A Newsletter for Indiana Data Users

Data Release: ACS 5-year Estimates (2017-2021)

The American Community Survey produced its most recent 5-year (2017-2021) estimates in early December, which is of interest to those of us looking for reliable estimates for small areas during the 2020-2021 time range. The Census Bureau held a pre-release webinar [December 1](#). For webinar recording and materials, visit the [webpage](#). View the press release [here](#). For additional guidance using American Community Survey estimates, see the government publication [Understanding and Using American Community Survey Data: What Researchers Need to Know](#) (2020).

Urban definition shifts following 2020 Census

Every state in the United States has geographic areas that are re-designated urban or rural by the U.S. Census Bureau following each decennial census. This week, the Census Bureau [announced](#) that after the 2020 Census, the minimum population threshold for what defines an **urban area** has shifted from **2,500** to **5,000** people or at least **2,000** housing units. You can visit [this webpage](#) for an Excel list of current urban areas by state and check [here](#) for more 2020 Census Urban Areas Facts. For the original *Federal Register* notice, click [here](#).

New from MPH!

The Indiana Management Performance Hub (MPH) periodically updates the datasets on its [DataHub](#), the collection of data housed on its website. Recently added datasets include [Indiana211](#) data and 8 years of statewide [Emergency Medical Service \(EMS\)](#) runs. These data are de-identified so customers and patients remain anonymous. You can view the data by county, see details about service calls, and sort data by date or type/number of referrals. The MPH is now hiring for the 2023 Summer Internship Program! Dive into data by exploring the openings [here](#).

IN DataHub

Check out this cool new data tool! View young adult geographic destinations by parent income level and race/ethnicity. How far across the country did IN kids go? and where? How many were from IN cities? Small towns?

YA Migration Map

A SuperTool! The new Business Dynamics Statistics Explorer (BDS) allows you to instantly view and chart economic indicators by state with several different filters. Years span 1978 to 2020.
