Brief Update for the Indiana Resource Sharing Community
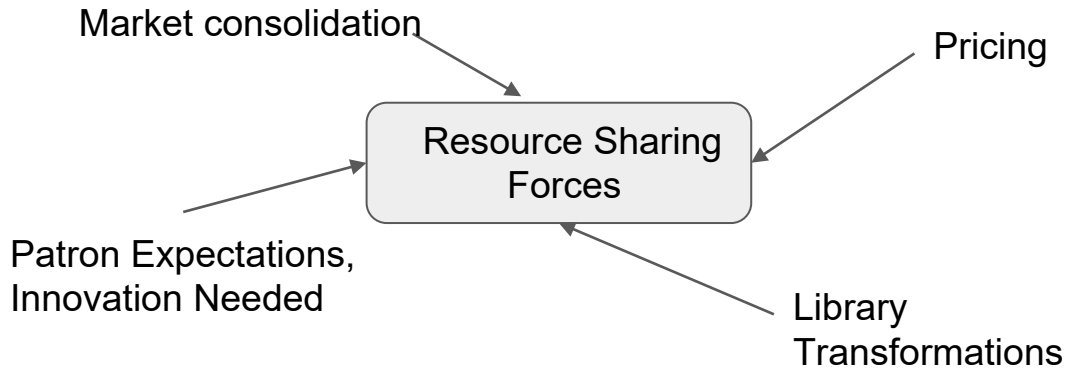

Scott Garrison

Executive Director, Midwest Collaborative for Library Services

October 2, 2020

The Future of Resource Sharing

"What should our next generation of Resource Sharing look like?"

Market consolidation → Resource Sharing Forces

Pricing →

Patron Expectations, Innovation Needed →

Library Transformations →

Transformations in Resource Sharing

System-centered workflows	User-centered workflows
Monolithic, vertical stacks	Interoperable, cross-system
Enables sharing of individual collections	Enables collective collections
Print-focused	Many formats
Single network	Many overlapping networks
APIs	Standards-based protocols
Vendor-owned	Community-owned

ReShare: The Big Ideas

DISCOVERY AND DELIVERY ARE INDEPENDENT

BREAK DOWN BARRIERS BETWEEN CONSORTIA AND SYSTEMS

PUT THE PATRON IN THE CENTER

ReShare

Use Cases

<u>Short term v. Longer term</u>

Academic consortia→ Multi-type consortia, or even individual libraries as nodes

Returnables → Non-returnables, CDL

Out of the box discovery +Choice of integrations

Traditional consortial borrowing → Support for sharing of shared print

Aggregating holdings data → Building partnerships for collections analysis

Benefits

Leveraging existing technology – started from FOLIO and Gold Rush

Opportunity to control costs

Choice to self-host or purchase services

Ability to innovate / influence community

Interoperability, standards focus = CHOICE

Improving the whole marketplace – pushing competition to do better

First Release– August, 2020
