, ankles, and backs of hands
- ✓ Check for evidence of burned fingertips or lips that may suggest smoking or drugs
- ✓ Check for transdermal patches that may indicate use of fentanyl

### Head

- ✓ Check for the presence of foam cone in nose or mouth
- ✓ Check for the condition of teeth
- ✓ Check for the presence of patches or baggies in oral cavity
- ✓ Check for a perforated nasal septum

### Surroundings

- ✓ Take pictures and document findings in your investigative reports!
- ✓ Check clothing for foreign objects, vials, or baggies
- ✓ Check drawers, cupboards, and medicine cabinets
- ✓ Check waste baskets and garbage bins outside
- ✓ Look for paraphernalia such as needles, tourniquets, powders, scales, cut straws, rolled up money or broken pens
- ✓ Count the number of pills. Record the number of prescriptions and who the prescription belongs to

## *Completing the Drug Overdose Investigation off Scene*

### Check the PDMP
