

Green Infrastructure

What is it?

For wastewater, drinking water, and stormwater projects, OCRA will award up to a maximum of 15 program specific points to projects with Green Infrastructure components. This incentive is part of the State's 2023 Action Plan.

How will it work?

Two Ways to be awarded Green Infrastructure program specific points:

Using the Indiana Finance Authority (IFA) State Revolving Fund Incentive Programs as a match

- Green Project Reserve Sustainability Incentive Program
- Nonpoint Source Incentive Program

and Submitting IFA's PER Approval Letter

2. If no PER, four categories will be evaluated:

- Water efficiency, energy efficiency, environmental innovation, and nature-based solutions
 - Submit the Green Infrastructure Justification Form and Green Infrastructure Certification
