INDIANA HEALTH COVERAGE PROGRAMS BT202388 AUGUST 1, 2023

IHCP announces new Sandata Mobile Connect application

The *21st Century Cures Act* directs Medicaid programs to require personal care service and home health service providers to use an electronic visit verification (EVV) system to document services rendered. The requirement that personal care service providers use an EVV system has been in place since Jan. 1, 2021, and will be in place for home health service providers as of Jan. 1, 2024.

State-sponsored EVV solution users that utilize Sandata will be required to download the new version 2.0 of the Sandata Mobile Connect application.

This is a brand-new application and not an update to the existing Sandata Mobile Connect application. All caregivers are encouraged to download version 2.0 as soon as possible to take advantage of the improved user experience and to access the most current updates to the application.

Version 1, now renamed Sandata Mobile, will remain available to capture EVV visits through June 30, 2024, but will not be accessible starting July 1, 2024.

For more information about the new application please visit the [SMC 2.0 hub](#) on Sandata On Demand.

The new Sandata Mobile Connect can be downloaded from the following application stores:

- For iPhone – [App Store](#)
- For Android – [Google Play](#)
