Xylenes	1330-20-7			3.E+02 S	1.E+04 M	1.E+02 N	4.E+02 N	3.E+03 N	1.E+04 N	1.E+05 N	1.E+03 N	4.E+03 N	4.E+04 N

Note: For your convenience, this short table includes some of the commonly encountered chemicals in the environmental media from release sources. This short table is not a substitute of Table 1. The list may not include all of the release-related chemicals for a particular facility, and all release-related chemicals, included in this short table or not, should be determined, investigated and reported as required by Indiana laws, regulations, and non-rule policies.

C = Carcinogenic endpoint

M = Set to maximum contaminant limit (MCL; ground water only)

mg/kg = milligrams per kilogram

N = Noncarcinogenic endpoint

S = Capped at soil saturation limit

µg/L = micrograms per liter; µg/m³ = micrograms per cubic meter

IDEM generally considers shallow soil gas to include samples collected no more than five feet below ground surface, and deep soil gas samples to include samples collected at more than five feet below ground surface.
